## DEALING WITH HORSES

What to Do When Your Horses Are Broken-winded

ment Recommended-There Are Two Species of Tapeworms-Preventive Measures Suggested. (Contributed by Ontario Department of Agriculture, Toronto.)

The term Heaves or Broken-Wind

Heaves and Its Symptoms-Treat

is applied to a condition affecting horses which is manifested by short ness of breath due to the air cells of the lungs becoming over-distended. It is caused in many cases by feeding horses dusty bay, particularly timothy and clover hay. Allowing horses to drink an excessive amount of water after feeding, and just before going to work, and also overloading the stomach with bulky food, always predisposes to the development of heaven; hence the condition is met with most frequently to horses which are greedy feeders. Over exertion

Homes which are affected with heaves usually keep the nostrits dliated or wide open, and have a hurwheezing breathing accompanied by a double lifting or pumping of the flanks which becomes

intensified and more noticeable by exertion. The peculiar heaving of the flanks causes a ridge to appear along the lower end of the ribs, which is known as the "heave" line. An other symptom. Is the presence of a chronic cough, which is more pronounced after feeding or drinking. 3rpken-winded horses keep the anu relaxed and pass much flatus, or wind, at times.

The essential feature in the treat

ment of beaves is to alleviate the condition by careful dieting. By reducing the amount of hay or roughage and feeding chiefly on grain and mashes and regulating the supply of broken-winded horses may be enabled to do ordinary work. Dusty hay of any kind should not be fed to brokenwinded horses, as it will aggravate the symptoms, and to obviate such tendencies the hay should be dampened. The bowels should be kept regulated by feeding bran mashes, to which may be added a handful of glauber salts, or flax seed meal. Heaves is usually benefited also by giving from one to two tablespoons of Fowler's Solution of Arsenie in the food, or drinking water each morning and evening for a period of two weeks from time to time. In many cases broken-winded horses become more serviceable when moved from a damp, maggy climate to a dry one. -Department of Extension, O. A. Gollege, Guelph.

## TAPE WORMS.

How to Deal With These Pests When Attacking Horses

Horses are frequently seen that give little response to liberal feeding and care, continuing unthrifty due to the presence of intestinal paraattes, a point often overlooked in the care of animals. Two Species of Tape Worms.

Variable appetite, unthrifty and

poor condition, indigestion with

periodic attacks of colic, are the common-indications of the presence of cestodes, or tape worms. Two species of tape worm infest the intestines of the horse; one, the Tenia Plicata. ranges from six inches to thirty inches in length; the other, Tenia President of G. A. Stimson & Co., Perfoliata, is from one to two inches who has recently accepted the ap- long. Both have comparatively large, four-sided heads in which are fashloned four . round cup-shaped suckers. Their bodies consist of a humber of overlapping segments. The with the contents of the bowels it can be described as a small rectangular a son of the late Judge Johnston ing away the eggs may be drifted or Sault Ste. Marie, Ontario, and carried from place to place by various agents. Many perish, but a few are able to continue the species by buing taken up in food or water by other animals, in the intestines of ,which they go through their life cycle and provide for the carrying on of the

had in some time | Preventive Measures Suggested. Preventive, measures consist in bar none. White boots 50c to 75c or early spring. A cement water trough, well supplied with clean, co.dwater, is the best insurance against

> Dept. of Extension, O. A. College, Have a Good Ram. None of the domestic animals respond to skillful breeding and good seldom that a man pays too much for a rame, If not a good judge of sheep, take a good sheepman with you and trust to his judgment, and don't be atraid to pay a good price. When through with the ram he can be more readily sold than a scrub, besides the

tape worm in horses.-L. Stevenson,
