Pror t.

The central region of the Canadian National Railways will shortly put into operation a new type of Deisel electric passenger-carrying cur oper uted by electricity developed by a generator installed within the body

On a preliminary trial-trip made recently, one car travelled from Montreal to Toronto in approximately b hours and 30 minutes, actual running time. No difficulty was experienced, and the engine was not stopped once between those two points. On a side trip from Port Hope to Lakefield, the same day, the car han died a coach as a trailer, and a was able to negotiate very heavy grades

at a moderate speed,

Oppointments of Armenian Farm. Aunouncement hus been made of the appointment of Rev. Andrew Lane of the Drumbo and Prince ton United Church, to the post of Superintendent of the new train ing farm for Armenhan boys' at Georgetown, the appointment to be effective at the end of this mon tb. Wilfred Williamson, a wellknown farmer of the Princeton district, will accompany Mr. Dane and will take over the daties of practical instructor. Rev. Mr. Cane has been pastor of the Drum bo and Princeton circuit for the past five years. Mr. Williamson is a war veteran and a graduate of the Ontario Agricultural College

The Prince of Wales' Ranch at High River, Alberta, contributed the highest priced bull at a recent fall sale in Calgary, Princeton Crumader, which fetched \$285.

Canadian wheat exports for the welve months ending September 30th, 192 , amounted to 225,747,861 bushels, valued at \$259,445,816, while for the twelve months ending September, 192., they were 160,637, 898 bushels, valued at \$194,577,126, according to a report of the Dominion Bureau of Statistics.

Exports of bacon from Canada to Great Britain increased almost 3 .-000,000 pounds during the first nine months of the current calendar year. For this period, during 1921, there were 70,988,000 pounds of Canadian Dacon shipped to the British market, while this year the corresponding figure rose to 73,-934,000 pounds.

The value of the asbestos exports of Canada for the 12 months ended August, 1923, according to the Dominion Bureau of Statistics, exceeded the value of those of the previ-ous year by nearly \$3,000,000. These exports for the last year amounted to 202,646 tons, valued at \$8,376,-249, compared with 122,785 tons, valued at \$5,604,661 in 1922.

The first consignment of 1,000 pounds of British Columbia Douglas . fir seeds has been shipped to the British Forestry Commission, London, by the Dominion Forestry Branch, from its plant at New Westminster, British Columbia. The seeds were extracted from the cones

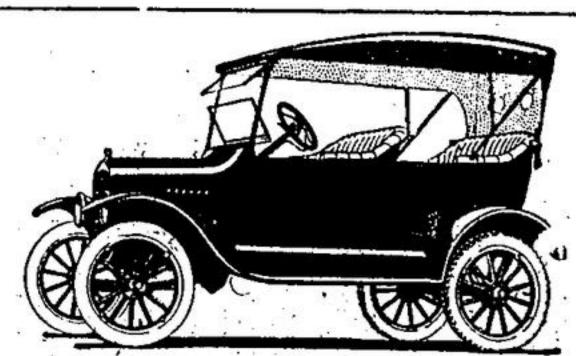

The year 192, will see a new record in Alberta coal production. It is expected the total production for the year will reach 7,000,000 tons, in comparison with less than 6,000, 000 last year. The production up to November 1st is 1,500,000 tons greater than the production for the, same period last year. The record production previously was in 1920, when 6,400,000 tons were produced. The pay-roll this year is expected Bring Us Your Job Printing to exceed \$18,000,000.

## THE FARMER'S HOME MARKET

Low Tariff Politicians belittle its importance. Are they right? What are the Facts?

ROBABLY no part of the business of farming is less understood and less appreciated than the value of the home market to the average Canadian farmer of to-day.

value at any price.

fectly belanced range,

First and foremost, given a Government that is sympathetic with you, the home market is one that you can absolutely control, at all times, at least against the foreign farmer who would invade it. On the other hand, the foreign market is one that you may be legislated out of at any moment by the vote of a foreign government that has decided that it wants to give its own farmers an advantage over you!

wext, the market that is best worth cultivating is always the merket that absorbs the largest part of your production. The fellow who year after year buys more than half your crop is worth more to you than the fellow who only buys 25% of it. That's fundamental! There's no getting away from it!

From the figures below we prove absolutely that the home market absorbs at the very least 631/2% of the produce-not of the Ontario farmer-but of the average Caradian farmer, including the wheat farmer of the West. If we were to leave the

Western wheat farmer out of it, it could be proved that over 80% of what the Ontario farmer produces is consumed by this home market.

The reason some people have an exaggerated idea of the importance of the export market for farm produce is that they have looked at it solely from the standpoint of wheat! It is true that we export in one form or another about 75 per cent of our entire wheat crop. But the wheat crop, important and all as it is, represents only about one-fourth of our total annual agricultural production, and it is only when we take into account what becomes of the other three-fourths that we can arrive at a true estimate of the value of the home market to the average Canadian farmer!

Here is our calculation. Check up our figures from the Canada Year Book, the official statistical publication issued by the Government. Subject our deductions to the most searching investigation and you will find that if we have erred at all, we have under-estimated, rather than over-estimated the importance of the farmer's home market.

### TOTAL EXPORTS, FISCAL YEAR 1924, OF

Agricultural and Vegetable Products. including fresh dried and preserved fruits, grains, flour and milled products, bakery products and prepared foods, vegetable oils, tobacco, fresh and prepared vegetables, maple syrup, maple sugar and miscellancous, but excluding rubber, sugar (other than maple), molesses and confectionery as products not of Canadian agricultural origin; also excluding alcoholic beverages whose export value is out of all relation to the value of the agricultural products used in their production.

Animals and Animal Products.

including live animals, hides and skins, leather, fresh meats, cured and canned meats, milk and its products, oils, fats, greases, eggs, honey and miscellaneous, but excluding fish oils, seal and whale oils, and furs other than black and silver fox skins, as products not of

Fibres, Textiles and Textile Products. including all wool and woolens, also flax, jute and hemp products, but excluding binder twine, manufacturers of cotton and silk, manu-

facturers of mixed textiles, and certain kinds of wearing apparel, as products not of Canadian agricultural origin. Grand total exports, all kinds of farm produce - - -

Now the gross agricultural revenue of Canada for crop year 1923 is given as \$1,342,132,000. Deducting the grand total exports, as above of \$489,094,124, leaves a balance of \$853,037,876 to represent what

must have been consumed by the home market. In other words, the export market took only 361/2% of our farm production. The balance, 631,67, was consumed in Canadal

TWO THIRDS OF WHAT THE CANADIAN FARMER RAISES, HE SELLS IN CANADA

Export Prices that Fail to Govern Home Prices.

In attempts to belittle the home market, the argument has been used over and over again that the prices obtainable in the export market always govern the prices obtainable in the domestic market.

Statements of that kind constitute one of the meanest forms of dishonesty. It is probably true that, in the absence of an effective wheat pool, the Liverpool price pretty nearly fixes the domestic price of wheat. But the Liverpool price of hay, or of potatoes, is almost negligible in its effect upon the local prices obtainable for those commodities in Canada. And the reason for the difference is that wheat, besides being a commodity that can be stored indefinitely, has been provided with terminal facilities that enable it to be handled at a minimum of expense, and is carried at the lowest of all freight rates. whereas transportation costs on hay and potatoes substantially protect the producer against surpluses only a hundred miles away!

Hay and Potatoes for Instance.

In 1923, for instance, farmers in Norfolk County received an average of only 811/3 cents a bushel for their potatoes, while farmers in Welland County, less

than fifty miles away, received \$1.00 for theirs. In that some year farmers in Perth County received an average of only \$9.28 a ton for their hay, while farmers in the adjoining County of Middlesex received \$11.05 for theirs. Discount these illustrations as much as

you like on the ground that differences of quality had something to do with the differences in price, yet do they not serve to shake your faith in the man who would have you believe that Liverpool prices always govern domestic prices? Did Thunder Bay farmers, for instance, get \$19.64 for their hay in 1923 because it was of such superior quality, or did they get it because of the high cost of bringing \$8.98 hay from Huron County, or \$10.11 hay from Lambton Ccunty? If Liverpool prices governed hay in the way and for the same reasons that they do wheat, Ontario farmers would have to pay shippers a premium to take their hay away!

What's Sauce for the Goose is Sauce for the Gander.

Belittlers of the home market assert that a tariff on farm products is of no benefit to our farmers. Is the United States tariff on farm products of no benefit to United States farmers? Is it no detriment to Canadian farmers? If a foreign tariff is a detriment to Canadian farmers, why should not a Canadian tariff be a detriment to foreign farmers and consequently a benefit to our own?

\$394,407,246

91,939,305

What a New Industry, in your Market Town, Means to You!

It increases the prosperity of the town, gives work to the unemployed, adds to the population, gets the empty houses rented and starts the building of new ones. The town immediately has more money to spend on the butter and eggs, the vegetables, fruit, milk and grain your farm

The foreign market is admittedly an important market, but after all what does it consist of? Isn't it made up entirely of town and city dwellerswage-earners who cannot obtain from their own farmers as much food as they require so they must buy from you? Is the city dweller an asset to the Canadian farmer only when he happens to dwell in a foreign city? If we persuaded him, by the offer of a better job than he now has, to come and live in Canada, would he not be a bigger asset to

Those who scoff at the home market would encourage those dwellers in a foreign city to stay where they are, thus leaving our farmers in the position where they must take a chance on shipping their products long distances, and then selling them in competition with other producers from all over the world! Isn't the plan of those who would build up the home market a vastly better

our farmer than he is at present?

A higher tariff will give more workers good jobs in this country. Canadian workmen with good jobs are the best customers the the Canadian farmer will sper kape.

#### DIPPING FOR THE TICK

SHEEP NEED PROTECTION FROM TRIS ANNOYING PARASETE.

flow to Use the Dip-A Home-made Dip - Poultry Parasites - Freatment for Hot Fle Larvae-Mineral

(Contributed by Ontario Department of

Agricultury, Toronto.) Before the flock enter winter quarters to the fall they should all receive a thorough dipping. A bright, warm day in October should be chosen and the dipping done the morning so the wool will have time to dry before night. It is safe to say that fall dipping of the flock should never be neglected. Even in those flocks that are supposed to be clean it will pay. In case any sheep are to be added to the fleck they should always by dipped before bying taken in with those that are already clean, so says the Department of Animal Husbandry, tr A. C. The Way to Use the Dip.

There are several different brands of sheep dip on the market, may one of which will give satisfactory results provided directions are carefully followed. The water to be used for dipping should be warmed and the mixture should be stirred frequently to prevent the heavier dip settling to the bottom. The sheep should remain in the dip for approximately two minutes to allow the wool and skin to

become thoroughly saturated, Unless the flock is a very large one it will not be necessary to build an expensive dipping tank. A large trough or barrel might answer if nothing else is at hand. However, a very satisfactory tank may be built ordinary tongued and grooved may be used and have the inside Busines matched lumber. Ordinary lumber 1 Home-made Dip.

Kerosene entuision, a simple remedy easily prepared at home, is Prepared as follows:

2 pints of Coal Oil 1 plat of milk.

Mix thoroughly in an old dash churn -dllute to use by adding eight gallons of soft water to each gallon of concentrated emulsion. If milk is not available, then use laundry soap. as follows: One half-pound of laundry soap in gallon of hot soft water. then add two gallons Coal Oil (white hot), churn up well and then dilute to use by adding eight gallons of soft

water to each gallon of concentrated Dip the superp after shearing and repeat in two weeks to ... the pupue.

-Dept. of Extension, O.A.t., ut. Poultry Parasites. A long winter generally means a weakened vitality to all animals, and anything that can be done to remove obstacles and supply the essentials should be done. One of the great obstacled to successful poultry husbandry is the invasion of intestinal

paraultes. These creatures flourish within the birds winter or summer, taking their toll unseen and irrespective of weather conditions. They are worse than potato beetles, which are honest enough to do their mischtef in plain view, and work just eight hours a day for but six weeks of the year. The intestinal parasites infesting poultry have a union code of their own-"24 hours per day and 365 days per year, get all you can, why worry about the poultry-keeper's pronts." At the O.A.C. the Intestinal parasites infesting the poultry flocks were banished for good and forever eighteen months ago. How was it done?

The Method .- A gallon of a mix: ture of wheat and oats, to which is added a small teaspoonful of concentrated lye, is cooked slowly for two hours and allowed to cool. The birds are given their ordinary feed one morning and then nothing else until the next morning, when they are given as much of the lye mixture as they will eat, with plenty of water. This is done two or three times during the season at intervals of one

The large, round worm infesting poultry(may be as short as one inch. and the cocum worm only threetenths of an inch, and one of tape worms only one-aftieth of an inch long. Very easy to overlook .- L Stevenson, O.A.C., Guelph.

Treatment for Bot Fly Larvae. Heavy infestations may cause in digestion. Give the horse a chance; help him to be comfortable by removing the too numerous bot fly larvae from his stomach.

Fast the horse twenty-four hours and give three capsules of carbon bisulphide, to be given one at a time, at three hour intervals. The larvae generally pass from the stomach in June; go into the soil for six weeks and then re-appear to start

their devillsh work over again .-Dept. of Extension, O.A.C. Guelph. Mineral Mixture

The following mineral mixture is used in the swine feeding at the Ontario Agricultural College, It is giving good satisfaction:--4 bushels Charcoal or Hardwood

6 puttnds Sait. quarts Air Slaked Lime. 1 pound Sulphur. 10 pounds of Bone Meal This preparation is kept in a suit able box in each pen where i may be taken by the swine at will.

The Calves. Keep plenty of pure water before the calves and nice bright hay or

pasture grass. It is surprising bow much water they will drink, New Hockey Rules Some of the new rules recently ad-

opted by the Canadian Amateur Hockey Association have given rise to a good deal of discussion, especially that which prohibits bodychecking by forwards. The rules underwent a somewhat drastic revision at the meeting of the Rules Committee during the annual convention of the Amateur Athletic Union of Canada, To-. routo. Chief among the changes are the elimination of bodychecking in centre ice and the reduction of the number of substitutes from three to two. Another change is the removal; of the defense line from twenty feet : 0----from the goal line to a point forty feet from the end of the rink. Goal keepers, who have been rather too severely handicapped by the rules, s also are allowed wider privileges. The rule prohibiting bodychecking on the -forward line will apply to defense players making a rush once they have crossed the defense line forty feet from the end of the rink. Players and officials will require to study the new rules this fall, so many and sweeping are the changes in the cod-

-The pedestrian's lot wouldn't be so hard if he could watch cars and ankles at the same time.

## The Right Way to Boil Potatoes

Put the potatoes in an SMP Enameled Potato Pot. Cover with water. Add sait to taste. Boll until soft. When finished, drain off all the boiling water through the strainer spout. No danger of steam scalding the hands because the handle securely locks the cover on. If your family uses potatoes, you require one of these.
