For Married Men Only

Say, Mr. Man, have you ever stopped to think just how hard the weekly washing is on that wife of yours? Why make her old long bonnet her time, when you have it in your power to retain the bloom in her cheeks, the sparkle in her eyes, and the ability to enjoy life and participate in the worth while things of her home, unbroken by the ordeal of the wash board? The greatest of natural servants—electricity—provides a perfect solution to this problem. This great natural force, through the medium of the most important household appliance ever devised—the electric washing machine—throws open the doors of freedom to the housewife and remits the sentence imposed upon her by ages of custom. An electric washer must not be considered as something "it would be nice to have," it is INDISPENSABLE in every home. The above are cold facts but they are also REAL facts, so why put it off? You have no extra, if you have not the ready cash, the payments on a machine can be spread over a year if desired. "Miss Simplicity," "A. E. C." and "Hisobird" Electric Washers. Norman H. Speight, Lane Block, Phone 47.
