DADDY'S SWEETHEART

She came to its pure as the dew of A bud with the promise of beaute

ous bloom A little child blossom, life's garden

all gloom In fancy I still hear her hanny voice telling

I'm "my daddy's sxeetheart," with love in each tone; Enraptured the look on her bala

face dwelling. As foully the gazed in the eyes like her own. Though sadly we miss her; just

over the portal She wears a flower chaplet, th child's diadem And fair seraphs welcome to heav

en's immortal

The resebud that faded on life' . broken stem.

BORROWED WOES

Some of us never seem to learn To take our troubles as they come To meet each worry in its turn, We look ahead and borrow some Just when the rose is ruddiest We grieve because it will not stay. Our hands upon the thorns are

We make to morrow of to day. We trade the gold of one day's jo For dross of doubt and discontent The fine gold we dull with alloy Of baser metals, meanly blent. And yet to morrow never shows A dawn so dark or noon so gray As drawn by one whose borrowed

Have made to-morrow of to-day.

### Low Cost Trip to Pacific Coast

A captivating four-week tour of Western Canada and the Pacific Coast, with a tour through the United States on the return journey, is being planned for Canadan teachers and their friends this

Those who take advantage of this trip will see the greatest scenery on the continent-the Buffalo herd at Wainwright : Jas per National Park, with its unsur passed mountain scenery; Mount Robson, the highest peak in the Canadian Rockies; the totem poles of Kitwanga and the mystic boauty of the Skeens River.

At Prince Rupert the party transfers from train to boat for the glorious water trip of 750 miles through the sheltered Scenic Seas of the North Pacific Coast to Vancouver, Victoria and Seattle.

On the return trip five wonder ful days will be spent touring Yellowstone National Park by motor, ship. with a trip to Salt Lake City and three days at Rocky Mountain Na tional Park, Colorado. Then its Denver, Clear Creek Canyon, Ida ho Springs and Lookout Mountain before heading for Chicago and

The tour leaves Toronto July 9, and you cannot afford to miss it Full information, fares, etc., can be secured with illustrated booklet from A. E. Bryson, 44 Silverthorn Ave., Toronto, Martin Kerr, 4 Beulah Ave., Hamilton, or any Cansdian National Railways Agent. 2t

#### Here and There

Southern Alberta is to have another addition to its growing list of titled ranchers, according to report The Due de Nemours, a descendant Hor innocent laughter dispelling of Louis Phillips of France, it is stated, is sailing in April to visit Lord and Lady Rodney, who have a runch at Fort Saskatchewan, and, later, to acquire a homestead near the establishment of the Prince of Wales. .

> The Nova Scotia Technical College assays under direction of the Dominion Council of Scientific Lesearch indicate Nova Scotia oil shales to be the richest in the world, giving fifty gallons of high-grade paraffin to a ton of shale. One hundred million tons of the shale are readily accessible, and vist oil industries similar to those of Colorado and the Western States might well come into being in this pro-

"I find general business conditions quiet but improving throughout Canada and undoubtedly the. increase in the price of farm products will prove very encouraging to the west," said Grant Hall, vicepresident of the Canadian Pacific Railway, on his return from a recent tour of the Dominion. "Lurge orders for hardware shipped over our lines of late to the west indicate that the crop money is now beginning to circulate more readily, which in its turn is a mark of the. farmer's confidence in the country."

There was a general increase in all phases of the lumbering industry in Canada during 1923, LB compared with the previous year, according to the latest report of the Dominion Bureau of Statistics. The average value of the output in that year amounted to \$139,894,677, as compared with \$114,324,580 in 1922, an increase of 22.4 per cent. In this respect the lumbering industry comes third on the list of manufacturing industries in Canada, with the pulp and paper industry first and the flour and grist mills second.

Passengers aboard the Canadian Pacific steamship "Empress of France," now touring the world, had a unique experience recently while visiting Ceylon. Returning from a run out to Kandy, the old capital of the Cingalese Kings and Site of the Temple of the Tooth of Buddha, a train-load of the travellers was held up by a herd of wild elephants which, hemmed in on either side by the jungle, ambulated along the truck ahead. This was a feature of the journey which delighted those of the tourists who were not anxious about missing the

Viola Dana, the famous motion picture actress, whose work has delighted millions, is to be the star of a drama to be filmed at Banff, according to a recent report. Miss Dana journeyed from New York to Montreal and then across the continent via Canadian Pacific Railway, in order to join her company for the film. The remainder of the cast are proceeding to Banff from Los Angeles and it is expected that shooting of the scenes will ommonce shortly. A very considcrable number of big pictures have already been taken at Banff, which cems to have a great attraction for His wait g stars and directors who eclate the beauty of the scen-

#### FACTS ABOUT TEA SERIES-No. 4

The Two Types of Tea

There are two distinct types of tea, namely Black Tea and Green Tea. Both are made from the same bush and both are equally pure. The difference is in the process of manufacture which gives each a different flavour. Black Tea after it is plucked is withered and partially 'fired' or dried, then allowed to oxidize by being exposed to the air. This gives Black Tea its dark reddish colour when drawn. Green tea is immediately steamed after plucking, which prevents oxidization. There are delicious blends of "SALADA" in both of these types and also a unique blend of Black and Green Tea Mixed.' All are sold in four qualities.

## GROW MORE ALFALFA

IT BUILDS UP THE SOIL AND MAINTAINS FERTILITY.

Erndicates the Worst of Weeds and Furnishes Great Abundance of Rich Hay For the Live Stock. (Contributed by Ontario Department of

In a survey covering an investigation on 500 farms, those that were growing alfalfa showed an average net profit of \$1,200 per farm against \$728 per farm profit for those that The foods we sell please your were not growing alfalfa. This difference of hearly \$500 in profit was due to the affaita and farm practice that goes with it. .

Use Hardy Strains. Ontario Varlegated and the Grimm varieties are more winter proof than the common or southern frown. These alone should be used in Ontarlo. The seed may cost a little mure, but when everything is at stake against King Winter, the additional cost of good seed is your instrance for a return in erop. Hardy varieties last longer, and when once established and given rational treatment, remain vigorous and profitable for Pure Cocon, & lb. can ........

Alfalfa's Greatest Need Is Lime. Alfalfa is a time hungry plant; of Pettits Pure Clover Honey cannot succeed where lime does not exist in abundance. Each ton of hay produced requires approximately 100 pounds of line. So the attempted growing of alfalfa on soils that are your or lacking to lime, is time, money and labor thrown away. Cora ton per acre every five years. With per acre over a period of five years a ton of time will be removed from the soil. So you see the need of returning lime to the medium in which the plant grows.

How to Apply Lime. Apply time to the surface of ploughed land. Do not plough it under; work it in with the harrow. Lime may be spread over the surface of the land by using a lime distributor, the manure spreader, or shovelling from the waggon box by hand. Automn is the best time, after the fail ploughing has been done. Vigorous Growth Follows Inoculation. Areas on which alfalfa has not been grown ... should ... be ... treated through the application of 200 pounds of bacteria carrying soil per acre. Soll obtained from successful fields fulfils this regulrement. Seed may be inoculated to accomplish the same result. This is generally the easlest way, unless soll is clese at hand, The Bacteriology Department at the O. A. C., Gnelph, will supply for 50 cents sufficient culture to treat bushel of seed, the requirement for

Select reasonably rich soll and prepare it well. Do not waste time on vorn out land weless'you realize the recessity of applying time and masure to feed the crop to a point of decrous establishment. Land that has both good surface and under drainage is best. Avoid heavy, flat areas, with hardpan or tight clay subsoils. Alfalfa is a deep-rooted plant and must have root room. Prepare for the seedleg by working up a fine surface on a firm seed bed. Autumn ploughing worked down in the spring with cultivator, harrow, and corrugated raller will give the desired condition providing that the

weather is right for work on the land. Use Plenty of Seed. On land in good condition and adapted to alfalfa growing 15 pounds of good Canadian grown Ontario variegated seed is sufficient. Timothy may be mixed with the alfalfa seed as an agent of security to hold the blue grass in check until the alfalfa is well established. Its presence ensures a hay crop should the alfalfa winter kill the first year. It is a From BUSINESS EXPERIENCED good practice to use three or four pounds of alfalfa seed in the general hay mixture over the Jarm. Such a practice will bring the entire farm into condition for successful alfalfa

growing without very much effort or Alfalfa needs a protective covering over winter. Eight Inches or more of grawth to hold the snow is provided by the alfalfa plant in its September growth. Those that cut or graze alfalfa after September 15th kill all chances of future profits from affalfa growing. Two good crops taken at the right time should satisfy, then give the plant a chance to recover for winter.

Early cutting weakens the plant, late cutting giver a coarse, poorer quality hay. Cut when the crop has nearly reached the full bloom condition. Cut but twice a year, leaving the third growth for winter protection .-- L. Stevenson, Director of Extension, O. A. College.

Rotation of Crops. It is highly important that the soil given a rest, oats following oats. orn following corn is not good farming, it is soil mining. If the soil is rich the evil day will be delayed, but the time will surely come when those who do not give the soil chance must pay the price and suffer in reduced crops, plant diseases, insect injury, and weeds. . No one rotation is the best under

il conditions, but to all accepted rotations, certain principles can applied, so that each particular farm can be fitted with a definite plan sulted to its peculiarities. Give the matter of crop rotation some conof the Ontario Agricultural College will be glad to help you with any farm problem .-- t. Stevenson, Dept.
