

OLD TIMES

There are no days like the good old days—when we were youthful! When human kind were pure of mind, And speech and deeds were truthful! Before a love for sordid gold became man's ruling passion, And before each dame and maid became a slave to the tyrant fashion! There are no girls like the good old girls—Against the world I stake 'em, As buxom and smart and clean of heart, As the Lord knew how to make 'em! They were rich in spirit and common sense—They could bake and brew, and had taught school, too, And they made such likely court-iers!

There are no boys like the good old boys, When we were boys together: When the grass was sweet to the brown bare feet, That dimpled the laughing heath-er, When the peewee sang to the summer dawns, Of the bee in the hillowy clover, Or down by the mill the whip-poor-will Echoed his night song over.

There is no love like the good old love—The love that mother gave us, We are old, old men, yet we pine again For that precious grace God gave us! So we dream and dream of the good old times, And our hearts grow tenderer, fooder, As those dear old dreams bring soothing gleams Of heaven away off yonder.

—Eugene Field.

Fatally Burned Attending Furnace

The result of severe burns, sustained when her clothing caught fire while attending a furnace Saturday afternoon, Mrs. William Potter, aged 50 years, died in St. Joseph's Hospital a few hours after she had been found in the basement of her home at 14 George Street. Mrs. Potter was alone in the house at the time, and it is supposed that she was putting some paper in the furnace when the resulting flames set fire to her clothing, which was completely burned from her body. Her screams attracted the attention of a small boy who was playing outside the house, and the young lad raised the alarm—Georgetown Mercury.

Boots of all kinds—Just in a large stock of children's boots, nothing over \$1. Also hockey boots and rubbers. Repairing for every body. The lowest prices in Ontario. J. Ronny. 21p

Barrie Town Council has passed a Transient Traders' By-law fixing the license fee at \$150. Georgetown should follow suit in justice to our local merchants.

Just 12 more shopping days till Xmas. You can save money by making your Xmas purchases here. Our prices are the lowest in town. Our stock is all new and of the very latest design. A small deposit will secure any gift till Xmas day. Come in and look around—Play it's the Gift Shop.

Chicken bandits visited the poultry yards on the farms of Messrs. Pyle Somerville and Gilbert Creemore, Nassagaweya, on Sunday night and stole their entire flocks. They came in a motor car, and indications point to the certainty that there were four thieves in the gang.

ANIMAL SUPPORT COST

What It Takes to Carry Sheep, Swine and Cattle

The Value of the Manure Must Be Credited—Cost of Milk and Butter—Fast Production—Salt and Water for Sheep.

(Contributed by Ontario Department of Agriculture, Toronto.)

Maintenance of sheep.

Investigational work with sheep, conducted by the Department of Animal Husbandry at the Ontario Agricultural College, gave for cost of maintenance of the farm flock the following figures: Winter ewe lambs, \$4.49 each; winter breeding ewes, \$5.50 each.

Investigational work in fattening lambs was continued, and the results showed for last year that it would have paid better to market the lambs in the autumn than to finish them in the pens, the lambs all showing a loss when strict account of feed was kept.

Maintenance of swine.

In investigational work with swine it was found that in wintering brood sows on a narrow nutritive ratio produced largely from concentrated feeds, the cost was fifteen cents per day for mature sows, whereas with groups using more roughage the cost was reduced to eight and nine cents per day.

An extensive experiment with commercial hog feeds versus home-grown feeds showed that under average farm conditions some of the commercial hog feeds used was as economical as a well-balanced mixture produced on the farm.

Maintenance of Beef Cattle.

Cost investigations conducted with beef cattle gave the following interesting figures: The average cost of feeding, breeding beef cows in the College herd was 15.9 cents per day. The cost of labor per cow per day was 2 cents. The value of the manure per cow per day was 4 cents, and deducting the value of manure, was \$69.35. The average weight of beef calves born during the year 1922 was 77.23 pounds.

Cost of Maintenance of Heifer Sires.

In the cost of maintenance investigations conducted with the herd sires, the following figures were obtained: For the Shorthorn herd sire, \$129.60 per year was required; for the Hereford, \$107.18; for the Angus, \$107.82; and for the Jersey, \$86.26. The bulls were of different ages and of different weights, no breed comparison can be drawn. The figures indicate that it really costs something to maintain a herd sire, and that the man who maintains such an animal for the use of various cow owners is entitled to a larger fee than he usually demands.

Cost of Maintenance of Dairy Cattle.

The cost of maintenance for dry cows and heifers was shown to be \$5.60 per month. Some work was also done in an attempt to discover a satisfactory method of handling real calves from dairy cows. The results show that dairy calves for sale should be marketed at the earliest possible age at which the market will accept them. It was also found that to make satisfactory real white milk was necessary.

Cost of Milk and Butter Fat Production.

In investigational work with dairy cattle conducted at the Ontario Agricultural College to show the comparative economy of milk production and butterfat production with the different breeds, it was found that the Holsteins produced milk at twenty-three cents less per hundredweight than did the Ayrshires, but in producing a pound of butter-fat there was only .03 cent difference. It was found that there was very little difference in the cost of production of Ayrshires and Holsteins, and that on milk production it cost more with Jerseys, but they (the Jerseys) produced butter-fat a little cheaper than did the other two breeds—Dept. of Extension, O. A. College, Guelph.

Salt and Water for Sheep.

During the winter, when the snow is available, and especially where a liberal supply of roots is being fed, the flock will not suffer a great deal if water is not given, says the Department of Animal Husbandry, Ontario Agricultural College. At the same time sheep will drink more or less water if it is to be had, and during the summer while on grass, an abundant supply of clean, fresh water should be at hand. Especially during the long hot days of summer the sheep will drink freely, and the health and comfort of the flock demands that it be available.

Salt should be before the flock at all times during the year. A box or trough set up in the pen during the winter, or in the field while on pasture, in which there is always a supply, will assure the owner that his flock is always well provided with salt.

Storing Potatoes.

If potatoes are grown only for home use the crop is usually stored in the cellars of the house, or in the barns. Occasionally potatoes are stored in pits. When the crop is grown commercially, however, it is generally placed in a potato storage cellar erected for the purpose. In all cases it is important to store only well sorted, sound, clean, dry potatoes and to keep them constantly in a dry, cool, dark and well ventilated place. The temperature usually recommended for the best results is from 38 degrees F. to 45 degrees F.

In the Matter of the Estate of Eliza Rebecca Mills late of the Township of Esquimaux in the County of Halton, Ontario, deceased.

Notice is hereby given pursuant to the Revised Statutes of Ontario, Chapter 181 Section 56, that all persons having claims against the estate of the said Eliza Rebecca Mills who died on or about the 10th day of July 1924 in the Township of Esquimaux are required to send by post or deliver to the undersigned, solicitor, the nature of the security if any held by them, all duly verified by statutory declaration. After the said date the Executor will proceed to distribute the assets of the said deceased among the parties entitled thereto, having regard only to the claims of which he shall then have notice, and he shall not be liable for the assets or any part thereof to any person of whose claim notice shall not have been received by him at the time of such distribution.

Dated at Georgetown the 26th day of November 1924.

H. G. MARR, Georgetown
Solicitor for the Executor.
