PACKING FARM BUTTER

The Best Way to Store Butter For Home Use

Keep the Cream Clean—How to Pasteurize the Cream—The Best Storing Packages—Use Care in Carrying Affairs—Mating Time.

(Contributed by Ontario Department of Agriculture, Toronto.)

We have all heard the expression 'The best is none too good'...

As pasteurized cream butter will keep very much better than raw butter...

To pasteurize, place the can of cream in a larger vessel containing hot water...

Churn at a temperature low enough to bring the butter in firm granules. Avoid overchurning.

Have the butter in such firmness that it will stand sufficient working but that the salt will be evenly distributed...

As butter keeps best in large packages, crocks, tubs and boxes are used.

Butter to keep must be protected from air, light and heat...

Further Packing and Storing Hints. If using crocks it will be necessary to cover the lid with two or three ply of clean wrapping paper...

When the hay is mowed, level off the top and fold the ends of the paper over. If a tub or crock is used place a circle of clean paper on top...

Use Care in Carrot Alkalis. Carrots require careful handling if they are to be retained through the winter...

Alfalfa, to be harvested properly, wants to be cut up while it is still a trifle green...

It is a common practice to cut the hay in the morning as soon as the dew is off, and then rake into bunches...

Although many times the first cutting is often discolored by moisture it is still valuable as feed...

Mating Time. While breeding pens need not be mated until about three weeks before hatching is to begin...

There is said to be on this property a two story frame residence containing a room with good cellar and woodshed also a barn 40x60, a shed 24x30, a shed 24x20, a shed 20x30...

SOME POULTRY POINTS

Selection and Mating Are Both of Much Importance

Does "Like Beget Like?"—The Question of Selection in Breeding and the Selection of Mating Time.

(Contributed by Ontario Department of Agriculture, Toronto.)

There are two main points to be considered in poultry breeding. First, the selection of birds that have the characteristics desired...

Many are of the opinion that "Like breeds like." In general, that is true, but it is true for general and not for particular qualities...

The question of selection. Selection is made on two basis that like will produce like, but experience has taught all breeders that to secure uniform superiority they must carry on the selection through generations of poultry...

Interbreeding and Line Breeding. Having located a successful mating, one can perpetuate easily so long the originals are breeding, but the problem arises when the first mating ceases...

Our experience in breeding birds of very close relationship, such as mother-son or brother-sister matings, would warrant our recommending such a procedure...

Many people appear to believe that the secret of getting eggs, particularly in winter, is in the feeds given and the method of feeding...

Hints on Plover Adjustment. 1. Adjust the springs till the weight of the plow beams and bottom are practically balanced.

2. Hitch plow at a point on tractor drawbar midway between horizontal centre of tractor and horizontal centre of plow.

3. Adjust vertical position of hitch so as to be substantially level in working position.

4. Set levers for first position and open flat furrow.

5. Change levers to working position.

6. When plowing is finished, set the levers in tractor position and take plow and tractor to nearest shelter.

The three outstanding features of Holland's dairy industry are cleanliness, efficiency and co-operation.

Inefficient cows are in the majority; they compete with one another, and all are unprofitable some or most of the time.
