—Shoe repairing. Roney's business is still pushing ahead and three men are at work. The reason is that the farmers are staying where they get a square deal for their money. We do the best and cheapest work that can be got anywhere. Women's boots half soled and rubber heels \$1.00. School children must have good leather boots and that is what they get at Roney's. All repairs sewed free. All kinds of new boots for sale. We can undersell all others and goers. We have no overhead expense and go right ahead. I am putting in a larger stock than ever. We do no credit. J. Roney, Georgetown's reliable shoe man. 21p

Card of Thanks

We hereby convey our sincere thanks to Mr. W. Gosdy and other friends and neighbors for their kindness and sympathy extended to us in our recent bereavement caused by the death of a beloved daughter and sister—Mrs. J. Martin Heathers and Sisters.

Smokeless Locomotive

Builds of wood at the Angus Shops, this full sized model of one of the latest D type locomotives was designed originally as a feature of the dinner decorations at the Chateau Frontenac on the occasion of the Quebec conference of the Canadian Pacific Railway officers. Equipped with bell, whistle and electric lights, not a bolt or bar is lacking to mar the illusion which is that of a perfect engine coming through the wall against which it is placed. The headlight holds a portrait of E. W. Beatty, president of the Canadian Pacific. At the Toronto Exhibition, August 23rd to September 6th, the model will be given a prominent position in the Company's exhibit.

It's Important to Cut Silage at the Right Time

If silage is cut too green—or after the frost has taken hold of it—it won't make nearly as good or profitable feeding as if cut at just the right time.

That's where one of my "Toronto" Ensilage Cutters proves its worth. Makes you independent of a hired outfit—enables you to cut at the right time.

Enables you to refill after shrinkage, too—a feature which helps pay for the Cutter in a short while. And it will cut your straw in the winter.

A small gasoline engine will operate this efficient Cutter. Let me demonstrate its quality features to you or ask me for free literature.
