THE LITTLE BIT MORE

If while working for others you And your temper begins to

And whoh you are thinking you'v done quite enough, Then do just a little bit more.

There is a safe cure for all of the That come to most everyone's

And that is to smit at the world as it goes,

And smile just a little bit more. We know a soft answer will turn away wrath. And silence a victory score,

When for want of contention bad humor must pass, Keep silent a little while more. When your faithful affection has

not been returned

And you're slighted where you do Just hide in your hearts all th burts that do burn

And love them a little bit more. --- Phoebe Hendry

Little got home last Friday last year with results that, accordfrom the Bruce peninsula, looking ing to authorities there, exceeded as well as ever, and is being on- the expectations of the most optigratulated on the complete recovery from the effects of his serious illness. Yesterday he was back in his shop, attending to business as radian Seed Growers' Association.

The Milton Wood Impregnating Company has been granted a Dominion charter. The company is capitalized at \$500,000, and the head office is to be here in the textile building.—Champion.

Only One Vote The Ontario Government at a Council meeting on Tuesday decid ed that the ballot on the plebiscite on October 28rd next , would be a cross ballot, the voter thus marking the question which he favored. There will be accordingly but one vote for each voter. He will vote affirmatively for either the O.T.A. or Government control, and any variation from this practice will constitute a spoiled ballot.

Notice to Creditors

In the Estate of Joseph H. Waite late of the Township of Enquesing in the County of Halton, Guntleman,

Here and There

Although Alberta only became a province eighteen years ago, its population has increased fourfold. waile the grain yield has increased twentyfold. The total agricultural products of Alberta in 1923 were worth \$223,000,000.

The scheme for the settlement of British emigrants in Canada may assume a new aspect as a result of the presence in London, England, of the Hon. J. A. Robb, Canadian Minister of Immigration. Canada favors the movement of entire families to Canada from Great Britain, rather than that of single men.

Among the biggest muscalunges caught this year was one landed at the Canadian Pacific Railway's French River (Ont.) Bungalow Camp, by Samuel Franklin, Southern Sales Manager of Cluflins, Inc., New York City. Mr. Franklin had a light tackle and had dever hooked a lunge before. He had a hard fight to secure the fish, which tipped the scale at 38 % pounds. .

A total of 13,743 Canadians, most of them native-born, has been during the months of April, May announced by the Department of Immigration. During these three munths 53,425 persons immigrated to Canada, which represented an increase of 12,292 over the same pe-

One of the most diverse and interesting aggregations of passengers ever assembled in Canada left Montreal for Europe on August 20th aboard the Canadian Pacific liner Minnedosa. It included Majora S. de Beires and Brito Pais, who recently flew from Lisbon to Macao, China, a large party of scientists returning from the recent convention of the British Association for the Advancement of Science at Toronto, Colonel Geo. Ham, genial and internationally known "ambassador of the Canadian Pacific" and "Soldier" Jones, Canadian heavyweight boxer.

The first all-British direct cable service between Montreal and London was opened on August 18th by the Canadian Pacific Telegraphs. As business warrants, this service will be extended to embrace other Canadian cities with which it is now connected but which, as yet, cannot offer a reasonable return for a regular service. Messages were exchanged between the London Chamber of Commerce and the Montreal Board of Trade and between the Canadian and the English headquarters of the Bank of Montreal. conveying expressions of mutual goodwill and prophecying closer relations as a result of the improved sable facilities.

E. P. Ranch Improving Western Stock

(Top)—The Prince of Wales' best grass outters are hore soon at work on his ranch at fligh R. They are a famous herd and include many price winners.

(Left)—Will Somers, a famous race-horse belonging to His Majorty the King, and lounce to of Wales, who is keeping him on his ranch at High River to improve the equine stock of Alberta. (Right)—King of the Fairles—a senior and grand champion Short Horn bull imported and owned by the Prince of Wales and one of the many fine animals on the Prince's Ranch at High River on the Calgary-Lethbridge branch of the Outsides Pacific.

The way to approach the E.P. ranch is from Calgary minster's estate, and hardy Dartmoor ponies from

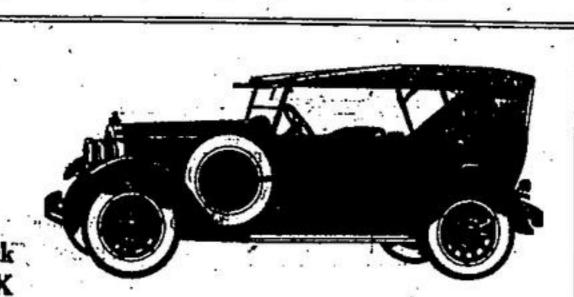

The way to approach the E.P. ranch is from Calgary to High River, 40 miles south, on the Canadian Pacific Railway. From High River one has to drive southwest a distance of 36 miles through one of the richest grain-growing and stock-raising countries in North America. In the distance the jagged peaks of the Rockies dip the clouds and below, well-wooded, are the 'Bar-U'' ranch and about one mile and a half from the limits of the "Bar-U" the low rambling bungalow where the Prince is now living is seen through a pretty glen. It is a homelike looking place typical of many a rancher's home in "Sunny Alberta." Here his Royal Highness goes "buck to the land."

In its brief history, the E.P. Ranch has come to play

"buck to the land."

The Prince of Wales has never ceased to exhibit a keen interest in his ranch, and fresh indications are periodically given of the importance he attaches to it and the work it is doing. After purchasing the ranch, and before returning to England, the Prince made arrangements for the shipment of some of the best stock in the British Isles. Its establishment was an indication of the importance attached to agriculture in the Dominions of the Empire its continuance and british Isles to the Canadian West. Thoroughbred horses came from the Royal stall, Shorthorns from the line's farm, Shropshire sheep from the Duke of West-

Progress or Reaction Ontario Electors Must Choose

THE issue of the Plebiscite of October 23rd is: Shall the sale of intoxicating liquor as a beverage continue to be prohibited, or the traffic be re-established and conducted by the Government? [Since September 16th, 1916, the legalized sale of liquor for beverage purposes has been prohibited. During eight years The Ontario Temperance Act has wrought a moral, social and economic transformation, gradual but real. ¶ A new generation knows nothing of the evils of the liquor traffic before the O. T. A. came into force. Older generations may have forgotten. Think of it! There is not a man or woman 29 years of age who has legally seen the inside of a bar-room or liquor shop in the Province of Ontario. | Booze is banned! It is a discredited and disbonored outlaw. Now, it wants to come back. It seeks not only re-instatement, but that the Government itself shall be an active partner.

Do You Remember?

The old-time Ber-Room and Liquor Shop, with their disgusting sights and sounds and

The staggering, curving, drunken men who jostled us on the streets and on the care-particularly on bolidays or at public demon-strations and who filled our jails; The poor, bettered, bedraggled hulks of men and women-God's children, our broth-

ers and sisters, every one of them: The destitution, misery, wretchedness, squalor, filth and disorder in many hovels that might, and should, have been homes; The vice, the immorality, the crime, the debauchery, incited by liquor, that appalled

good citizens The O.T.A. Has Made Good Contrast those conditions with the situation today. The Ontario Temperance Act has brought immessurable improvement. Drunk-tuness has decreased. Crime has been lessened. Homes are happier. Children have been given a better chance. Savings Bank deposits have increased. All down the line, PROGRESS has been written into the history

of Old Onterio! OFFICIAL RECORDS PROVE ALL THIS! The following table shows that, in Ontario under the O. T. A., there has been a substantial decrease in the offences that are usually associated with drinks

1,627 Cruelty to Animals 1,172 4.703 eeping and Frequenting Bawdy Houses Loose, Idle and Disorderly Drunkenness 6,411 1,736

2 Toronto Street, Toronto

NOTE THE OPINION OF OUR MANUFACTURERS: "Does Prohibition, under the O. T. A., result in more comfortable homes and better supplies of food and clothing for wives and children?"

When this question was saked of leading Ontario manufacturers by the Ontario Board of License Commissioners, 1,165, or 82 per cent., answered "Yes", while only 239, or 17 per cent., said "No".

All Systems of Government Sales Have Failed

So-called "Government Control" has prov-en a diamel failure wherever tried. Drinking, drunkenness and bootlegging have reached appelling preportions. Every Canadian Pro-vince that has tried any form of "Government Sale" has already learned a hard lesson. Take BRITISH COLUMBIA: Hon. H. L Stevens, M.P., in a public address in Van-

couver recently, declared: "Never, in the bistory of the country, was bootlegging comparable in magnitude and murderous results to what it is today." Or, MANITOBA: Figures furnished by the Chief of Police of Winnipeg show an increase of 45 per cent. in the number of

For the Honor of Old Ontario mark Your Ballet thus :-

Are you in favour of the con-Are you in favour of the sale as a beverage of beer and explication liquer in evolved pack-ages weder Generalist control?

drunk and disorderly cases in the first free months under Government Sale, as compared with the corresponding five months of the previous year under Prohibition. And, finally, QUEBEC: The following resolution was unsuimously adopted by the Presbytery of Mostreal, April 15th, 1924: "That we regard it to be a patriotic duty to make it known that the drug traffic flourishes here as never before and is on the increase, bootlegging flourishes in and from
this Province as never before, that drunkenness is on the increase and that the Quebec
system of Government Control is socially

missions and not a success." Ontario Must Hold the Line If a majority vote for "continuance", it means that we will have a better law more effectively enforced, with correspondingly improved results. The Government, through the Prime Minister, hes definitely pledged itself to "strengthen" the Act and "give it active and vigorous enforcement".

If a majority vote for "Sale", it means the re-establishment of the old, discredited Liquor Traffic, in the guise of respectability under a system that number the Government the bertender and every citizen a partner, acting as sales agent for the brewers and distillers and making profit for them out of the destruction of life and happeness.

The Outerio Plebiscite Committee, uniting the temperance forces of Outerio, cells upon all who love their Province and with its continued and increasing prosperity and the happiness of its people to VOTE POR THE LAW that has accomplished impressurable good, and not for a return of the traffic that has wrought such havele in the past, and would do it again.

HENS AND EGG LAYING

A Melange About the Handling of Barnyard Poultry

How to Tell the Layers-Conditions Necessary for Production-High Egg-Yielding - Distribution Eggs-More Poultry Points

Contributed by Ontario Department of

Can you tell which hens are laying without the use of trap nests? This is easy to determine if one will go to the trouble of handling each bird suspected of being a loafer. When a hen commences to lay, conditions in the organs concerned in reproduction are quite different from conditions observed during the period of idleheas. When the overy is dormant and no eggs are being produced the distance between the pelvic bones is small. The vent is dry, small, packered, and, in yellow fleshed chickens, has a band of yellow pigment around the inside. When laying commences the pelvic bones become pliable and spread apart to permit the passage of the egg. The vent becomes large and moist and the ring of yellow pigment disappears. A visit to the foul try house on an early winter evening and a half hour spent in going over the hens will be profitable.

Conditions Necessary for Production The experience of the Ontario Agricultural College Poultry departhas been that's hen will not lay if not in good condition. She should be healthy, free from any disease. and show plenty of vigor and activity. The first pullets to lay in the fall have been the carly maturing ones The pullets that have developed slowly in body and feather have been just as slow in starting to lay. The results of liberal feeding and general good care have always been reflected in the pullet flock and a full egg basket during the period of early winter high prices.

High Egg Production. The regulrements for high egg pr duction are clean, dry; comfortable houses, that are free from direct Guaranteed draughts over the birds, and that are well lighted. The feeding consists of a variety of grains, green feed, animal feed, grit and shell, which is clean, sweet and wholesome, and is given to the birds regularly, and in such quantities that they have all they want to eat before going to roost at night; that the supply of drinking material is clean and abundant; that the attendant is regular in his or her work, and is interested in the same; that the birds are bred from good laying ancestors, and that they are hatched at the proper season and well reared, and are free from disease. Distribution of Eggs.

A study of the distribution of the egg production is interesting and important from the point of the annual returns from the birds. Egg prices rise and fall with the seasons, and usually the greatest profit is made where producing eggs at a season or seasons of the year when prices are high. Pullets are the chief source of egg supply. As stated previously they require usually from six to seven months in which to mature. It is, therefore, possible to regulate their production in the fall months at least to some extent by regulating the time they will hatch in the epring.—Dept. of Extension, O. A. College, Guelph.

More Poultry Pointers. Crows are likely to steal the eggs from the late turkey nests if the nests

are made at some distance from the Be sure that the young growing chicks are well fed to promote growth and that they are given liberal range where there is abundance of green feed and also animal feed in the form

f insects, worms, etc. It is poor economy to keep more cockerels than will be needed for next year's breeding operations. If they are sold as soon as they are of broiler or fryer size a loss will be stopped and the pullets will do better with out them.

Cold, damp, poorly lighted and

ventilated poultry quarters favor the

spread of such diseases as roup. Such contagious disease as these are difficult and sometimes impossible to control unless given attention in the early stages. Wherever preventive measures fail, separate sick birds from the flock as soon as there is evidence of disease and then obtain expert advice to effect a cure. If the chickens must be confined on account of bad weather, provide a good straw litter to which their grain feed may be acattered. This will give them exercise; and keep them laterested and healthy. When chickens that have been accustomed to free range are closely confined this frequently checks their development for

the time being unless they are made contented in their new quarters. Provide green feed for them also. · Indian Runner ducks seem to have gone out of fashion, which is a pity, as they are excellent layers, and stand at the head as table fowls. They are easily raised, do not make the disagreeable noises that other ducks do, and eat less than any other breed bred ducks. They thrive on coarse feed, and can be raised cheaply and safely, as a duck hatched usually means one raised to maturity.
