TO EVERY DADDY

There are little eyes upon you, an they're watching night and day There are little cars that quickly take in every word you say; There are little hands all eager to Everything you do, And a little boy that's dreaming

the day he'll be like you. You're the little fellow's idel, you'r the wisest of the wise: In his little mind, about you, no picions ever rise; He believes in you devoutly, thate all you say and do He will say and do in your way when

he's grown up just like you. There's 'a wide-eyed little fellow wi believes you're always right, And his cars are always open and watches day and night. Yop are setting an example every day in all you do For the little boy who's waiting t grow up to be like you.

FAITH Ye that have faith to look with daunt-

Upon the travedy of a world at shall rise The dawn of ampler life, Rejoice, whatever anguish rend the

That God hath given you a priceless dower-To live in these great times have a part In Freedom's crowning hour;

That ye may tell your sons who se High in the heavens (their her tage to take): "I saw the powers of durkness to flight,

I saw the morning break." -Poem found on the body of an un known Australian soldier in the World War.

COUNTRY LIFE

By those who live in cities and seas. even by many who live in small towns, life in the country is supposed very much appreciated, and I guess to be insufferably dull. That is mainly because they do not know and have been kindly received by the home partly because they have been so so-phisticated and spoiled that their idea -as they say, "something doing all of an enormous subsidy), we shall re-

A cheerful soul who keeps a country store lately wrote to a city paper tember. to let citizens of the metropolis of Ontario know that life even in the country was not entirely devoid of in-terest or incident. He has a friend Exhibition Attraction in the city, who is a wholesale merchant and a reputed millionaire (who year-old Southern school girl, will be still speaks to him when he goes to picked up from a fast motor boat by the city), who goes down to business a speeding plane at the Canadian in the forenoon and back home in the National Exhibition. She will later evening, who gets only two meals a drop from the plane by parachute inday, for whom he doesn't seem to to the lake, and will perform such

Local Improvement Notice

Take Notice That-1. The Council of the Corporation of he Town of George'own intends to construct as a local improvement a concrete sidewalk on Union Street from sidewalk already laid down on Union Street to King Street and from the corner of Un ion and King south-westerly to the side walk already laid down on Queen Street, Main St. North and intends to specially assess a part of the cost upon the land abutting directly onthe work, , .

2. The estimated cost of the work on Union Street is \$560,00 and on King St. \$253,00 of which \$108,40 and \$18.00 re spertive are to be paid by the Corpora-tion. The estimated rate per foot frontage is \$1.20 and \$1.80 respectively. The special assessment is to be paid in twenty annual installments. 3. A petition against the work will not avail to prevent its construction.

F. L. HEATH, Clerk Dated at Georgetown, this 12th day of

BUTTER READY FOR FAIR

POINTS TO BE REMEMBERED BY THOSE WHO WOULD WIN.

low to Control the Green Cabbage Worm-Dusting Is the Most Satisfactory Treatment-Precautions in the Use of Parts Green.

Contributed by Ontarlo Department of

Agri ultura, Toronta.) What about the Butter Exhibits at the local Autumn fair? Did you win or lese the last time when competing with the people of your own township? To win as a buttermaker you must produce and exhibit a quality of butter that will measure up to the tollowing score:

Flavor 45 Testure----- 15 Incorporation of moisture .. 10 Color 10 Saft 10 Pucking 10

A lot of the butter exhibited at the rural fairs is made from cream insumerently cooled and churned at too high a temperature. This practice gives a weak-bodied pale butter that may also be streaky. If the weather is worm, get some ice and good the cream, also the wash water. Butter made from well-cooked cream and washed with fre-water will be area enough to stand sufficient working to give an even distribution of -alt, a good color and firm texture. If color is needed, be careful not to 'add . drop too much. Churn the "Exhibit" two or three days before the fair. This will give time to set and blending of Bavor and salt. The packages should be as next as porable. Always wrap prints in a char, good quality, butter wrapper. See that the prints are well made, clean cut and firm. Most judges want a butter churned from a cream that is sweet or of low acidity. Good dator in butter comes from cream

50H, O. A. C., Guelph.

Cantrol experiments, involving the freatment in three series of 5,000 early and late cabbages, with Pyrothrum powder and lead and calcium arsenate dusts and sprays, lead to the conviction that under lecal conditions dusting with lead arsenate and hydrated or air-slaked time in the proportion of one part to fifteen parts is the most satisfactory form of treatment. The dusts were found more satisfactory than the sprays in that they can be mixed and amplied with the aid of ordinary hand dusters, in one-fourth the time occupied In spraying. They spread and adhere well if applied when the baves are wet with dew, whereas aprays to which seap has been added as a sticker have a low surface tension and much of the liquid is lost in the soil, says the Department of Horticul-

ture, O. A. Callege, In this experiments calcium arenale dusts gave has satisfactory ules than the arsenate of lead dust, a latter giving pertect control. Calan aramate applied in the liquid rm gave extremely poor results as cell as crosing some burning to the diage. Pyrothrum powder used I h four times its weight of hydratd lime proved satisfactory, but can ardly be used on a commercial scale it cost; ten times as much as the s mate of lend duet.

Judging by this season's observtions early market cabbages escape cricus lajury and whether treatment ordinarily nevessary or not must he left to the grower's discretion. for late cabbages and enulidowers we applications should be sufficient in a normal season, the first about the middle of July and the second four or five weeks later. When the Gummer Bldg. butterflies are very abundant a third application may be necessary early in September.

Precautions In the Vse of Paris If a deable quantity of good, freshly slaked lime or nydrated lime for mixed with the Paris green and then the misture made into a paste with water and allowed to stand in dituting and spraying, the lime will combine with the greater part of the free arsenious oxide and remove its leaf scorching property to a great ex-ten. So says Prof. H. Fulmer, O.A.C.

Blinerals. Mineral supprements are of value when there is a deliclency of such minerals in the feed. The usual dedelent elements are calcium, todas and phosphorous. It is wasteful to feed a mineral mixture containing elements that are abundant in the feeds used. Try and bad out what the shortage is, and then pay our your good each for it atone. Many mineral mixtures offered contain z. variety of unneressary and in some

instances expensive ingredents. There are entirely too many stale eggs sold. How towar a mach the consumer that are actuarly to the The tault is not with the hea. She produces a treelt egg, but too many peopte do not seem to Ivanz . that an egg is one thing that was ten improve with age, otherwise they would

ot hold eggs any longer than neces-"Great thoughts bation any labor. To-day I carned 75 cents heaving manure out of a pen, and made a good bargain of it. If the decirer muses the while how he may live dyrightly, the ditching spade and turf knife may be engraved on the coat-of-arms of his posterity."-Thoreau.
