Any person in Ontario who grows field crops may apply for any one of the experiments for 1926. Each applicant should make a second choice as the material for the first choice might be exhausted before the application is received.

Spring Pruning. The question, "How late can the apple, peach and pear trees be pruned in the spring?" is often asked.

Wounds made on large branches sometimes cause considerable sap when made in the middle of the growing season, so if pruning is done after growth starts more care should be exercised in painting over the cut surfaces.
