A motorist had a narrow escape one day last week when coming down the paper mill hill and he and his car came within a foot or two of going over the bank into the river. Will the proper parties kindly see that the danger sign is replaced with a view to avoiding accidents?

The pictures of the large Ford plants in operation were quite interesting and instructive, as were also the other reels shown. Gowdy, tenor. The refreshment booths were being well patronized and every one appeared to be having an enjoyable time when the storm broke.

### Defies Rust!

There's one big point about "Toronto" Stable Equipment which makes me specially proud to sell it. It's the fact that the galvanizing thoroughly covers and completely coats both the inside and the outside of the steel tubing with pure zinc spelter. This "hot" process makes it absolutely rust-defying and proof against strong acids for the maximum period. This is a mighty valuable feature. Let me explain some of the many other Or get some of the interesting Toronto Literature.
