EXTERMINATE THE FLY

The summer of 1925 was high holted day for those pests, the fly. After all of years of struggle, the flies won a victory which we hope was just a temporary one. It would seem wise on the part of veryone who plants potatoes to make thorough examination of the stock before planting. If people plant discased potatoes they are committing a crime, because they are propagating disease in the district which may markets and by many who sell di nect from the farm, it will pay the grower to put on his specs and careully look over the offering before ordering shipment.-I.
