EVERY TWO MINUTES OF EVERY BUSINESS DAY... SOMEONE IN CANADA BUYS A NEW GENERAL MOTORS CAR

SINCE the days of Confederation, General Motors of Canada Limited has been supplying Canada with transportation. Each year as requirements have multiplied, the scope of General Motors service has widened, the quality of General Motors cars has steadily improved. Each year more Canadians have looked to General Motors for better automobiles, until now, every two minutes of every business day, someone in Canada buys a new General Motors car. These cars are bought by people you know... by people like yourself... for the very reasons which would guide you in the choice of a car. They are bought because they are the product of the most progressive organization in the world's most progressive industry... because they reflect the General Motors policy of constant advancement... because they are better cars. They represent the latest developments of the world's leading automotive research laboratory, offering these developments to the public as soon as they become available. They are proved in advance, at the General Motors proving grounds, and are better cars because they are General Motors cars. And they embody greater value for the money than any other car. This popularity of General Motors cars is more than a passing interest for a car buyer... for General Motors has created demand to reduce production to offer still more outstanding value.

The Bride

Little lady at the altar,
Vowing by God's Book and altar
To be faithful, fond and true
Unto him who stands by you;
Think not that romance is ended,
That youth's curtain has descended,
And love's pretty play is done,
For it's only just begun.
Marriage, blushing little lady,
Is love's sunny path and glory,
Over which two hearts should wander
Of each one growing fonder,
As you stroll to each to-morrow,
You will come to joy and sorrow;
And as faithful man and wife,
Read the troubled book of life.
Bitter cares will some day find you;
Closer, closer they will find you;
If together you will bear them;
Care's grow sweet when lovers share them.
Love unites two happy mortals,
Stronger than love to wedlock's pur-
tals;
And then blithely bids them go,
Arm in arm, through weal and woe.
Little lady at the altar,
Never stoop to unbelieveing,
Even when your heart is grieving,
To what comes of wintry weather
Or disaster—stand together,
Through life's fearful hours of night
Love shall bring you back to light.
—Edgar A. Guest.

County Council

The regular meeting of the county council was held at Milton on Wednesday last.
Notice of appeal against the equalized assessment of the county was received from the Township of Trafalgar. His Honor Judge Elliott equalized the assessment of the county in 1926 and 1927, and now the township requested that a commission be appointed to consist of the county judge, a judge from a near-by county, and the registrar or the sheriff, to deal with the matter. The county council took no definite action on the question, but it will probably be settled at the next meeting of the council.
A by-law covering the issue of de-bentures by the county to cover the cost of the county's share of expenditures on provincial highways, was passed. The amount needed is about \$30,000. Work was received from the Waterloo high school board that the cost of pupils from Halton county would be \$125 per annum per pupil. The county will bear 80 per cent of this amount. Grants were made to the Halton Rifles, the county fair and the township fair. The Nelson and Burlington Agricultural society will receive about \$75 as a grant from the county this year. The council decided to increase the salary of the county clerk to \$1,100 per annum. The clerk has been with the county for about 65 years.
The new agricultural representative appeared before the council in company with Mr. Andrew, who recently resigned the post. He stated that his intention was to carry on with the idea proposed by Mr. Andrew, that the county of Halton have an exhibit at the Canadian National exhibition this year. The report of the corn breeder inspector stated that he was receiving splendid co-operation from the farmers in the county and that things were in good shape.

Peri Dover Woman Celebrates Century

Mrs. Mary Bayly celebrated her one hundredth birthday on Thursday, July 12th. In addition to many villagers, visitors from Detroit, Flint, Elton, Niagara Falls, Toronto, Hamilton, Simcoe, and Jarvis visited the old lady who though handicapped by loss of sight and a slight deafness, thoroughly enjoyed the occasion. A sheet of congratulatory telegrams and many gifts were received. Mrs. Bayly's father, Thomas Thompson, came from the County of Longford, Ireland in 1816 and took up land at Stewarttown. He soon took as his life partner Elizabeth Cook of Halton County. They had a family of nine children, of which Mrs. Bayly was the third. Pioneer life was not by any means an easy one in those days. Mr. Thompson had to pack a bushel of wheat on his back to the Gooderham Mill at Mudby Little York, now Toronto and pack the flour home. The work of the household of the Thompsons was divided up as evenly as possible. Mrs. Bayly was assigned to the spinning, a sister had the knitting to do, while to another sister fell the dressmaking. In winter the manifold tasks of the pioneer farm life were added to by the necessity of going to the woods and cutting tender twigs for the cattle to browse, there not being enough hay to take them over the season of scarcity. Mrs. Bayly has a vivid recollection of the troublous times of the Mackenzie Rebellion, which was brought home forcibly to her family when the wife of a blacksmith who lived on a portion of their farm informed the Thompsons secretly that pikers were being manufactured by her husband and that she feared that those who had been kind her to in many ways would become victims of those same pikers. Mrs. Bayly was to have visited her birthplace at Stewarttown on Thursday but illness of her son prevented the trip.

Health Service of the Canadian Medical Association

The importance of rest
Life consists of alternating periods of activity and rest. To live in a healthy condition, it is necessary that these periods be balanced one with the other.
If activity be too prolonged, there is loss of efficiency. The tired eye sees less well, the tired muscles do not respond as quickly, the tired workman produces a smaller quantity and a lower grade of work, the tired brain is less efficient.
It is a well known fact that a much higher percentage of accidents occur in factories towards the end of the day. Even under the stimulus of a patriotic fervour, it was found that the number of shells produced per week during the first year of the war was increased by reducing the hours of work in the elimination of Sunday work.
A change is a rest. Recreation or play is a change which provides rest in one manner. It does not, however, provide rest in all ways. It is rest in the sense that it is a diversion, but it is not restful in the sense that sleep is. Play furnishes relief from the monotony of work, gives a fresh mental outlook, but it does not provide for the rest that is needed to rebuild and restore the body-cells broken down by activity.
Periods of activity, either at work or at play, must be balanced by periods of rest and the ideal form of rest is sleep.
When disease attacks the body rest is one of the essentials of treatment. The patient is put to bed and kept as comfortable as possible in order that by means of rest the body may make its best fight against the enemy—disease.
Persons who are below par, adults and children who are underweight, benefit by added rest. Children frequently gain in weight with another change in their routine of life except a rest period after meals.
Rest costs nothing in money, but it means taking time from other things for the purpose. To do without sufficient rest is to wear out the body prematurely. Rest is required just as much in summer as in winter, which is a truth that people are apt to overlook, both for themselves and for their children.
Questions concerning Health Service of the Canadian Medical Association, 184 College Street, Toronto, will be answered by letter. Questions as to diagnosis and treatment will not be answered.

Notes and Comments

Nat Given Named by Conservatives of Rose-town Sask.

At the Conservative Convention held at Compost, Sask., on Friday, June 8th, Mr. Nat Given, a former resident of Georgetown was chosen as a candidate to contest the constituency of the next provincial election. Regarding Mr. Given's nomination the Delisle Advocate says:—Then came the main object of the convention, the nomination of a candidate to contest the constituency of the next provincial election. The name of our esteemed townsman, Mr. Nat Given was placed in nomination. There were no further nominations, and amid cheers and hand clapping of approval Mr. Given was called to the platform. He thanked the delegates for their confidence, and gave an inspiring address, assuring the meeting he would do his part and would expect all present to do theirs.

Township Clerkship a Big Job

One of the most important and exacting positions in a rural community is that of the Township Clerk. The fact that life is more complex today than it was a few years ago, effects municipalities just as it does individuals. The farmer who used to flounder around in a demoralized and confused way, now drives a car on a good township road and has hydro. All this spells township road superintendent, hydro by-laws, drainage by-laws, reports to the Highway Department, the filling out of questionnaires, the attending to departments in addition to the ordinary duties of the Clerk. The Clerk has to be guide counsellor and friend to green councillors and Reeve, and in order to do so, he must have a knowledge of law, book-keeping, mathematics, together with the wisdom of Solomon.
If he does not keep his eye on the constant changes in the statute books his Council gets tangled in legal difficulties and he will likely get the blame. For instance, in 1895 an Act was passed repealing the authority of the Council head to name one of the municipal auditors. In a municipality not a hundred miles from here, the Council of the County went on naming an auditor the same as before for over twenty years before the error was discovered.
To measure up fully to the requirements of his job, it will be seen that a Township Clerk for a rural municipality is somewhat unusual attainments and as a matter of fact he usually is. Some of the Clerks who have served, and are serving in this district, are real pillars in the municipal structure. They serve for small salaries, far too small in many cases. The importance of their position should be recognized and more generally appreciated by the Township Councils and by the ratepayers.—Tara Leuter.

Dies on 88th Birthday

Near Old Homestead
On the farm where she had resided all her 85 years of married life, and across the road from the log cabin in which she was born 88 years ago, Mrs. Isabella Moore, widow of William Moore, died last Friday in Equipping Township, near Milton. Mrs. Moore passed away on the anniversary of her birth, a slight stroke Saturday last, hastening death, which came following a period of unconsciousness, at one o'clock.
Mrs. Moore's father came from Scotland to the township before it had a name, and clearing the land, built a log cabin. Part of the original building stands to day. Mrs. Moore was well known throughout the County of Halton. She was a prominent member of the United Presbyterian Church of North America, an American church with a scattered membership in Ontario, one branch of which is established in Equipping.
Mrs. Moore's husband purchased the tract of land upon which they have since resided in 1806. Two children survive, William, the homestead, and John, on the farm where his mother was born. Her husband died five years ago, at the age of 84. Mrs. Moore was the last member of her family.
The funeral was held Monday at 2 p.m. from Mrs. Moore's late residence to the cemetery of Boston Church.
