#### GROWING THE WALNUT

A Tree That Is Desirable Both for Nut and Wood

fouthwestern Ontarlo Can Grow Them-The Walnut Tree Described -Plant Hardy Genfred or Budded Stock-Best Varieties for Ontario. Contributed by Unterlo Department of Agriculture, Toronto.)

Ontarto grown, soft shell walnuts of excellent quality have been produced in the Niagara Peninsula. A lew trees have given good crops for thirty years or more. The number of producing trees that we know of now is 165, and these are located in ed. We promise you that it a district arty miles long and twenty uilles wide, an odd tree here an there in the dooryard or the orchard of well kept premises, Trees are fruiting as far east as Clarkson on the north shore of Lake Ontario. Bouthwestern Ontario Can Grow Nuts.

> The Niagafa Peninsula and the countles bordering Lake Erle have a climate more favorable to production of the soft shell walnut than certain districts in Europe where nuts are grown to take care of the local marof deep, rich will in the district north of Lake Erie cast to the Niagara river and west to the Detroit river that will grow acceptable soft shell walnuts, and Japanese Heart Nuts. Why not keep the \$5,000,000 at home? There is satisfaction in saving money, and there is more satisfaction in sitting before the home fireplace on winter evenings cracking the fruit of our own labor. In about 100 Ontario rural homes this is being don now. The flickering wood fire is pleasant in itself, but a plentiful supply of walnuts at hand, easy to crack and sweet to eat, will help one to

enjoy life. Thousands of rural homes can have walnuts, providing of course that the home is located in the Lake Erie countles, or in a district where the climate will permit the full development of the peach. The Walnut Tree Described.

The walnut tree, when dormant will stand heavy frosts in midwinter, but it will not stand late spring or early autumn frosts. Areas reasonably free from frost during the period April 20th to October 10th alone should be considered. The soft shell walnut grows to be a very large tree. is of the deep, tap-rooted type, hence the soil must be deep enough and rich enough to support a big tree. A good surface soil of clay loam or sandy loam that is undertain by a deep. porous, sandy sub-sell in which the water table is below fifteen feet, a soil that is rich, cool and moist, but not wet, will produce the finest specimens of walnut trees. However, the sandy, gravelly and clay loans, and succeeding in proportion as these soil

plant food and moisture. Use Hardy Grafted or Budded Stock To be successful the walnut tree must be a vigoraus grower, of a varlety that blossoms moderately late, a self-pollinator, and it must yield an abundant annual crop of destrable nuts. These factors are best obtained by planting hardy grafted or budded stock. The native black walnut bus the hardy and vigorous characteristics, it is most desirable as a root system for a soft shell English walnut. Get your start by growing seedting black walnuts up to a size suit- Main St. North able to graft. Three-eighths of an inch in size dues very well, then whip graft a scion obtained from a hardy soft shell tree, making an entirely new top. The black walnuts for seedes can be planted in the autumn or spring. If kept until spring lay away in cold, moist sand. Plant the reed with the pointed end up, two

inches deep in good garden soil. Keep the soil well raked and free from weeds. The little trees will be large enough for grafting at the end of the second season, or when growth is starting the following spring. The grafting of the walnut offers more difficulties than apple grafting, requiring greater care. The following conditions are essential to success; fully dormant wood for scions, the brought into exact contact, the work must be done as the leaf buds of the tree to be grafted on are unfolding, a condition that varies with individual trees. The cleft, in the stock or amputation and the shaping of the scion should be such as to give a perfect lit. The exposed surface of the stock and scion must be held and protected by tape and wax, the entire scion should be waxed over, the scion

pith cavity. Both seedling and grafted trees usually bear at eight years. Best Varieties for Ontario. The Japanese Walnut or Heart Nut will stand lower temperature than he Soft Shell English Walnut. It. too, is of good quality and easy to crack. A tree plunted twelve years

ago at Scotland, Ontario, gave two Best D. L & W. Scranton, bushels of free from the busk outs last year. Some of the older English soft shells in the Niagara Peninbushels of nuts in a single season. A few soft shell walnut trees will add value, beauty and usefulness to any farmstead -- L. Stevenson, Department of Extension, O. A. C., Guelph.

If a little flour paste, say a pint to each pailful, is added to the whitewash used on the inside of the poultry house it will stick better and look well longer, adding half an conce of carbolic seld to selepation will aler hold inaget entite 4 in class.

How Many Objects in This Picture Start With the Letter "P"?

The above picture contains a number of objects beginning with the letter "F". Just take a good look at the picture—there are all sorts of things that begin with the letter "P"-"puppy", "pumpkin". "paddle". "purse", etc. Nothing is hidden; you don't have to turn the picture upside down. Make -family join in- see who can find the most. Don't miss any. Pifty each prize, will be awarded for the fifty best lists of words submitted. The answer having the largest and nearest correct list of visible objects shown in the picture starting with the letter "P" will be awarded first prize; second hest, second prize, etc.

Young and Old Join in the Fun The Mail and Empire announces to-day

another puzzle game in which all can participate-from the tiniest child to granifather and grandmother. No object is so small but that the poorest eyesight can see it. It is a test of skill. Your shilly to find "P" words determines the prize you win. Right after supper this evening, gather all the members of your family together: give each of them a penell and sheet of paper-and see who can find the most "P-Words". You will be surprised to find how large a list of words you can get with a few minutes' study. Sit down NOW and try it-Then, send in your list and try for the blg prices.

Observe These Rule's

1. Any man, weman or child who lives in Canada. 1. Any man, we man or child who lives in Canada, and is not a realdent of Toronto, and who is not in the employ of The Mail and Empire, or a member of an employe's family, may submit an answer.

Z. All answers must be mailed by February 7th, 1925, and addressed to C. A. Monigomery, Putale Manager, Mail and Empire.

3. All lists of names should be written on one side of the paper only, and numbered consecutively I. Z. atc. Write your full name add address in the upper civil hand corner. If you desire to write any per right hand corner. If you desire to write any-thing else, use a separate abert.

4. (inly such words as appear in the English life-tionary will be counted. Do not use obsolele words. Where the plural is used, the singular cannot be counted, and vice terms.

5. Words of the same spelling can be used only unce, even though used to designate different objects ar acticies, or parts of objects or articles. An object or article can be named only once.

2. Do not use hyphenated or compound words, or complete words, where each word in itself is an

7. The answer having the largest and nearest cor-rect list of names of visible objects and articles shown in the picture that begin with the letter "h" will be awarded Flest Prize, etc. Neathern, siple or hundwriting have no bearing upon deciding the wina. Any number of people may co-operate in answer-ing the Puddle, but only one prize will be awarded in any one household; nor will prizes be awarded to mure than one of any group where two or more bare been working together.

9. In the event of a tie for any prize offered, the full amount of such prize will be awarded to each

tied participant.

10. huberriptions (both new and renewal), payable

10. huberriptions (both new and renewal), payable \$6.00 per year delivered by currier bey in Hamilton will be accepted. However, in qualifying for the \$1,000 Banus Rewards, at least one new subscription 11. A new subscriber is anyone who has not been receiving The Mail and Empire since January 18th.

12. All answers will receive the same consideration regardless of whether or not a subscription to The Mail and Empire is sent in.

13. All new subscriptions will be carefully retified by the Puzzie Manager. Candidates marking old subscriptions as new will positively forfelt the credit of outh subscriptions as qualifying for the Maximum Hours Hewards.

14. Three prominent Toronto eitisens, having no connection with The Mult and Empire, will be perfected to act as judges to decide the winners, and participants by sending in their lists agree to accept the decision of the judges as final and conclusive.

15. The judges will meet on February 18th, and amouncement of the Frise Winners and correct list of words will be published in The Mail and Empire as quickly thereafter as possible. Bonus Henneds,

Winning Answers will receive the fifty cash price according to the table below Prise if No Prise if One Prise if Two \$35 372nd Prize. 1,000 1,000 O 6th Prize 8 7th Prize 9th Prize 10th Prize 11th Prize 212th Prize 13th to 20th Prizes inclusive 121st to 50th Prizes inclusive

#### YOU CAN WIN \$1,000 There Are Three \$1,000 Prizes

erense the popularity of The Mail and Empire. It costs noth ing to take part and you do not have to send in a single suberipition to win a prize If you list of "P-Words" is awarded PHEST, SECOND OR THIRLY Prize by the judges you will win \$25; but if you would like to get more than \$35 we make the following special offer whereby you can win bigger cash prizes by sending in take or TWO subscriptions to The HERE'S HOW: If your unever to the "P-Word"

Postis wins PHOST, SECOND OR THIRD Prize, and you at \$5.00 to must in Canada, or \$6.00 delivered by carrier boy in familion, you will receive \$500, instead of \$25; fourth prize. 1250: fifth jutte, \$150, and so forth, they second column of figures in prize that b Or, if your answer wins FIRST, SECOND or THIRD Frize, and you have sent in two yearly anheariptions to The Mail and Empire tone new and one cheened or two new subscriptions), you will receive \$1,000 in place of \$35; fourth prize, \$300; fifth prize, \$300, and so forth. (See third column of figures in price flat.) How is that for a liberal offer? Hot, LOOK, there are three \$1,000 prizes. Therefore, if you stand FHINT, NECOND or THIRD, and have sent in two yearly subscriptions at \$5.00 s. pear each by mail or \$6.00 delivered by carrier boy in Hamil-

ton (one nen and one renewal or two new), you will win \$1,000. It takes but two yearly subscriptions at \$5.00 u year each (one new and one renewal or (we new) to qualify for the big \$1,000 rewards. Absolutely, that is the maximum. You can do this with little effort. Your own subscription can count. We can also take subscriptions to start at any future date. Just mark on your EXTRA LARGE PICTURE PUZZLE SENT FREE ON order when you want the paper to single and we will not com-Subscription Rates -- Payable in advance. #### THE INTERNAL PARASITE

causes About hity Per Cent. of All Poultry Discase

How They Weaken the System-The Lye Treatment is Best-Tapeworm Troubles-direct Feed for Poultry -The Farm Water Supply.

Contributed by Unterto Department of

Agriculture, Toronto.) Internal parasites are responsible either directly or indirectly for fifty per cent of the poultry losses. This means that millions of dollars are last each year through the preschee of these indestable creatures.

How Parasites Weaken the System. Frequently autopales of healthy blids rivent the presence of a considerable number of intestigal worms which have apparently, up to the time, not caused the bird any great physical harm. In many cases, however, birds become thin, emaciated and finally die. Heavily infested birds are much more susceptible to other diseases, as fowl cholers, tubreulosis, and roop. Practically all the nematodes infesting poultry have no intermediate host. Eggs passed with the droppings develop quickly if the soil of the poultry yard and the weather are favorable into the larvel stage. The infective larvae are picked up by the same or other birds of the flock, and finally develop within the intestinal tract, into mature worms. The cycle goes on, more worms, more eggs, more worms, unless the poultry owner wakes up and decides to destroy the parasites that take his profits. The destruction of the parasite is easy.

the Lac Treatment Is Best. A teaspoonful of concentrated lye mixed with each four quarts of grain, and cooked slowly for two hours and allowed to cool. The birds are given their ordinary feed one morning, and then nothing else until the next morning, when they are given as much of the ive mixture as they will cat. See that the water pan is filled. This treatment should be given twice during the summer. A four-week interval between treatments is essential. then removal of the birls to clean

rons. How to Deal With Tapeworms.

Cestodes or theeworm lafesting fowl differ from the nematodes or round worms in that they require an intermediate host to carry on their life cycle. It has been demonstrated that the valous species of analls, slugs, worms and flies that may be found about poultry plants are intermediate hosts of the tapeworms that infest chickens. These white, ribbon like, segmented worms can be successfully combatted with the lye treatment as given for round worms Sanitary precautions and rational treatment of the soil in the poultry runs is very essential in keeping tapeworm under control. Concentrated lye is cheep and effective. Why permit your poultry to continue as a convenient host to profit reducing parasites. The chickens cannot get rid of their termentors unless you help them .- L. Stevenson, Director of Extension, O. A. C., Guelph,

GREEN FEED FOR POULTRY.

The Best Hatches Are Generally Due to the Vitamines In Grass, Cab-

bage, Sprouted Oats, Etc. The old-time poultry man knew that it was necessary for the breeding birds to get outdoors during the hatching egg production season, If the results were to be really favorable. Why the outdoor life made the difference he did not know, but we have learned since that the outdoor life had little to do with the hatchability of the eggs. The success was due to what the hen ate while free outdoors. Green grass and clover, cabbage, lettuce, kale, sprouted oats carry the fat soluble Vitamine D. which is essential for fertility andhatchability of the egg and the utilization in the body of phosphates of lime, so essential in bones. The fat soluble Vitamine A is also present in all green feeds, and to a lesser extent in turnips, mangels, and rutabagas. The use of green feed in some form is absolutely essential if the hatchability of the egg and the igor of the chick is to reach a high standard. Many poor hatches in late winter and early spring are due to the breeding stock not receiving the vitamine carrying green feeds. Sprout outs and let them grow four inches high before feeding. Stock the feed storage cellar or pits with turnips, mangels and cabbage, and let the breeding stock have all such green feed as they care to consume .- L. Stevenson, Director of Extension. O. A. C., Guelph.

The Farm Water Supply. There are two main sources, namey, well and spring (both hard water) and rain water (soft). Any one thinking of installing a motern water system and plumbing in his home should make sure that his water supply is both pientiful and safely proected from all possible sources of contamination. Much more water will he used daily under modern than under old conditions of servicethorn 30 gallons per person per day. Ask the O. A. College to assist you in solving the following problems in this matter of water supply. So says Piof. R. R. Graham: 1. How to increase the well and

pring supplies of water. 2. How to safeguard these suppiles from surface contamination. 3. How to make more use of the ain water supply. 4. How to get that fine apring

water running through your house and stables by installing the hydranlie ram meet the spring.
