Famous Conjuror's Stories

The magician who relies solely
upon his own skill and cunning has a
fascinated advantage, says Howard
Taborin in "Tit-Bits". It is makes a
mistake to say that he is a charlatan,
for he is not. He is a man of great
power and of some other than the
ordinary who depends upon the co-
operation of an army of assistants
and never tell when something may
go wrong.

Some time ago I was presenting an
illusion known as "The Glass-Headed
Trunk." A large trunk, mounted on
a platform, was wheeled upon the
stage, shown on all sides, and then
opened. When the front of the trunk
was dropped down, the audience was
supposed to see an empty trunk, lined
with sheets of glass. But on the
occasion of the opening of the trunk
revealed a young woman partly
veiled.

Acting on the inspiration of the
moment, I made this announcement:
"One of the great joys of a magician
is to lead his audience to believe
that they have discovered one
of his secrets. This evening I have
taken the opportunity to try an ex-
periment. Perhaps one-half or two-
thirds of you believe you have just
seen the form of a young woman in-
side that trunk. The rest of you
may not be certain. I'll prove to you
that your eyes have deceived you. The
trunk is empty!"

My assistants wheeled the trunk
around again. It was opened, and
seen to be empty! The audience
gasped. And before the people had
recovered from their astonishment I
had closed the trunk and had
wheeled around again.

"Now," I resumed, "I will again
prove that your eyes have deceived
you. You're satisfied the trunk is
empty. Behold!" The trunk was
swung open, and there lay the young
woman.

The audience applauded. The illu-
sion was a success. Why? I had ad-
hered to the cardinal principle that
governs all magicians: never admit
a mistake!

When I was presenting an illusion
called "One," in which a girl re-
volved in mid-air, the girl had just started
on one of her aerial somersaults
when she suddenly shot forward and
fell ten feet to the stage, head first.

An assistant had neglected an im-
portant item of preparation.
As I saw the girl fall, I rang down
the curtains and rushed to her. For a
few moments I held her as she lay
broken. But when she got to her
feet she opened her eyes and took
a look at me. She held my arm as
I led her before the curtains, where
she smiled and bowed to the audi-
ence. The moment she was behind
the scenes she fainted. Fortunately
the girl suffered no ill-effects from
the accident, and I do not believe
that the audience ever realized that
the assistance of what had happened.

In Sydney, Australia, I performed
an illusion with a huge metal frame
containing a sheet of plate glass ten
feet square. After the illusion the
frame, on a stand, was removed to
the back of the stage, and later I
worked a variation of the "Levitation,"
or the "Floating Lady," directly in
front of it. One night I had my
girl in mid-air and was standing
by the back of her suspended body
when I heard a voice call wildly from
off the stage: "Look out for the
glass!"

The huge frame had toppled for-
ward and was crashing down upon
my head. Instinctively I leaped for-
ward and seized the girl, hoping to
snatch her away and plunge forward
to safety—a desperate attempt that
I never have embodied. Then,
suddenly, I heard a sharp clang above
me. The tottering glass did not fall
back behind me. There was a
look of surprise, leaning at a dangerous
angle, scarcely three feet from my
head.

I saw what had saved me. In the
top of the frame were two metal
rings which had never been used for
any purpose. That very night before
the show, one of the stage hands had
tied the ends of safety lines to the
metal rings, and thus fastened it from
above. When the glass had toppled
the safety lines stopped its fall—and
saved two lives.

In Calcutta I appeared before an
audience composed principally of
Mohammedans.
"In one of my tricks I produced a
pig, and he ran over the footlights
into the audience. To my astonish-
ment, the natives leaped to their feet
and, with wild cries, fled from the
theatre. It was almost a panic, and
I could not account for it. I had
learned that the Mohammedans con-
sidered a pig unclean, and that to be
touched by one would make it neces-
sary for them to undergo religious
penance to remove contamination.
Once our party stopped at an In-
dian camp. I proceeded to mystify
the natives with slight of hand, and
amplified my performance by bak-
ing three gold coins in the pocket of
an Indian. Delighted at the discov-
ery, the Indian promptly claimed the
money, and the chief of the tribe
agreed that the gold belonged to his
headman.

I didn't catch the idea of losing
the money, so I stated that I could
produce still greater wonders.
I took the coins and apparently
wrapped them in a handkerchief,
which I hid in several tight knots.
I told the Indian that the coins were
multiplying, which he believed, as
he could feel more than three coins
through the cloth. I then added that
he must sleep on the handkerchief
overnight and not open it until the
morning. The Indian guarded the
handkerchief closely (it held few
silver coins), and had not opened it
when we left the camp.

A Man

The measure of a man is his
What pleasures does he choose to miss,
What profits does he scorn to take,
For Mankind's sake?

Nor will we wisdom mark the man
Both these the selfish folk can
Possess upon a marked degree
And dangerous be.
One can be skillful and unkind,
Another with a brilliant mind
May not, when he is sorely pressed,
Meet mankind's test.

That man has played the noble part
Who cleans of hand and cleans of heart
Concurs to his triumph, great and small,
Beloved by all.

Edgar A. Guest.

Spontaneous Combustion

A leaflet on spontaneous combus-
tion now being circulated from the
fire marshal's office, contains much
information on how many "unknown"
fires get started.

The leaflet, which is written by
Dr. Frank T. Schutt, dominion physi-
cist, points out that spontaneous com-
bustion or the ignition of inflam-
mable material without contact with
outside flame takes place when the
union with oxygen is sufficiently rapid
to raise the temperature of the
produced gases to the point of igni-
tion.

"The spontaneous fires which
break out in barns or more particu-
larly in moveable compartments where
hay or sheep grain is stored are due
primarily to fermentation," says Dr.
Schutt. "Fermentation is due to the
growth and rapid multiplication of
bacteria which feed upon the organic
matter of the hay and rapidly develop
when moisture is present and the na-
tural and the enclosed air are not
too cold.

"If," he continues, "the process
proceeds slowly the process is one of
slow combustion" and there is no
flame or fire. Such is the process
that causes the blackened and char-
red masses occasionally found in hay
stacks, manure heaps, etc. If on the
other hand, if the hay is in a confined
and poorly ventilated space, the
temperature is reached at which in-
flammable gases are produced. This
causes fire, although it may take
weeks or even months before the fir-
ing of the material takes place."

In conclusion, the leaflet declares
that the initial and essential cause of
spontaneous combustion in farm fires
especially is the storage of the hay in
a damp or moist condition. As a
remedy the leaflet points out that
thorough ventilation of the barn will
act as a preventative. It also stated
that it will pay well if extra labor is
used in drying the hay before it is put
in the mow or the stack.

School Report

Following is the report of Ash-
grove Public School for the month
of February—
Br. IV—Lucy Wilson (hon.),
Fred Nunn (hon.), Clifford Brown,
Eston Wilson, Fred Hall, Rose
Wrigglesworth.
Br. III—Vern Barnes (hon.), Donald
McNabb (hon.), Evelyn Walsh
(hon.), Margaret Hulla (hon.), Winnie-
freed Wrigglesworth (hon.), Horace
Barnes.

Br. III—Harvey Nurse (hon.),
Isabel Alexander (hon.),
I. class—John McNabb (hon.),
John Alexander, Leslie Brown,
Lillian Hall.
I. class—Lloyd Brown (hon.),
Primer—Mary Alexander (hon.),
Helen Brown (hon.), Donald Brown,
Edith Wrigglesworth, Jean Brown.
Pupils names marked with asterisk
have perfect attendance.
Teacher—O. Christian.

Children's Aid Society

It is a very patriotic act to give a
good home to a home-less child.
Every child should have a home.
Don't miss the blessing of having a
child in your home to brighten it.

The Reduction in Taxes

Following are the proposed tax
revisions announced in the Budget
speech delivered by Hon. J. A. Robb,
Finance Minister:
A reduction of 10 per cent. is made
on all income tax rates.
A reduction of 20 per cent. is made
on all sales tax rates.
A reduction of 25 per cent. is made
on the match tax.
Exemption from stamp tax on
cheques, notes, etc., increased from
\$5 to \$10.
Stamp tax on cheques, bills, notes,
etc., of a value over \$10 is now two
cents. The graduated scale is abol-
ished.
Stamp tax on overdrafts and ad-
vances abolished.
Income tax change comes into ef-
fect for this spring payments.
Sales tax reduction now in effect.
Stamp tax change and match tax
change comes into effect on July 1st.
Special War Revenue Act amended
to make it clear that printers are
liable to sales tax.
Toll change, none.

An Old Dead

Mr. C. F. Adamson, Jr., of the
Town Line, Trafalgar, has possession
of the original deed of his farm,
being Lot 2, Con. 2, N. D. S., on the
Trafalgar side of the Peel—Halton
town line, which was issued by the
crown and is dated July 21st, 1812—
118 years ago. It was signed by Sir
Isaac Brock, then Governor of Upper
Canada, just 3 months and 3 days
before he was killed at the battle of
Queenston Heights. The farm was
originally deeded to Obudiah King,
and the King family held it for over
sixty years. The deed is made of
heavy parchment, is tied with ribbon
and sealed with a wax seal about
three inches in diameter.

M. B. Sprout, of Milton, has been
elected superintendent of works of
the Hamilton district of Royal Arch
Masons, at the grand chapter held
this week in Ottawa. He will officially
visit every chapter in the Hamil-
ton district.
