## for Community Action in Control of European Corn Borer

No single farmer can expect to keep his corn crop free of the European Corn Borer unless all his neighbours are also fighting the pest. For this reason some sort of cooperation is essential. You can organize your whole neighborhood by arranging a mutual plan of campaign whereby each farmer undertakes to account for the Corn Borers on his own farm.

This plan will assist in bringing the Corn Borer under control, but without such co-operation, satisfactory results will not be obtained.

### A Very Important Point

Cut corn crop low and as soon as it is ready. Burn all corn stalks. Garden sweet corn should all be pulled early and burnt.

Plough down all corn stubble very carefully. Seed to winter wheat where possible. Write for pamphlet, post free.

### Canada Faces the Future With Confidence

MANADIANS have always been noted for courage, optimism? and faith in their country.

Canada was not built up by pessimists, nor will Canada continue to develop if her people allow themscives to become croskers and

grouchers. Canada is fundamentally an agricultural country. We have a soil and climate which can grow the world's finest

agricultural pro-Canadian farmers who have earned the capital invested in their farms out of profits in farming are numbered in thousands. These successful farmers have paid off their mortgages, stocked their barns and stables, bought their machinery, made good living and rought up their families. It meant hard work, but today they

are independent.

Money in Mixed Farming

on the prairies, oats fed to steers have brought from 70e to \$1.07 as against the

Fort William price of 42c per bushel

while barley used for the same purpose

has brought as high as 99c as against the

Port William price of 57c per bushel.

Parmers marketing-their coarse-grains

We Must Cut Production Costs Canada is meeting with the keenest competition in the mark-eting of her products. To hold her own and regain her place on the world's market, she must reluce cost of production. The only way to do this is to berehne production per acre, per cow or per other unit.

But improved quality, also, is esential to meet market de-The quantity and the quality, of the products and the cost of production in competitive countries is beyond our control. Prices of agricultural products are regulated by world supply and semand. Hence decreasing production will not help the Canadian

Co-operative Poultry Men's Exchange markets in the same way, thus saving ruinous glut in their ocal market. ·There is a market for good Canadian torses, whether light or draught.

The British Columbia

Poultry makes

ada exports seed potatoes, but imports ather seeds. She has the opportunity to grow needs for herself and for export. The Future

Ten years from now the pessimists of today will have been forgotten. Britisin has removed the embargo against our

cattle. She wants our beef and bacon, our cheese, butter, eggs and apples, our wheat and flour. As the population of the United States increases, she will compete less and less against us on the British market. Eventually, she will herself be an importer of many other food stuffs besides wheat from this Canada has the men, the climate, the

land, the stock and the potential mark-ets necessary for agricultural success. Let us farm with all the industry and science we can muster. Let's get to work. and pay our debts. Canada is moving . forward with confidence in its future,
