

GOD WITH US

Oh, light the Christmas candles
And let them shine tonight
Across the span of ages,
Illuminating Heaven's Light.
A Light that brings us peace,
A Glad tidings of good cheer;
A Light forever burning,
One pathway straight and clear.

Oh, light the Christmas candles,
While chanters sweetly sing,
For once more in a manger
Is thrown our new-born King.
With myrrh of deep devotion,
And joy and things of gold,
Come spread a living worship,
Where wise men kneel of old.

Oh, light the Christmas candles
And ring, ye merry bells;
Fling out the cheer and gladness,
Each yuletide message tells:
Forgetting years of darkness,
We walk today in Light.
Come set the shining candles,
Earth sings with Heaven-tonight!
—Anne M. Robinson

Compensation Benefits

Workers in industry under compensation in Ontario enjoy the benefit of very considerable protection. This has been done without unduly burdening employers by spreading the cost of these accidents over the industries in the various classes set up by the Workmen's Compensation Board. It is interesting to note that, of the six Provinces in Canada in which there are Compensation Boards, Ontario, being more important industrially, pays out by far the largest amount each year. In this Province the amount weekly award which can be made is \$25.64 which represents two-thirds of the maximum of \$2,000 per annum on which compensation can be paid under the Ontario Act.

The benefits to injured workers or their dependents in any country in the world are not so liberal as in Ontario. In New York State, for instance, the maximum award possible is \$20, per week or more than 20 per cent less than can be awarded in this Province, although the cost to industry in New York State is not the main higher than in Ontario. This is doubtless due to several factors, one being the efficient administration of the Workmen's Compensation Act by the Ontario Board and another the constant campaign against accidents which is being carried on in large percentage of the plants under compensation here. Costs, however, of five and a half million or six million dollars per annum, as we have had in Ontario for the past several years, must continue to focus the attention of industry on an extension of the accident prevention work being done.

Hunters Killed Pig

Some bright young sportsman at Ingleswood recently took a pot shot at a sassy brood sow on Mr. John Mitchell's farm. There is a large range and plenty of cover on the hills in that locality. Of course the pig died in a day or two and was hauled back to the place where considerable of that farmer's profits seems to go.

Canada's trade balance is now the largest per capita of any country in the world. The favorable trade balance in the Dominion now amounts to \$401,134,405, having been exceeded only once before in 1913, when it was \$662,637,214. Agricultural exports contributing heavily to this favorable balance amounted to \$600,000,000 last year.

Ford Car wins out.

The Proverbial thrill that comes once in a life time came to hundreds of Ford owners at the Western Fair London on Sept. 18th, when they saw a standard Ford romp away from Whippet and Chevrolet competitors in the Special five mile race on Queen's Park track. The Ford finished nearly six hundred yards ahead of the other contestants, making the five mile grid in 7.27. The race was a special feature of the fair program, resulting from a challenge issued by the Whippet representatives to all owners of light cars.

The spectators saw a thrilling race despite the fact that the Ford led the whole way. For the first four miles the contest was exceptionally keen between the Whippet and the Ford but the Chevrolet was easily lapped. The Whippet made good time on the corners, but on the straight the Fordoomed ahead like a racing car.

Lending a Hand to Mother Nature

1. Stel using the small Cut-throat Trout.
2. Over 200 potential cut-throats, measuring the eggs before spawning, are being hatched in the fishery.
3. The position has been very busy.

Unfortunately Mother Nature made no provision for the growing army of leeches waiting in her schemes of things. Man supplements nature in feeding the trout streams of the Canadian Pacific Rockies through the agency of the Department of Marine and Fisheries, which conducts artificial Cut-throat spawning and hatching operations in the Rockies each spring.

Authorities have estimated that only about three percent of all Cut-throat trout eggs naturally approach hatch. The reason given is the desire of fish spawning at other times to feed on the newly laid eggs with the result that the male Cut-throat, after driving off the enemies, fertilize the eggs too late, when they have absorbed so much water that they cannot absorb the fertilizing fluid.

From 87 to 90 percent of eggs artificially spawned at Banff and Spray Lakes hatch under artificial methods. This is how it is done:

Towards the end of March just before spawning time the trout are caught in nets, stripped, and returned to the stream, while the eggs from the female are fertilized by fluid from the male Cut-throat are mixed. In ten weeks the young fry is ready for its new home in the trout stream where it reaches the length of over eight inches in about four years.

The annual spring harvest of Cut-throat eggs at Spray Lakes—each female giving from 800 to 1,400 eggs—is about three-quarters of a million. At present 524,824 Loch Leven trout eggs, 172,918 Lake Superior Salmon Trout, 516,906 Hain-land and 5,600,000 Pike and egg are hatching in the Banff Hatchery. This hatchery for 1928 will also include one million Cut-throat eggs imported from Wisconsin and 250,000 from Spray Lakes, making a total of over eight and a half million eggs hatched in the Canadian Pacific Rockies to provide sport for anglers.

The outstanding example of the good results deriving from lake work began in 1914, is the growing annual catch of Lake Superior Salmon Trout at Lake Minnowanka, about nine miles from the C.P.R. Banff Springs Hotel, while Spray Lakes, an easy riding trip from the Hotel is still the favorite Cut-throat fishing area in the Rockies, where fishing is as good as ever in spite of the growing number of anglers.

"The Floral Route to the West"

The task of beautifying the lines of the Canadian Pacific Railway across the Dominion is increasing to a great extent each year. The importance of horticultural work in its branches has been realized and according to plans, recently formulated by the Floral Committee of the Canadian Pacific, the work will be greatly extended next spring. Already 1500 parks and station gardens have been constructed along the line. "The Floral Route to the West" is the name by which the Company's garden system is known. Years ago when John Coxe was station master at Markdale, Ontario, one of the first stations to be officially opened by the C.P.R. From this evolved a three thousand mile route of blossoms. It is now a fact that the Floral Committee of the Company has to contend in the great difference in climatic conditions of the sections through which the line runs. It has been found that the Iceland poppy will grow in profusion at Lake Louise and today the Iceland Poppy at this famous mountain resort is known the world over. On the route from North Bay to Fort William the country is very rugged and the winter is severe. Here it has been found that the pansy plant, which is biennial, is most suited to the climate. Thousands of these plants have been placed along the line in this section each year. Red Rambler Roses have taken a prominent

Here and There

The fourth Eastern International Dog Derby to be held from Quebec City February 21, 22 and 23, promised to be the most keenly contested ever held. It is expected that over 20 teams will be entered for the race.

Christmas tree shipments from Quebec to the United States ran to 400,000 over Canadian Pacific lines last year, and present expectation is that this number will be equalled at least this year. Revenue to farmers of the province from this source ran to \$100,000 last year.

Four carloads of silver foxes, valued at \$750,000, have left Prince Edward Island in one shipment for the Western States: Wyoming, Utah, Colorado, Oregon and Washington. Viewed as a livestock shipment, it is said to be a record one. A number of prize winners were among the pack.

Dog teams will be used this winter by the Hudson's Bay-Marianland organization to prosecute oil development work in the Ribstone field in North-Eastern Alberta. This is the area where the quest for oil started following a favorable report by Dr. G. S. Hume, head of the Dominion Geological Survey.

Christmas travel over the Canadian Pacific routes to the Old Country has been heavier this year than ever before experienced. Special trains have been run from Winnipeg directly to the ship's side at Saint John, N.B. The westerners credit this heavy movement to England for Christmas to the excellent conditions that prevail throughout the west.

The hundred settler families from the British Isles brought out by the Scottish Immigrant Aid Society to form the Clan Donald Colony are doing splendidly, according to a field supervisor's report just submitted. When they landed at their destination they found farms, houses, barns and equipment ready so that no time was lost in preliminaries.

Turkish tobacco, grown in Alberta, is better than that grown in Turkey or Greece, according to a Mr. Baker here, who grew 1,000 pounds as an experiment this season. He plotted out three-quarters of an acre to ten varieties of tobacco seed. The crop was harvested ripe before the coming of frost, and of the ten varieties Turkish, White Barley and Orinoco thrived best.

Nearly 1,050 overseas vessels entered the Harbor of Montreal and over 850 coastal vessels docked there in the season just closed. This makes a very favorable showing compared with the 1,255 overseas and 215 coastal vessels of the previous season. During the period of open navigation over 113,850,000 bushels of grain were shipped from the port and flour shipments totalled 2,090,000 barrels.

Canada scored again at the Chicago Exposition when the blue ribbon grand champion in the Clydesdale stallion division went to Forest Favorite, owned by Haggerty and Black of Belle Plaine, Saskatchewan. Last year the University of Saskatchewan took the coveted honor with Green Meadow Footsteps. This year, it is said, the veteran Canadian stallion was an easy winner over all others.

"There is better hunting today in the Canadian Rockies than was the case when white men first began systematic exploration of them nearly fifty years ago," said T. E. Wilson, of Banff, one of the outstanding pioneer mountain guides, when interviewed at Canadian Pacific headquarters recently. Mr. Wilson was the first white man to discover Lake Louise and Yoho Valley. A plaque or statue has been erected in the Yoho Valley in honor of him, by the Trail Riders of the Canadian Rockies.

Notice to Creditors

In the matter of the Estate of Margaret Ann McCartney, late of the Town of Georgetown, in the County of Halton, Widow, deceased.

Notice is hereby given pursuant to section 56 of the Trustee Act, R.S.O. 1914, Chapter 121, that all creditors or others having claims or demands against the estate of the said Margaret Ann McCartney who died on or about the fourteenth day of November, 1928, at the said Town of Georgetown, are required, on or before the sixteenth day of January, 1929, to send by post prepaid for delivery to the undersigned, notice herein for execution of the estate of the said Margaret Ann McCartney, deceased, their christian name and surname, address and descriptions, the full particulars in writing of their claims, a statement of their accounts and the nature of the security if any, held by them.

And take notice that after such last mentioned date the said executor will proceed to distribute the assets of the said deceased among the parties entitled thereto, having regard only to the claims of which he shall then have notice, and that thereafter no claim will be liable for the said assets or any part thereof to any person or persons whose claims notice shall not have been received by him at the time of such distribution.

LEROY DALE,
Executor for the said Executrix.
Dated at Georgetown, this 14th day of December, 1928.
