

It Costs Less to Own a Better McLaughlin-Buick

Gasoline, lubrication, water and fair treatment are all the Better McLaughlin-Buick needs to deliver its mileage at astonishingly low cost.

The Valve-in-Head Engine, as McLaughlin-Buick builds it, develops more power from a given quantity of gasoline. McLaughlin-Buick Automatic Heat-Control, an integral part of the McLaughlin-Buick carburetor, still further aids fuel economy by super-efficient carburetion.

In no other car, regardless of price, will you find the completeness of protection for performance afforded by the McLaughlin-Buick "Sealed Chassis" and "Triple-Sealed Engine". Dirt cannot get in, anywhere, to cause wear, looseness and vibration.

To know what motor car economy really is, for finer transportation at lower cost, own a Better McLaughlin-Buick.

The new low GMAC financing rates are available to purchasers of McLaughlin-Buick on time.

The Better McLaughlin-Buick leads in registration all cars in its price range.

Save The Forests! Everyone Loses If They Burn!

Indifference, ignorance and carelessness are the malvolent forces which result in forest fires and only a thorough education of the public to the great need of forest preservation can eradicate these evils. Until the general public understands the full significance of the loss occasioned through forest fires unnecessary destruction of thousands of acres of fine timber will continue. The menace to the financial health of Canada through forest fires has not been fully appreciated by the vast majority of the people. And Canadians, especially should be vitally concerned in the welfare of their forests.

The various phases of the lumber industry in Canada represent an invested capital of approximately five hundred million dollars. The associated industries give employment to thousands of men the year through. Further, out of every five dollars the lumber industries pay back to the country more than four dollars for the wood, the labor and the taxes involved in the enterprises.

In the province of Ontario alone, about 20,000 men are employed in the bush while 10,000 are employed in pulp and paper mills. The capital invested in these industries in Ontario is estimated at about \$175,000,000. The organizations employed by the Ontario provincial government for forest fire protection cost \$3,000 a day. Yet with all this forest fire consume twelve times the amount of lumber which is the life of these huge Canadian industries. In the province of Quebec the value of the lumber cut, including pulpwood, exceeds \$40,000,000 annually.

In co-operation with the Associated Advertising Clubs of the World, the Montreal Publicity Association has given generous leadership in drawing public attention to the meaning of Forest Conservation Week, which is held annually in the United States and Canada from April 19 to 25. Scores of public bodies all over North America have joined in the effort to stimulate public interest in the forests and means for their preservation.

When a forest burns everybody loses. The destruction of a wooded area means just as much to us as a natural heritage for the generations to come. During Forest week the object is to impress this important fact on the public.

The Canadian Pacific Railway has been doing all in its power to prevent fires by maintaining fire fighting apparatus of the most up-to-date pattern. In order to eliminate the possibility of fires being started by passing trains, locomotives on the Canadian Pacific Railway lines are examined at the end of each trip and great care is taken to see that all parts and front ends are in perfect condition. Each spring the right of way is cleared with care of all scrap and inflammable material.

Notices dealing with fire prevention and protection, issued by the C.P.R., the Dominion and provincial governments and by various fire prevention organizations are posted in all stations and other buildings where they will be effective.

The mechanical equipment maintained by the Company for fire fighting consists of a number of tank car units and hose, kept ready for immediate operation at convenient points. Each unit consists of two tank cars each of 7,000 gallon capacity, equipped with powerful pumps and about one mile of hose.

The fire-fighting forces maintained by the Canadian Pacific Railway co-operate to the fullest extent with the provincial forces and the other fire-prevention organizations, and do everything possible to assist in the fighting of fires which are at all adjacent to their territories.

Longer Life

A STAR FEATURE

Rugged Steel Frame with Five Cross Members Sturdy Engine Construction Thorough Lubrication!**

You can't judge a car by its first cost alone. The cost of an automobile is its price divided into its years of service and added to its maintenance expense.

Figured on this—or on any other basis—the NEW STAR Car is the best investment you can make. The NEW STAR Car will give you better service, for a longer time, at a lower cost—because the NEW STAR Car is built for endurance.

Buy a car with a Future. Let us give you demonstration of the NEW STAR Four or Six.

Here and There

J. Janowski and E. Staschauer, the former Polish immigration delegate and the latter a delegate from the Polish Minister of Agriculture, are in Canada for a six-week study of farming conditions in western sections of the Dominion. They will also look into the viticulture work among the Polish colonies in Canada.

Four fishermen from the United States went fishing on the Chateaux River, New Brunswick, for 15 days recently and caught 340 fish. State Senator Bradford of Indiana, caught a 43-inch salmon weighing 27 pounds. Others in the party were: Fred N. Peet, Dr. E. R. Zimmerman and D. H. Faxon. Only barbless hooks were used so that no fish were either killed or injured.

The second largest outdoor swimming pool in Canada has been opened at Lake Louise on the Terrace between the dining room of the Chateaux and the Lake. The new pool is 100 feet long and 40 feet wide. It is surrounded by tall concrete columns between which there are gigantic sheets of plate glass, providing a wind break against cool breezes.

Approximately 120,000 live fish, fresh from American hatcheries, passed through Dominion Express Yards, Windsor Station, Montreal, recently, on their way to Beauport, Quebec. They will be used to stock private lakes in northern Quebec owned by wealthy citizens of the U.S.A., who refer to the virgin hills and forests of Canada to the densely populated summer resorts of their own country.

Norman E. Wilkinson, London, England, inventor of camouflage, paintings which were used extensively during the late war, arrived in Canada on the Canadian Pacific liner "Montcalm" with his wife recently, for a tour of the Dominion. Sir Clifford Sifton, prominent Torontoian, and Sir Stephen Truett, M.I.M.E., famous mineral geologist, also arrived on the same vessel.

Col. C. H. D. Ryder, C.B., C.I.E., D.S.O., chairman of the Air Survey Company of London, England, interviewed Premier Mackenzie King and the prime ministers of the various provinces with regard to finding out the prospects of surveying practically the whole of the Dominion by air. He also wishes to know about the possibility of combined federal and provincial action for these surveys.

On his return from a recent tour of inspection of the Company's Western Lines, Grant Hall, Vice-President of the Canadian Pacific Railway, stated that exports to the Orient in the form of grain, flour, dressed slates and motor cars were steadily increasing in volume and that trade with Australia had been considerably stimulated by the trade arrangements with that Dominion. Mr. Hall added that conditions were good in the West. The mining industry in British Columbia showed up well, while lumber shipments were heavier than last year.

All roads led to Windsor Station, Montreal, for three days prior to the opening of the tenth annual International Kiwanis convention, which opened on June 6. Not only was the C.P.R. station the gateway through which an army of Kiwanians passed into Montreal, but, every one of the delegates, their wives and friends, about 7,000 in all, congregated there as the station had been constituted the registration headquarters of the convention. A force of 32 stenographers was specially engaged to handle the work.

A present for the bride
on her 30th anniversary
(A suggestion to the bridegroom.)
A second honeymoon!
A trip abroad, for instance—when you have leisure to enjoy it and no worries about the cost.
Give your bride the promise today, in the shape of an engagement policy on your life.
Annual payment each year will enable you to do it and—well! In case you are not here to make the trip with her—
You know she will find the money useful.
Say what day you want the present delivered and the details will be arranged.
