Kitchen Delightfully Cool in the Hottest Weather

WHILE the kitchen of your home is unbearably hot from that wood, coal or coal oil stove the owners of Campbell's Automatic Rapid Electric Fireless Cooker Ranges are cooking in comfort.

You do not realize what this wonderful range means to you, or you would not wait a moment. Just think—you can put a roast in the oven and vegetables in the cooker and not one particle of heat escapes to heat up your home or allow odors to get all through the house.

Does Not Require the Costly Three-Wire System Our latest Range with automatic heat control and large oven is unquestionably the most perfect cooking range on the market to-day: ask Georgetown users.

Cheapest Range in the World to Operate No heat is wasted with a Campbell. On ordinary ranges two-thirds of the heat is lost, simply escapes in the surface cooking which is very wasteful. Cooker retains all mineral salts in vegetables, as these are steam cooked. Recommended by doctors and health authorities.

Order Your Campbell Automatic Electric To-day If you are not delighted after a Thirty-day trial in your home, we will take it off your hands and refund your money without quibble or question.
