### Facts About Optometry

By Dr. C. C. Floyd, Optometrist Georgetown. Phone 276  
**NO. 4 OF THE SERIES**  
Physical fitness is impossible with any appreciable error of vision. Efficiency is curtailed in those whose sight is below par. And we repeat, in countless cases these defects are possessed by individuals who are not aware of the fact.  
This indicates the necessity for Optometrists acquainting the public with the full scope of their profession, and the advisability of many persons who have never done so presenting themselves to the Optometrist for a consideration of their cases.  
(To be continued next Wednesday)

Do they answer your questions?  
The young people in their letters from school, seldom tell you what you really want to know.  
But how different when you call them by Long Distance! Jack says he is all over his cold. Mary is no longer homesick and is perfectly happy.  
The load is lifted from your mind. And how the absent ones do enjoy hearing the familiar voice!  
No matter how gloomy the winter with the young people by Long Distance will always bring sunshine into their day as well as yours.  
Look up in your Telephone Book the lower part of Station to Station calls after 8:30 p.m.

**SELF-OILING — SELF-REGULATING**  
With the Strongest Tower Built  
It's the "Toronto" Self-Oiling Windmill—requiring "oil" only once a year. All gears operate in a bath of special oil affected by neither heat nor cold—every bearing and working part thoroughly and automatically lubricated.  
If you have a "Toronto" Windmill now, you can obtain this self-oiling feature by interchanging the head and using your present wheel. Most Toronto Windmills, too, can be made absolutely self-regulating in operation. The "Toronto" Tower will stand for a lifetime because it is the heaviest, strongest and best-braced one built for any windmill. See this new Mill now—or get my booklet.
