### UMMER'S REMEMBRANCE

How softly summer sped ! Between the dusk and dawn she slipt away, Leaving her lighted torches, gold

and red, Her last farewell to say. The meadow's urns she filled.

And trimmed the forest's lamps of leaves to be Ready for Autum's welcome when

she willed Earth's loveliness to see. The garden's hearthstone shows

Where she found fragrant dream and fond desire. For her are heaped the ashes the rose

That was her scented fire. But she did not forget Her sister Autumn, who shoul

later come: For sweet remembrance on th hearth she set The first chrysanthemum. - Frank Dempster Sherman

## TREES FALL PLANTED

Spring Planted Trees

Pears, Plums and Sweet Cherries Do Well - Dug vs. Dynamited Holes for Planting-The Appeal of the Tree-Rainfall and Potato Rot-The Great Cat Crop.

(Contributed by Ontario Department of Agriculture, Toronto.) Experiments to determine, for the Niagara Peninsula, the relative merits of fall and spring planting of pears, plums and sweet cherries were started at the Horticultural Experiment Station, Vineland, in 1914 and 1916. Complete records of growth and fruitfulness have been kept for each season so that the evidence we now have is fairly conclusive. Pears, Plums and Sweet Cherries,

Do Woll.

Severally speaking for pears, plume and sweet cherries fall planting has resulted in the least number of deaths, and has given a somewhat greater growth of tree, both during the first season and thereafter. . At no time, however, have the differences been very great, though they have been sufficiently marked to warrant fall planting, providing well matured trees can be secured from the ndrseries. Trees dug too early and with unripeted wood are apt to sufter from winter injury. In some seasons, owing to weather conditions which stimulate late growth, it is practically impossible to secure well- At the Township Hall, in the Township of Nelson, matured nursery stock. After such

and be preferable. A probable reason for the fewer number of deaths in full planted than roots of the fall planted trees are not subjected to drying out as are

Principal Dug vs. Dynamited Holes for Plant-

In conjunction with the fall vs. spring planting, experiment trees were also planted in ordinary dug holes and in dynamited holes. This experiment was carried on, of course, in heavy soil. The general size, health and vigor of the trees in the various plantings seemed to indicate that the trees set in holes immediately after dynamiting were for some cause weakened and delayed in growth. This was attributed to the rapid drying out of the soil immediately following dynamiting, which delayed the starting of the trees. To overcome this difficulty the experiment was continued with the addition of trees planted in holes dynamited in the fall and allowed to fill with water and settle over winter .--Hort, Exp. Station, Vineland Station.

Rainfall Affecting Potato Rot. fall at the College have been kept by or removed from the list. the Department of Agricultural Physics in each of the past sixteen years. In comparing the amount of rainfall rot in the potato crop in each of the dress as stated above. past sixteen years some luteresting mformation has been obtained. The annual amount of rainfall for the three months referred to for the eight years in which there was no rut was 7.1 inches, for the four years when there was a moderate amount of rot 9.8 inches, and for the four years in which the rot was abundant 11.7 inches. The amount of rainfall, therefore, appears to have a very tions favorable or unfavorable for the development of rot .- Dept. of Exten-

slon, O. A. C., Quelph.

Oftario's Greatest Grain Crop. In 1923 oats were grown more extensively in Ontario than all other grains combined. It is probably safe to say that three-quarters of the oats which are now grown in this Province are of the O. A. C. No, 72 and the Banner varieties. According to extensive experiments and accumulated records at the College at Guelph and ontario, the O. A. C. No. 12 has surpassed the Banner in both quality of grain and yield of grain per acre. The differences between these two varieties, if applied to the oat lands of Ontario, would mean millions of For further particulars and conditions of dollars annually in favor of the

Georgelown Streetsville ..... October 1

More than one hundred and fifty traders from the Far North arrived to Edmonton, Alta., recently bringing with them fur sales to the value of approximately \$500,000.

Here and There

Tarsan Second, the largest wooden scow in the world, was launched recently at the Wallace shippards; carrier for a great pile-driver for !s Sydney E. Junkins Company.

Two dinosaurs have been located in the Red Deer Valley, Alta., near the Canadian Pacific Railway line | this summer, by the University of Toronto expedition, composed of | four scientists who prospected for several weeks in the gorge and are packing up the prehistoric monsters for shipment to the Royal Ontario Museum. Another skell ton has been located by the Geological Survey of Canada

One of the outstanding features of Canadian trade with the Orient during the past year or so has been the remarkable increase in wheat flour exports. Imports of Canadian wheat flour into Hong Kong in 1923 were the largest on record, showing an increase of 100 per cent in volume over those of 1922. The figures and values were: 1922, 79,585 a 191,821 barrels, valued at £249,044.

Zane Grey, the famous novelist, recently caught a .758 pound tuna fish, constituting what is believed to be a world's record. The sea monster was successfully conquered after three hours and ten minutes of grilling indeavor off the Nova Scotia coast, and towed into Liverpool harbor. Mr. Grey's prize is a species of the blue fin family. The record before this catch was held by J. K. L. Ross, the wellknown Montreal sportsman and financier, who caught a 710 pound Richardson, whose address is Milton, Ont.; For Nassagaweya - John tuna.

> One of the most remarkable achievements in art printing yet produced in Canada and one which finally disposes of the idea that such work cannot be satisfactorily handled by Canadian firms is found in the new booklet issued by the Canadian Pacific Railway dealing with the forthcoming 1925 Round the World cruise of the company's steamship "Empress of France." The booklet contains 40 pages of text and color illustrations, the latter exquisitely, combining many brilliant hues in a number of highly imaginative designs.

Canadian Pacific gross carnings Q for July totalled \$14,363,677 as against \$15,677,835 for the same month last year, a decrease of \$794,159. But in order to meet this reduction, operating expenses were reduced by \$1,963,686, those for the month being \$12,544,115, as compared with \$13,607,802 for July, 1923. Thus the not earplage for the month showed an increase of \$269,527 over those of the samemonth a year ago. For the 7 months of the year to July 80 gross earnings showed an increase of \$8,017, | 265; operating expenses an increase of \$1,924,013 and not earnings as increase of \$1,098,251.
