

Signs at Bronte Crossing

As a result of the level crossing accident at Bronte on July 17, in which Gordon Skimming, of Toronto, and Miss Cohen, of Bronte, were killed while crossing the track in an automobile, the Dominion Board of Railway Commissioners has asked the Hamilton County Council to place standard signs on the roadway 300 feet from the railway at the Bronte crossing. This request has been made for the purpose of preventing further accidents at this particular crossing.

Reasons and Demonstration

The village of Acton celebrated its 50th anniversary with three days of rejoicing and demonstration on Saturday, Sunday and Monday. On Saturday afternoon a big list of sports were run off including baseball and football matches, foot races and aquatic sports. On Sunday many former Acton boys and girls were noticed in the churches. A big open air service was held in the evening followed by a concert of sacred music by the citizens band. The collection for the Children's shelter at Milton, the great day of sports on Monday commenced at 9 o'clock with an old time callithumpian parade and closed with a musical tattoo by the combined bands of Milton, Georgetown and Acton.

Auto Accident on Guelph Road

Carson Larson of Walkerton was instantly killed and four girls injured when a motor car containing seven persons crashed into a telephone pole at a bend in the road at Four Corners on Guelph Road between Guelph and Erin, shortly after 11 o'clock on Monday night, Aug. 6th. Larson, who was driving the car was crushed up against the pole, which the automobile struck broadside on. The party were returning from a dance at Erin when the accident occurred. The four girls were removed to the Guelph General Hospital. All were badly shaken and bruised but their injuries are not believed to be serious. Two other men in the car Vernon Hawson of Walkerton and Walter Bayley of Guelph, were occupied with bruises. The girls admitted to the hospital were Miss Irene Felker, Miss Jeannette Felker and Miss Margaret Griffith Guelph and a girl from Hamilton whose name is not known.

Your garden party will not be complete without Georgetown's Harry Lauder. All the latest in Scotch songs. Now open for engagements. Terms moderate. Apply to Charlie Scrymgeour, box 187, Georgetown.

EAT MORE HOME-GROWN

We Import Too Much Foreign Agricultural Products.

Canadians Use a Good Deal of Imported Fruit, Vegetables and Grain—Their Value Estimated at Nearly \$100,000,000—The Mystery of Nitrogen—No Alcohol in Silage Milk.

Continued on Toronto Department of Agriculture (Toronto)

Are Canadian farmers getting the full advantage of their home market? A study of the import figures for the year ending March 31st last reveals the amazing extent to which the food stuffs we consume are imported for consumption in Canada.

Take fruits for instance. Of apples we imported 155,201 barrels worth \$775,819. There weren't all early apples either, for 20,023 barrels were brought in during March. During the year we imported: Apples, \$114,822; cherries, \$83,349; peaches, \$403,312; pears, \$566,729; plums, \$202,495; and strawberries, \$20,120. A total of \$3,197,043. Add to this \$1,786,522 for dried apples, apricots, peaches, plums and prunes, and fruit juices being \$26,499,250. We also imported 229,428 lbs. of such things as, of course, for substitution, but some of these might be considered the our financial and customary advantage, by home grown products. For instance, we might eat more apples and fewer oranges. While dealing with nut-torial horticultural a bill for \$1,064,411 for plants, shrubs, trees and bushes might be mentioned.

Coming to vegetables, our total bill for the fresh article was \$3,575,970. Of which cabbage accounted for \$1,187,693, onions for \$487,009, potatoes for \$527,293 and tomatoes for \$26,981. A total for these four commonly grown articles of \$2,177,980. Of canned vegetables we imported \$26,210 worth; of sauces, catsup and pickles, \$518,860. Our total outlay for vegetables and vegetable products amounted to a considerable sum of \$2,696,840.

We have a great dairying country in Canada, yet we purchase abroad \$1,349,819 for 3,767,673 lbs. of butter, \$12,848,122 of 1,845,418 lbs. of cheese, \$46,387 for condensed milk, \$22,710 for casein, and even \$28,274 for powdered milk. The latter but-ter importations were supplemented by 1,165,410 lbs. of imported oleomargarine.

Our foreign grain bill amounted to \$11,275,682, though this included \$7,635,380 for flour, \$1,224,000 for wheat, of which 18,000,000 lbs. came from China. Milled products cost us \$685,895. The cost of our foreign products, other than \$500,000.

Our total imports under the head of Agriculture and Fisheries, and Products, mainly food, came to \$10,701,752. It could hardly be expected, however, to produce our own tea, coffee and spices, though we might consider the reduction of our sugar bill, which now amounts to approximately \$40,000,000 a year, by growing more beets.

We also imported \$20,825,398 worth of alcoholic beverages, which, as we all know, are mostly derived from the products of the farm. It may be, however, that some of our exported grains and fruits returned to us in the form of highly manufactured form.—R. D. Colquhoun, Dept. of Agricultural Economics, O. A. C. Guelph.

The Mystery of Nitrogen. Since animal life must depend upon plants for its support, we must first learn how nitrogen gets from the air into the plant. Every farmer has seen the grass turn yellow at times in the very early spring and especially that which was growing in the dead furrows of the field. This occurs largely because there isn't enough nitrogen in the right form for the plants to get at this time of year. As a single element existing alone, neither animal nor the green plants can use nitrogen, and yet it is the source of the entire supply for all life.

If we go back into history of Roman agriculture, we will find that even the farmers of that time knew enough to grow legumes. Even though all of this was known, it was not until 1877 that the reason for this was discovered. Then it was that the little sweet-peas always found growing in the furrows were discovered to contain countless numbers of minute forms of life, now known as bacteria. The scientist has learned that these little workers had a great deal to do with keeping the soil in its condition for the growing crops, for they, in their magic way of living, are capable of taking the nitrogen out of the air that is in the soil and making it a part of the soil compounds. In this way we have the cheapest means of keeping up the nitrogen supply of the soil.—Hoxby's Dairyman.

No Alcohol in Silage Milk. Satisfactory evidence has been adduced to show that by the feeding of corn silage alcohol is transferred to the milk. While it is true that silage does have traces of alcohol in it, yet it is altogether probable that the alcohol, as well as the acid of silage, is completely burned up in the cow and never passes even in minute traces into the milk.

The poultry house should be built as low as possible without danger of rain against the ceiling. A low house is more easily warmed than a high one.

Palatial Canadian Pacific Liner To Go On Big Cruise

In the upper left-hand corner of the picture the Canadian Pacific palatial liner Empress of Canada, which will start her big cruise on August 13th, is seen from the water. The picture is a color photograph of the ship at sea. The lower right-hand picture is of the Empress of Canada at sea, and the lower left-hand picture is of the Empress of Canada at sea.

The Empress of Canada, which will start her big cruise on August 13th, is seen from the water. The picture is a color photograph of the ship at sea. The lower right-hand picture is of the Empress of Canada at sea, and the lower left-hand picture is of the Empress of Canada at sea.

island of mountains thrown up as high as six thousand feet above the sea by volcanic action from the still unquenched ocean bed.

Already from the Straits of Gibraltar, reached on the morning of the twelfth day out, islands of the British Empire were originally named after a Moorish invader of the eighth century, whose castle still remains. Known to the ancients as one of the pillars of Hercules, it was formerly considered as the western extremity of the world.

Across the Mediterranean the ship now turns to the east, the high-plateau principality on the south-east coast of France, at which all the Puritan world shakes its finger. Within its tiny area more fortunes have been lost and won than lives have been squandered on the battle-

fields of Europe. The tables at the Monte Carlo casino are forbidden to the twenty thousand local inhabitants who, however, have the consolation of being exempt from taxes.

Naples is the next port of call, the largest, busiest and most populous port in Italy. Here opportunity is given to see the chief points of interest in the city and to visit Pompeii, Port Said and then Cairo and while the boat proceeds to Suez the passengers will be given four days in the land of the Pharaohs.

From there, the visitors move on down the Red Sea, past Aden, another British outpost and on across the Indian ocean to one of the greatest ports in the world, Bombay. A stay of a week has been allowed for this port, and many trips inland have been arranged.

After leaving Bombay the passengers will know where they are going as several hundred miles out from the shores of Ceylon, the heavily forested and spiced breezes indicate the longitude and latitude of the big liner. Three days are looked for in this port.

The trip to Rangoon, the greatest port in the world, and also one of the great lumber districts of the

east of Canada, is also of interest. Singapore, the busy capital of the Malay states, is the next port of call and Britons on the trip will be shown the foundation of the new naval base which is to be built there.

OVER EQUATOR. Crossing the equator the Empress of Canada will then go to Batavia, the capital of the Dutch East Indies. With her nose turned north the liner will steam for Manila, the capital of the Philippine Islands, and one of the greatest educational centres in the world. Money byways for schools are always passed in this insular settlement.

From Manila the travellers will be taken to Hong Kong, Canton, Macao and then to Shanghai, and special arrangements have been made to see China as China is.

The next port of call will be in Japan, where all the leading ports will be visited and the Japanese Government is making preparations to demonstrate to the visitors that Japan is a friendly little nation.

From Japan the liner will go to Honolulu and on May 24th terminate her cruise at Vancouver, the passengers going overland from there to their various destinations.

Fisher & King Georgetown

The Thriving City of Moncton, N.B.

Moncton, the headquarters of the Atlantic Region of the Canadian National Railway, was a point of much interest in the history of the Canadian Weekly Press Association. Over the Canadian National Railway recently. This city, with a population of 16,000, is a thriving industrial and commercial centre. In the neighborhood of the city are oil and gas fields, in some of which exceedingly productive wells are in operation. At Moncton the famous "tidal bore" phenomenon of the best, the incoming wall of water being sometimes between four and five feet. The rise and fall of the tide shows a difference of thirty feet between extreme high and extreme low. The photograph gives a general view of the city, showing the Canadian National Railway tracks elevated across one of the main thoroughfares.

Noticed Change in Wife

Mrs. Johnson Was in Badly Handicapped Condition—Two Bottles of Drene Have Produced a Big Change, Says Mr. Johnson.

There is nothing more debilitating to the whole system than faulty action of the digestive organs—a lax stomach, or sluggish liver may cause years of needless misery. Such was the case with Mrs. Johnson, of 13 Smith avenue, Hamilton, Ont., until she heard about Drene and decided to try its effects on her long standing ailment. The result was typical of this splendid herbal remedy, as Mr. Johnson will tell you.

My wife suffered stomach and liver trouble. Thinks she would not agree with her and would suffer in her stomach, causing much distress after meals, in belching and bloating. In fact, she hardly knew what it was to eat a good meal. She was bilious, spots dated before her eyes and as time she had terrible dizzy spells, especially when stooping over. She always had to be talking something for her bowels. We tried almost everything without result, until we heard of Drene. She has taken only two bottles and her trouble is gone. Her appetite is regular, she eats better and is growing stronger. We dream her health is better than it was when she was first ill. The symptoms from which Mrs. Johnson suffered are common to men and women of all ages and in every state of life. They come from the excess and poisonous acids that, possibly, functioning in the digestive system, are the cause of their greater ailment. This wonderful health builder tones up and regulates these acids as Nature intended. It contains curative juices of Nature's own herbs, roots, bark and leaves, everything without mercury, opium or habit-forming drugs.

Drene is being specially introduced in Georgetown by W. H. Watson, and is sold by a good druggist everywhere.

Notice to Creditors. In the Matter of the Estate of Charlotte Bailey, late of the Town of Georgetown, in the County of Halifax, Widow, deceased.

Notice is hereby given pursuant to section 56 of the Trustee Act, R.S.O. 1914, Chapter 121, that all creditors or others having claims or demands against the estate of the said Charlotte Bailey, who died on or about the twenty-sixth day of May in the year of our Lord one thousand nine hundred and twenty-two, at the said town of Georgetown, are required, on or before the twenty-ninth day of September to send by post prepaid or deliver to the undersigned, solicitor herein for Edward McCannan, the executor of the estate of the said Charlotte Bailey and widow, deceased, their Christian names and surnames, addresses and descriptions of the full particulars in writing, of their claims, a statement of their accounts and the nature of the security, if any held by them.
