No More Pretty Shoes-for Dorothy

Dorothy peeps shyly at you through a tangle of pretty dark curis. If you are a man, she is hoping against hope that you might be her Daddy, because he used to come and see her and bring her pretty shoes, but he doesn't come any more.

Dorothy cannot understand why. If you are a lady she knows you can't halong to her because the nurse says If you are a lady she knows you can't belong to her because the nurse says her mother died years ago. It's hard for a wee girl of five to understand all this, and why she shouldn't have the joys that other little girls always have, and, above all, why she should be in the tiresome bed so much!

But the kindly doctors and nurses at the Queen Mary Hospital are very pattent with helplase little Dorothy and hope to fight off the dreaded consumption and make her sound and well.

Well.

Wouldn't you like to help this
Work? Your gift to the Hospital will
be gratefully received.

Hespital for Sick Children

67 College St., Toronto 2, Ont. December, 1927.

Dear Mr. Editor:-Most of your readers are well aware of the wonderful service which the Hospital for Sick Children in Toronto is enabled to per form through the generosity of its friends. During the Christmas season the Hospital appropriately makes its annual appeal for the funds necessary to carry on the work throughout the new year. Now is the time to give tangible expression to the feeling of good-will which "The Bick Kids" Hospitalas it is familiarly called-has won for itself in every part of this

The magnitude of the flospital's

teast \$100,000 for each year of the hospital's ministry. Its service, however, is not confined to its own four walls. Note these arresting facts. The infant mortality rate in Ontario is 78.5. while in Quebec it is 142. In our towns and cities the loss of infant life to less than half what it is in the elster province. Now, for Ontario's priceless advantage, one outstanding reason is the maintenance by public benevolence of a worldfamous provincial institution dedicated to the care of the on-coming generation. An entire department of the Hospital for Sick Children is devoted to the care of hables under one year of age. Here every aid which medical science can devise is extended to help the tiny pationts through the first hard round in their struggle for existence.

Pamiliarity with the methods here employed is an invaluable esset to doctors and nurses enlisting for service in the homes of the province. Thus is the childhood of even the most remote community within the compass of the widespread ministration of the Hospital for Bick Children bestelltted. It is indeed a work for humanity which deserves cordial remembrance at Christmas time.
