# A World-wide System Of Financial Service

By telephone you can talk with your neighbour or with an individual thousands of miles away. By telegraph you can span the continent; by cable your message can girdle the earth.

- In like manner you can use the service of the Bank of Montreal in little or large measure as the occasion demands.
- You can transact business of a purely local nature or enter into financial dealings with people in any part of the world:
- Like the telephone, telegraph or cable, our system of financial service is as extensive as are the needs of our customers.
