

The Game of Life

It's a wonderful game if you play it right. If you use every one of your team's white...

About the time you think you make both ends meet, somebody moves the ends. A Ford wheeled through Oakville the other day with a banner across the back reading: "Don't hit me, big boy, I'm getting old."

International plowing match at Brampton, on the farm of B. H. Bull & Son, October 16th, 16, 17th and 18th. For full information apply to J. Lockie Wilson, Parliament Buildings, Toronto.

Legislative Grants to High Schools The legislative grants to Halton High Schools for 1924 are: Oakville, \$1,754.60; Milton, \$1,573.94; Georgetown, \$1,020.15; Burlington, \$1,094.48. All have been paid to the respective Treasurers, except that of Milton, which is held on account of insufficient accommodation for pupils.

Newspaper men, as a rule, have but two things to sell, space and subscriptions; and it would be just as consistent to ask your grocer for a dozen of oranges "just to fill up," as to ask an editor for a dozen lines in his paper to boost business, or some project whereby the promoters will realize a revenue with the idea that you are doing a kindness in helping to "fill up" space. Try getting a free dinner at the hotel or restaurants "just to fill up."

Fortune Tellers Victimise Many Two women, who called themselves Egyptian fortune tellers, and looked the part, plied their trade in a gaudy tent at the Fair at Orangeville on September 18th. Many complaints from people who were victimized by the women were received by the police when too late to do anything. Patrons would place their money in the hand of the fortune teller to be blessed, and when it was returned, shortages ranging from \$5 to \$50 were discovered by the victims.

Court of Revision Re Voters' List Not a hereby given that a court will be held, pursuant to the Ontario Voters' List Act, by His Honour the Judge of the County Court of the County of Halton, at Georgetown, on the 13th day of October, 1924, at 10 o'clock a.m., in the Town Hall, to hear and determine complaints of errors and omissions in the Voters' List of the Municipality of Georgetown for 1924. Dated Sept. 30, 1924. F. L. HEATH, Clerk.

E. F. BOWMAN, O. L. S. R.A.S., A.M.E.L.O. Land Surveying and Engineering 10 DOUGLAS ST. GUELPH Successor to the late D. A. Niven, O.L.S. Telephone 1064

Whom could you sell today? —by Long Distance There have been startling changes in selling methods in the last two years. New ways of finding new customers, of getting at every possible buyer, are being devised every week. Obstacles are being brushed aside. Present day business, to secure results, turns to Long Distance as its first aid. We are now handling considerably over one million Long Distance calls a month for people who must have an answer immediately. They realize that the average letter costs as much as the average Long Distance message. Whom could you sell today? Whom Distance?

BY MOTOR AND PACK HORSE THROUGH CLOUD WONDERLAND

For the man or woman in search of healthful recreation, rest for jaded nerves, and a thoroughly enjoyable holiday, the world offers nothing more entrancing than a holiday in Jasper National Park, Canada's wonderland of scenery, where mountain, crag and torrent vie with one another in claiming the attention and where scenic nature is at her best. Towering peaks rise to the north, south, east and west; mirrored in the beauty of placid lakes whose shores provide shelter for the myriad wild life for which the largest of all Canada's National Parks is famous.

Every Government Sale Province is a Bootleggers' Paradise

LIQUOR once sold cannot be controlled. The evil lies in the liquor, not in the method of its sale, nor in the form of the package. This is proven in every Canadian province where government sale, in varying forms, has been tried. With easier access to intoxicating liquor, drinking has increased correspondingly. More drunkenness and crime associated with drunkenness have naturally followed. Bootlegging—instead of being CURED by so-called government "control"—is flourishing to a degree that makes Ontario's illicit sale seem small and insignificant by comparison.

British Columbia and the Bootleggers The Vancouver World, a newspaper friendly to the government, has declared in an editorial: "British Columbia is the bootleggers' paradise."

Quebec under Government Sale Eclipses Open Bar Evil Quebec, with its longer experience in government sale, has drifted still further back toward the evil days of the open bar. In fact, the only difference between the Quebec "tavern" and the old bar-room is that customers sit down at tables to drink, rather than stand up as a bar.

Ontario Has Higher Hopes Ontario citizens do NOT want THIS province to become "a bootleggers' paradise." They do not want their government to go into partnership with the distillers and brewers, splitting the booze business "fifty-fifty" with bootleggers—which is the best any government has been able to do under "government sale."

Manitoba Sick of "Control" in Less Than a Year Eleven months after Manitoba adopted its government control system, an open-minded investigator of conditions in that province, sums up the situation in these words: "I leave Manitoba impressed with the evidence that both wets and dries are dissatisfied with the government control system—the wets because there is no legal sale of beer by the glass and because there is some delay and trouble in getting licensed stuff, and the dries BECAUSE BOOTLEGGING AND DRUNKENNESS HAVE GREATLY INCREASED."

The Ontario Plebiscite Committee 2 Toronto Street, Toronto G. B. Nicholson, Chairman For the Honour of Old Ontario mark Your Ballot thus: 1. Show your favour to the open bar. 2. Show your favour to the sale of liquor by the glass and by the bottle.

You Can Stand on this Wash Board Our SMP Pearl Ware Wash Board is so strong, tough and durable that a full-grown man or woman can stand on it without doing the rubbing surface or any part of it the least harm! The enameled surface won't chip, flake or peel off. Think of the wear there is in such a wash board! There is the same wearing qualities in all articles in SMP Pearl Ware. Try out the wash board and be convinced. Ask for SMP Pearl Ware SHEET METAL PRODUCTS CO. GEORGETOWN

RIDDING HENS OF LICE

The Vest Poultrymen Now Favor Using Sodium Fluoride

It is Very Effective—The Dipping and Dipping Methods—Other Means Suggested—Hardy Alfalfa in Ontario.

In the control of poultry lice one remedy has come very much to the front during the past seven years. It is sodium fluoride, a chemical that is easy to obtain, easy to apply, effective and safe in its application. Sodium fluoride is very effective. Sodium fluoride may be obtained in one white powder form or as fine crystals. The powder form, if guaranteed 90 to 98 per cent. pure, is the most desirable form to apply as a dust. Sodium fluoride retains its efficiency, and may be kept if used in closed tight bottles or cans and used when wanted. Upon application, if thorough, will destroy all lice on the birds and remain effective long enough to get many of the parasites that hatch later. There are three methods of application in common use; all are effective, but the "dipping method" is the most commonly practiced in small flocks. It consists of the application of the sodium fluoride powder directly to the skin and feathers of the bird, the operator taking up what he can hold between the thumb and forefinger and applying on breast, each thigh, each side of back, on the neck, head, under-arms of each wing, below the vent. It takes ten pinches of the chemical to cover the bird by this method and skilled operators can handle sixty birds an hour.

The Dipping Method The dipping method of applying sodium fluoride is by mixing with a filter material, such as flour, talc, or plaster, to make four times the bulk of the insecticide, and then applying with shaker or blower duster to the ruffled feathers of the bird. Greater speed in treating the birds is secured at a greater expenditure of chemical.

The Dipping Plan The dipping method of applying sodium fluoride can be practiced during the summer and early autumn season when there is ample warmth and sunlight to dry wet birds. The bath is prepared in a wooden tub and consists of one ounce of commercial sodium fluoride to a gallon of warm water. Sufficient quantity should be mixed to handle the work at hand. Five gallons of the solution will do for 100 birds. The birds to be treated are placed in the dip for about ten seconds and just before removal the head is soaked and the bird taken out and allowed to drain. The dip should be kept hot for about 100° and the work done on a quiet, bright day, when it is warm enough to dry the birds quickly.

Other Means Suggested. There are a number of other methods that have proved to be highly efficient, among which the carbolic acid, gasoline and plaster of paris mixture in common into general use. This dusting powder is prepared by mixing three parts granule, one part carbolic acid, and one part plaster of paris in enough water to make a thick paste. It is applied as a dusting powder with a shaker or by hand. A medicated dust wallow beneath the shade in the poultry yard or within the shelter of the building is a great aid in keeping the louse population down. A box partly filled with the road dust to which tobacco dust has been added at the rate of one to six, is very useful and relieves the old hen of many an itch.—L. Stevenson, Dept. of Extension, O. A. C., Guelph.

Hardy Alfalfa in Ontario. A large number of tests have been conducted in past years on the experimental plots at the Ontario Agricultural College with different varieties and strains of alfalfa. It was discovered more than a decade ago that the Common alfalfa from the Central Western States would not live long in Ontario. Variegated alfalfas, such as the Grimm and the Ontario Variegated, however, proved hardy in this Province. These two varieties are now increasing substantially as the farmers appreciate their superiority over the Common, violet flowered variety.

In one experiment at the College alfalfa has been cut for hay three times a year for eleven successive years without re-seeding. The first cutting this year, therefore, is the thirty-fourth crop obtained from the one seeding. The average yield of hay per acre per annum from the eleven years of this test was slightly over four tons.

In another experiment of thirty-four plots seeded in the spring of 1922, the highest yield of hay from the first cutting of this year was of the Variegated type.

The Common alfalfa has variegated flowers of different densities and the Variegated alfalfa has violet, green, blue and yellow of various blends which can be seen when the blossoms are fully opened. Several carloads of seed of high quality of Variegated alfalfa have been produced and sold for seed purposes in each of the past two or three years in Peel County alone. Also in a number of other counties seed of the Variegated type of alfalfa is being produced.—Dept. of Extension, O. A. C., Guelph.

It is not lack of time, but indifference which leaves farm machinery broken and rusty throughout winter. A pig that doesn't make a hog of himself isn't profitable.
