DEMONSTRATION Campbell Electric Range McGIBBON BLOCK, Georgetown Saturday, July 17th afternoon and evening WHILE the kitchen of your home is unbearably hot from that wood, coal or coal oil stove the owners of Campbell's Automatic Rapid Electric Fireless Cooker Ranges are cooking in comfort. You do not realize what this wonderful range means to you, or you would not wait a moment. Just think - you can put a roast in the oven and vegetables in the cooker and not one particle of heat escapes to heat up your home or allow odors to get all through the house. You do not even have to watch foods cooking, for the Campbell Range is entirely automatic, shutting off the current at the proper time and keeping food hot for hours. Does Not Require the Costly Three-Wire System Our latest Range with automatic heat control and large oven is unquestionably the most perfect cooking range on the market to-day; ask Georgetown users. Cheapest Range in the World to Operate No heat is wasted with a Campbell. On ordinary ranges two-thirds of the heat is lost, simply escapes in the surface cooking which is very wasteful. Cooker retains all mineral salts in vegetables, as these are steam cooked. Recommended by doctors and health authorities. Do Not Fail To See This Demonstration If you are not delighted after a Thirty-day trial in your home, we will take it off your hands and refund your money without quibble or question. We expect to demonstrate this range in Georgetown soon. Particulars later. WILLIAM CAMPBELL CO. Phone 43 Georgetown Ontario
