

THE USUAL WAY.

There was once a little man,
And his rod and line he took,
For he said: "I'll go a-fishing
In the neighboring brook";
And it chanced a little maiden
Was walking out that day,
And they met—in the usual way.

Then he sat him down beside her,
And an hour or two went by,
But still upon the grassy brink
His rod and line did lie;
"I thought," she shyly whispered,
"You'd be fishing all the day!"
And he was—in the usual way.

So he gravely took his rod in hand
And threw the line about,
But the fish perceived distinctly
He was not looking out; and he said:
"Sweetheart, I love you,
But she said she couldn't stay,
But she did—in the usual way.

Then the stars came out above them,
And she gave a little sigh,
As they watched the silver ripples
Like the moments running by;
"We must say good-bye," she whispered,
"By the alders, old and gray,
And they did—in the usual way.

And day by day, beside the stream,
They wandered to and fro;
And day by day the fishes swam
Securely down below;
Till this little story ended,
As such little stories may,
Very much—in the usual way.

And now that they are married,
Do they always bill and coo?
Do they never fret and quarrel
Like other couples do?
Does he cherish her and love her?
Does she honor and obey?
Well they do—in the usual way.
—From "Poems that never die."

PRESERVING AND STORING EGGS

(Experimental Farm Note)
The economical housewife will take advantage of the season of heavy production and consequently low priced eggs to put by a supply of eggs for culinary purposes for use during the season of high prices.

For this purpose there are a number of preservatives that are satisfactory, but the two outstanding ones are "waterglass" and "lime water." Waterglass is an excellent preservative but it owes a great deal of its popularity to the fact that it can be readily procured at any drug store in convenient form.

Lime water is a much cheaper preservative and is more readily carried by the Experimental Farm. It has been shown to be equal, if not superior to waterglass. For a number of years the Experimental Farm at Cap Rouge has been conducting tests in the storing of eggs. Some of the eggs are shipped to the Central Farm each season for examination and it is found that those preserved in lime water bear best.

When eggs are to be held in a commercial way, cold storage is an essential. The guaranteeing process is one that is becoming increasingly popular. For a number of years the Central Farm has been carrying on tests in this process and the results obtained warrant its recommendation to commercial packers.

Literature on the preserving of eggs for domestic purposes or on guaranteeing will be sent on application to the Poultry Division, Central Experimental Farm, Ottawa.

GEORGE ROBERTSON,
Asst. Dom. Poultry Husbandman.

EDITOR IS VITRIOLIC

Throws Very Hot Shot Into Ranks of Delinquent Subscribers.

Walkerton.—Saying has it: "Hell hath no fury like a woman scorned," but how about the editor of The News and Times when some of his delinquent subscribers play unfairly with him?

A man may use the mole on the back of his neck for a collar button; he may ride a freight to save three cents a mile; he may light the lamp with a splinter to save matches; he may stop his watch at night to save wear; use ink and pasture his grandmothers' grave to save hay; but a man of his description is a scholar and a gentleman compared to a man who will take a newspaper and when asked to pay for it puts it back in the Post Office marked "Refused."

Swimming Pool at Chateau Lake Louise Opened

1. Going to sleep. 2. Rotarians at opening of the new pool. Two ladies of the party about to test the inviting depths. 3. Caught between the mountains and the water below, this miss seems to be flying up to the sky, while she is really going down.

The second largest swimming pool in Canada has just been opened at Lake Louise. Situated on the Terrace between the Dining Room and the Lake, this new pool is one hundred feet long and forty feet wide. It receives its water from the Virgin depth of Lake Agassiz, which is located up in the summer snow zone between two mountain peaks, twelve hundred feet above the Chateau. This water is steam heated to 78 degrees.

The new pool is surrounded by tall concrete columns between which there are zigzag sheets of plate glass giving its walls full openness yet providing a wind-break against cool breezes. The top is entirely open to the penetrating rays of the Rocky Mountain sun. Each of the twenty columns around the pool is surmounted with pot growths of the beautiful Rocky Mountain flora which, coupled with the delicate green silks of the plate glass windows and the mountain greenery of the pillars, lends an intriguing attractiveness to the open greenness of the big terraced campus of the Chateau. Interposed here and there with vivid yellow and orange beds of Iceland poppies. A beautiful and unique feature of the pool is the swimming suits, all of which are of a flaming orange color to harmonize with the sloping beds of poppies which run down from the dining room and surround the pool on all sides.

At the deep end of the pool are three diving boards, two of which are three and a half feet high and the centre board ten feet, providing the standard Olympic heights.

Olaf Anderson, famous swimmer and skater, and former life guard instructor at Chicago, has been engaged as the permanent swimming instructor, with an assistant.

A large number of Rotarians attended the first day of the opening of the Chateau Lake Louise pool.

Here and There

The Right Honorable Viscount Keimin Matsudaira, attaché to His Imperial Highness Prince Chichibu, second son of the Emperor of Japan, passed through Canada and left Vancouver for Japan where he will spend his vacation with his family. The Viscount will return through Canada to England in the fall.

Fifty-five young fellows who have been prepared for Canadian farming at the British Ministry of Labor's centre at Brandon, England, arrived in Canada recently on the Canadian Pacific S.S. "Empress of France." They came to this country, accompanied by Lt.-Col. G. A. Britton, under the auspices of the Canadian Government and the C.P.R.

Arrangements have been made to install facilities for supplying both fuel and diesel oil to ocean liners which will dock at the monster new double dock pier "B" and "C" of the Canadian Pacific Railway now nearing completion in Vancouver harbor. It was announced that eight marine elevators would be installed on the pier, the elevators being known as Barlow type on the Pacific coast.

282 Certificates were awarded to successful Sleeping and Dining Car employees of the Canadian Pacific Railway for passing their examinations in the First Aid Instruction classes. The extent to which First Aid instruction in C.P.R. teams is growing is indicated by the fact that the McAdam, N.B. team was recently awarded the Wallace Nesbitt Trophy, in which competition Michigan and Maine also sent contestants.

Definite indications of the largest building year Canada has had in more than a decade are now shown by the record of the first six months of this year. The very large and unusual total of \$194,843,800 worth of new construction for the first half of the current year and completed new work to the value of \$394,698,500 forecasts great activity for the remaining months. During June contracts awarded totalled \$54,188,400, an increase over June, 1925, of 63 per cent.

Net profits of the Canadian Pacific Railway for the month of May at \$2,448,876, compare with \$908,913 in the corresponding month of last year, an increase of \$1,539,962, being the best showing in this respect since 1921. Gross earnings for the month are shown at \$15,452,788, an increase of over three millions, when compared with May of last year, and the highest gross shown by the road for any May since 1920. Working expenses for the month under review are shown higher by 1 1/2 millions.

Two officials whose tenure of office was practically contemporary with the existence of the Canadian Pacific Railway, have recently retired from that company. They are C. J. Flanagan, auditor of freight and telegraph receipts, and J. H. Shearing, auditor of passenger receipts, both were presented with gold watches suitably engraved, while members of their staffs gave to Mr. Flanagan a travelling bag, and to Mr. Shearing a malacca cane with a gold band engraved with an expression of the esteem of his staff.

Mayor Thomas Foster, of Toronto, and Mayor Frederic Martin, of Montreal, took advantage of the newly inaugurated Canadian Pacific trains "The Rideau" and "The York" between their respective cities to exchange letters of greeting. When "The Rideau" pulled out of the station at Toronto on its initial run, the engineer carried a letter from Mayor Foster conveying his greetings to Mayor Martin, who replied the following day in the same manner, but by "The York." Both trains make the run between Toronto and Montreal in eight hours.

Notice to Creditors

In the matter of the Estate of Jessie Kennedy, late of the Township of Rossignol, in the County of Halton, Ontario, deceased.

NOTICE is hereby given that a persons having any claims or demands against the late Jessie Kennedy, who died on or about the eleventh day of April, 1920, at the Town of Weston, in the County of York, and Province of Ontario, are required to send by post, prepaid, of delivery to the undersigned, solicitor hereon for Thomas W. Kennedy, executor and trustee under the will of the said Jessie Kennedy, their names and addresses and full particulars in writing of their claims and statements of the securities, if any, held by them accompanied by a statutory declaration verifying same.

AND take notice that after the twentieth day of July, 1920, the said Thomas W. Kennedy will proceed to distribute the assets of the said deceased among the persons entitled thereto, having regard only to the claims of which he shall then have had notice, and that the said Thomas W. Kennedy will not be liable for the said assets or any part thereof to any person of whose claim he shall not then have received notice.

Dated at Georgetown this third day of July, 1920.

H. G. MEHR, Solicitor for the said Thomas W. Kennedy

Are you building?

Shall you be building this year? If so, profit by the experience of those who save money when building. Even on a small job you'll probably be surprised to find how using Long Distance enables you to get lowest prices.

"We bought all the material for a \$76,000 building by Long Distance—it is the cheapest way"—writes a contractor in a medium-sized town.

"We use Long Distance to get prices on materials before making estimates or contracts"—writes another.

The leaders in every branch of industry know. They've proved it, as you can.
