McBean & Co GEORGETOWN

## How many weeds are you sowing?

Recently one ounce of Alfalfa seed was found to contain approximately 900 weed seeds, which would have resulted in the distribution of almost a million weeds to every acre

And such examples as this are not uncommon. Forestall the danger of ruined crops now! Take every precaution in selecting and cleaning your seed-because on them principally depends the ultimate success of your crops.

Under the Weed Control Act the destruction of noxious weeds is compulsory. Let us co-operate to end this menace.
