# TEST YOUR SEED CORN

Seed With Strong Vitality Is an Absolute Necessity.

Give Your Seed a Careful Germination Test—It Should Run 95 Per Cent—The Mulberry in Ontario—Home-made Spray for Fleas.

(Contributed by Ontario Department of Agriculture, Toronto)

Two ears of corn may be used to plant two rows side by side. The seed may weigh the same and look the same, but the results in plant development and yield is frequently vastly different. Two stalks may stand together in the same hill, enjoying similar conditions for growth and development. One may produce a good ear while the other produces an inferior tassel.

Seed With Good Vitality a Necessity. The difference is traceable to the seed. Good vital seed from select stock will generally give strong plants and full ears. Unselected seed will give a few good plants and many medium or barren plants.

Enormous loss and waste would be prevented each year if care were exercised by all purchasers of seed corn. A few hills missed in each row, a few weak or barren plants distributed over the corn field, reduces or eliminates all opportunity for profit. The interest, taxes and wages have to be paid in full no matter what the crop is, and the more frequent the missed spaces, barren stalks, and weak stalks in the corn field the less there is to pay with.

Give the Seed a Germination Test. All seed corn should be given a germination test before sowing. One poor seed ear going into the planter means a waste to land, and labor that is best expressed by one thousand weak or worthless stalks. The corn grower can't afford to neglect the quality of the seed he sows.

Plant one hundred seeds two or three weeks in advance of the regular corn planting date, using a box of moist sand placed in a window as a germinator. Count the strong plants at the end of ten days; there should be at least 85 of them.

If the test shows any weakness discard all the seed and secure another supply with a guaranteed germination test.—L. Stevenson, Secretary, Ontario Department of Agriculture, Toronto.

The Mulberry. The old-time fruit-bearing mulberry has lost its place in the gardens of southern Ontario. Better fruits have crowded it out, until it is rarely seen in the modern garden or fruit plantation. Sometimes planted as a food tree for birds by bird enthusiasts or by those desiring to play with silk worm culture in this northern climate. During the past year, through southwestern Ontario mulberry trees have been offered to the public by traveling agents. The experiences of the past with the mulberry as a fruit producing tree and as a food producing tree for silk worms in Ontario and the United States would indicate that nothing very great by way of achievement or profit is likely to follow the planting of any of the mulberry varieties in Ontario. One tree for the birds is probably all any one farm can afford. As for the development of mulberry plantations for silk culture, such hardly seems probably possible under the climatic and labor conditions of Ontario.—L. Stevenson, Secretary, Department of Agriculture, Toronto.

Home-made Spray Keeps Fleas Away. By preventing fleas from tormenting the cows a much greater flow of milk is obtained during the summer months and the remainder of the lactation period. The following home-made mixture has given good results. It is better than several other mixtures tried and quite as efficient as the prepared sprays costing a dollar per gallon. It is made as follows:

1 1/2 quarts fish oil,  
1 pint oil of tar,  
1 quart coal oil,  
1/2 pint oil of eucalyptus.

Mix in ten gallons of lukewarm soft water in which a bar of laundry soap has been dissolved.

Spray twice a day, in the morning after milking and in the afternoon when cows are brought in for silage or green feed. When a half-barrel cart with spray nozzle attachment is used, two men can spray a herd of forty cows in ten minutes. This mixture is not perfect and does not keep all the fleas away and, furthermore, it leaves the coat rather hard and causes dust to adhere; however, it is very beneficial and practical.

Shelter from the hot sun of summer must be provided if efficient and economical production is to be expected.

Importing Quail. A consignment of live quail from Spokane has been received by the Provincial Game Board, for release in the uplands district. Three birds were given in exchange for Montezuma pheasants. Another consignment is expected from the Eastern States in exchange for pheasants.

A Convincing Argument. "What's this?" said John Smith, as he came upon his wife's new sewing machine knee deep in a snow drift. "Oh, I just put it out there to keep your mower company," replied his wife.

Out the first crop of alfalfa when starting to bloom.

The value of the motor truck as an aid in marketing farm products is now well established. In bringing this about improved roads have been an essential factor.

For Home and Country. The ladies of Norway and surrounding district are requested to meet at the home of Mrs. J. N. McPherson, Norval, on Thursday, June 16th, at 2.30 p.m. for the reorganization of the Norval branch of the Women's Institute. Miss Appeler, Stewarttown, District President, will give the address. A cordial invitation is extended to all. Come.

Boots that are Beets. The McPherson Shoes, for wear and value have no opposition. Also the day-foot boots, that are known for their wearing quality and good leather. The shoes are made of the most reliable firms in Canada and you will always get solid leather shoes through these boots. I buy direct from factory for cash and will let no one under sell me.—J. Roney the man that is making a name for Georgetown in the boot line. Best and cheapest repairing in town.

# MANUFACTURERS TO GATHER

The national officers of the Canadian Manufacturers' Association, and a glimpse of the Algonquin Hotel, St. Andrews.

On June 20 next a parliament of St. John, N.B. About three years ago the Association was organized into five territorial divisions, Maritime, Quebec, Ontario, Prairie and British Columbia, and the annual meetings are held in rotation in these divisions. In 1929 the convention was held at the Hotel Vancouver, Vancouver; last year at the Chateau Frontenac, Quebec, and this year it goes to the Algonquin Hotel, St. Andrews, famous as an important centre for all land and water summer sports. About 300 members of the association will be present and the subject of Canada's export trade because of its importance will receive more than usual attention in the various reports presented. Prospects for an extension of trade with the West Indies will also be considered as a result of the visit of a large number of members there during the past winter. St. Andrews has an interesting history dating back to the seventeenth century. It saw the early struggles between the French and English and it was later a garrisoned border town enjoying all the excitement of a border town in wartime. Its streets were laid out in 1784 and some of the quaint buildings of early colonial days still stand. The little town has important fishing industries.

# Comfort for Children at Sea

It is not an unusual thing in these days for young children to cross the Atlantic alone. During the last few months the passengers on the trans-Atlantic liners of the Canadian Pacific carried some very young unaccompanied passengers. In such cases the officials and stewards of the ship take charge and see that the children are well looked after. In fact the children are usually so happy on board that they are glad to have an opportunity of repeating a trip. Miss Hilda Kerham, a girl aged 9 years, made three trans-Atlantic trips. First she went from Liverpool to Montreal with her relatives. Later she crossed on the "Metagama" from Montreal to Liverpool. She afterwards came from Liverpool to Montreal in charge of a nephew aged three years. Amongst the best friends of this little girl is Captain Gillies of the "Metagama". A feature of the Canadian Pacific ships is the play room and nursery for children. Here they are provided with all the comforts of home. In case of necessity, medicine and nursing attention is provided. Very often babies are born on board and the circumstances of their nativity are made so comfortable that they are generally named after some of the officials or stewards of the liner which is the scene of their birth. The "Metagama" on which the above photo was taken, is one of the Canadian Pacific ships known as "Monoclas," which means that there are just one class of passengers accommodated, other than steerage, as distinct from the ships that carry first, second and third class passengers. These Monoclas ships are comfortable and luxurious, and possess all the advantages that one can desire in travel, from the sturkey and playground for children to an up-to-the-minute daily paper published aboard for those interested in world affairs.

# "Saturday Treat"

**Neapolitan Fudge 25c a Lb.**  
100 lbs. of our Neapolitan Fudge is our treat for this week end, and a pretty nice treat it is—a rich, creamy Fudge Chocolate, Strawberry and Vanilla. **25c a Lb.**
