## Here and There

Major General Sir [illegible] Vice-chairman of the Imperial War Graves Commission, who has been visiting in Canada during October, has been recalled to England much earlier than he expected. Prior to sailing on the Canadian Pacific liner, Montcalm, from Montreal, he expressed the hope that he would be able to come to Canada again next spring so that he could give Canadians in the West some idea of what the Imperial Commission is doing in caring for the graves of western youths who perished during the war.

Robert L. Rice, Jr., of Boston, and J. Y. Cole, of Harvard, took big chances when they attempted to travel by canoe from Rouyn to Angliers at the end of October. Although they started in beautiful Indian summer weather they ran within a few hours into a bad storm which filled their canoe with half melted snow and almost froze them into unconsciousness. Fortunately they arrived in the nick of time at a fire-ranger's hut where they stayed a few days until the storm abated. They were prospecting in the neighborhood and were none the worse for their perilous trip when they finally reached Montreal.

Bob Shawkey, New York Yankee veteran pitcher, who organized the party of major league baseball players now hunting big game in New Brunswick, shot a moose with antlers spreading 56 inches and having 28 points, according to word received at Fredericton, N.B. Shawkey shot his moose the first day the party spent in the woods. This information is conveyed by another party of hunters who passed the camp of the ball players at Nepisiqui Lakes. In the group are some of the best known players in the American League, Eddie Collins, Babe Ruth and Muddy Ruel being among them.

[illegible] movement [illegible] year to [illegible] Last year or two has been the outstanding feature of the province's industries. Recently the [illegible] Co-operative Creameries [illegible] shipment of 25,000 lbs. of butter to China.

The export of gold bullion, gold coin, and fine gold bars from Canada, except as deemed advisable by the Minister of Finance, and as licensed by him, is prohibited until July 1, 1926, by proclamation issued in the current issue of the Canada Gazette.

Breaking all 1924 passenger traffic records, the Canadian Pacific S.S. "Metagama" westbound from Glasgow via Belfast, docked recently at Quebec, and Montreal the same evening, with a record number of 382 cabin and 2,078 third class passengers.

"There are hundreds of first class farm workers in Scotland anxious to come to Canada, and the finest material Canada could ask for, but their wages are not sufficient to barely support them and they are unable to accumulate funds for the passage." This is the opinion of Thomas Scotland, of the Canadian Pacific Railway Colonization and Development office in Glasgow, who recently arrived in Canada with a party of Scotch immigrants bound for the western provinces.

To J. K. L. Ross, director of the Canadian Pacific Railway, goes the honor of catching the world's record fish with rod and reel. At St. Ann's Bay, N.S., he landed a tuna weighing 712 pounds, length, 9 feet 2 inches; girth, 6 feet. Commander Ross used a Vom Hofe tuna rod and reel, No. 39 thread line, with mackerel for bait. His catch took three and a quarter hours to land.

## Here and There

Protection of migratory birds has been added to the duties of the Canadian Pacific Railway's constabulary.

Airplanes attached to the Ontario Forestry Department are now equipped with radio sending apparatus so that they can keep in constant touch with the city and other rangers.

There was an increase of sixty-three per cent in the number of immigrants to Canada during the last three month as compared with the same month period of last year.

Canadian Pacific agents in Britain recruited nearly five thousand men for work in the harvest fields of Western Canada and, through lack of steamship accommodation closed their doors on as many more who, attracted by the special harvest rate, sought to enter Canada.

The branch lines program of the Canadian Pacific Railway carried out this year will bring into operation on the prairies a larger mileage than any one year since 1911. Of the 431 miles of line under construction, 281 miles will be ready for handling grain in the Fall, and of the balance, 115 miles will be ready for steel by the winter freeze up.

A building has been acquired by the University of Toronto to be entirely devoted to the manufacture of insulin. This will be the only factory in Canada to manufacture the curative fluid in commercial quantities and, although it is manufactured in the United States, Great Britain and Denmark, the Canadian product will be sold throughout the world.

Dawson City recently celebrated the twenty-seventh anniversary of the discovery of the Klondyke. In an exhibition of Yukon products cabbages 16 inches in diameter and weighing thirty pounds, potatoes as big as a man's head, pumpkins as big as watermelons, wheat, oats and barley bore witness to the fertility of the Yukon soil. Side by side with these ranged gold nuggets, gold dust and silver bars.

## Running Water!

**When and Where You Want It**

On any farm of average size at least one hour a day—36½ ten hour working days a year—are spent in the irksome, wearying task of pumping water. 36½ days which one of my Toronto Windmills will give you for profitable work, rest or recreation—besides supplying running water wherever you want it.

The one bothersome task, that of oiling the windmill in all kinds of weather, is overcome in the Toronto Self-Oiler, which requires fresh oil only "once a year." Friction and wear are practically abolished. Toronto windmills, too, can be made absolutely self-regulating in operation.

The "Toronto" Tower will stand for a lifetime because it is the heaviest, strongest and best-braced one built for any windmill.

Let me explain why I believe this is one of the biggest conveniences you can have.
