FACTS ABOUT TEA SERIES-No. 3

Mountain-Grown Teas Best

The tea plant grows best in the pure cool atmosphere of a mountain tea garden. The higher the garden, the finer and more delicious the flavour of the tea. This is partly due to the clear sunshine on a high mountain side, partly to the more invigorating air, partly to the more frequent rainfall and perfect drainage. The largest and roughest leaf grown at an elevation of 7000 feet is much superior in flavour to the tiniest tip grown only 2000 feet above sealevel. All teas used in the "SALADA" blends are grown from 4000 feet to 7,500 feet elevation. The trademark "SALADA" is a guarantee of quality.
