Vanatter, Dorothy Wey (hon.), Isabel Wilson, Harry Wood (hon.), Helen D. Wright.

Notes and Comments

NATURE SMILES to day on a Canada that is fair indeed with the brightest of prospects for a wonderful crop of everything that is essential to the comfort and sustenance of man. No other country in the world to-day is more abundantly blessed, and this Province of Ontario has reason to be thankful that it is the fairest garden of them all. Let every rejoice and be glad—and thankful.

JUDGING FROM THE attitude of numbers of owners and occupants of town lots and other land there is considerable ignorance as to their liability for permitting weeds to grow. The statute enacted to prevent the spread of noxious weeds says: "Every occupant of land, or if the land is unoccupied, the owner, shall cut down and destroy all the Canada thistles, eye daisy, wild oats, ragweed and burdock, and all other noxious weeds growing thereon, so often in every year as is sufficient to prevent the ripening of their seed." For failure to comply with this act such weeds are to be cut by the municipality and all costs and charges assessed to the property.

A CHANGE IN THE Mother's Pension Act is being recommended that deserted wives, of two years standing, should receive monthly payments. The act at present says that after five years of desertion, the wife may be paid. The proposed amendment may seem to be a humane one, and may work out all right, but great care must be exercised in such legislation that a premium is not being put on such a thing as wife desertion. If it is made easy for men to leave their wives and children, with the assurance that by so doing they will be well provided for, there are many such in the province ready and willing to do so.

THERE ARE MANY ways of combating the fly nuisance. On farms, the manure piles are probably the chief source of fly infection. The use of chemicals in destroying the larvae of the fly in manure piles is one of the important ways of keeping this insect under subjection. However, one must be cautious inasmuch as a too liberal use of some of the chemicals will destroy the fertilizing value of the manure. A study by the Department of Agriculture shows that the use of one half-pound of powdered hellebore to ten gallons of water will prevent the development of fly larvae in eight bushels of manure. This material has no deleterious effect upon the fertilizing value of the manure. Borax is another material that can be used to advantage. The much, however, will affect plants. The department recommends the use of 0.625-pounds-for-the-treatment of eight bushels of manure. Other precautions are clean premises, screened manure pits, outdoor fly traps and closed garbage cans.

A DISCUSSION which took place in the house of commons revealed the fact that the cities and towns of Canada do not take advantage, to the extent they should or might do, of the opportunity offered by the dominion department of agriculture, to have the herds supplying milk or cream tested for tuberculosis by officials of the health of animals branch. By order-in-council passed in April, 1917, it is provided that, on application to the veterinary director-general, any city or town can secure this service, on condition that the dairies supplying the milk or cream are licensed and conform to the standard it is further understood that, two years after the first test, the unpasteurized milk or cream in the supplying city or town shall be prohibited, unless the veterinary inspector can certify that the dairy herds contain no reactors and are free from tuberculosis. These conditions being agreed to, an inspector or inspectors will be sent to test all the cows furnishing milk and cream to the city or town concerned.

Milton

Men are at work on the foundation of a fine new residence which Judge Elliot will erect at the outer end, and on the north side of Martin Street.

At Tuesday evening's meeting of the town council the committee on fire and light was authorized to buy a fire truck, cost not to exceed \$3500. We understand that the truck will carry chemicals to put out small fires.

Mrs. John Brush and daughter, Agnes, left on Saturday for Fishburn, Alta., on a visit to relatives.

A farmer has complained to the Champion of the fact that Milton has no public stable in which those who come here in horse-drawn vehicles can put up and feed their animals. He admits that motor cars have replaced a great many horses, but says the passing of the O.T.A. was responsible for the closing of the hotel stables and the local supporters of the Act should have provided stabling. He vied dry, he said.

Eggs Wanted for Cash

Highest price paid for fresh eggs at Forster's Grocery, corner John and Victoria streets, Georgetown.

When I have won the rest once more

In sanctity of night and sleep, Drift visions from the shadow above,
Small, Patient forms that creep, They move in drab: they wear no wings;
They are the dreams that might come from
Mook phantoms of the modest things
That I have power to do.
Like azure shadows in the snow, Or bloom upon the sun-kissed grass,
Sweep lovelier shapes that gleam and glow,
And don a rarer shape,
They smile with eyes of queens and kings:
They call on me to make them true—
The lordly, gorgeous, sovereign things
I have no power to do.
Remain such waking dreams as I am
Upon reality and truth,
Flying like a holy seraphim,
Whose rainbow wings drop ruth
Born of the human sorrows
That pierce our common nature through,
They challenge to the mightiest things
All men have power to do.

GOING DOWN!

Oh, may he, who says from his depths of stupidity:
"It isn't the heat; it is just the humidity,"
In quitting this life, with a temperature most
Where humidity ain't, but there's plenty of heat.

—The farmers are having a harvest politically as well as in their everyday avocation.
—A running account seems to stand a long time.
