Montealm to De Bongainville, his second in command. seven days before Wolfe's sold Ara made their way up the steep heights Wolfe's, Cove, and captured the Plains of Abraham:

At that time Gen. Montcalm's army was choiped on the Beaupart shore below Quebec, but Montcalm apparently was aware of the weak link in the French delences on the Heights of Abraham. There, above Wolfe's Cove, De Runigny was in command of a French outpost: "I am sending a regiment of

What would have happened had the regiment of Guienne been there to defend the way is a matter of keen speculation. In the face of such resistance Wolfe's men might not have succeeded at all and the French regime in Canada might 7 have had a very different history. The documents are now being closely examined by Dr. A. G. Doughty, the Dominion archivist. They are so numerous that only a cursory examination has been possi-

Where the Rudalo Rosmed: The Story of the Canadian West," by E. L. Marsh, author of "The Story of Canada" and "Birds of Peasemarsh." When the white man came to that country, says our author, be thought t very dreary and ignely. He called it the "Great Lone Land" and "No Man's Land." But he was glad to take away some of the fur coats the furs in plenty. To-day that country is no longer the "Great Lone Land," nor "No Man's Land." The Indians and the animals no longer have it to themselves. People from almost every country under the sun have made it their home. Cities and towns have been built, railways run from place o place, and where the buffaloes' playground used to be are vast stretches of rich grain-felds. Such a the story of Canada's great west. How the great change was brought about is told by Mr. Marsh in a pleasing manner. From the day when that bears his name; when Redisson and Groseilliers were the first white men to set foot in that unknown country; when the Hudson Bay Comsany first started operations, with all the exciting even's that followed the struggles and hardships of the early ploneers and explorers—all are told in a style that can be understood by
