## On the Job

—over all roads  
—in all weathers  
—at all times

WITH the superb ease of a thoroughbred that takes all in its stride, the "Bigger and Better" Chevrolet never falters in the most trying circumstances—proves its mettle on the steepest grades and in the face of the greatest obstacles.

The ruggedness of Chevrolet construction alone makes these things possible. There is no part of the engine—the chassis—of the body that was not designed primarily for rugged endurance—put to the test again and again on the General Motors Proving Ground.

As a result the "Bigger and Better" Chevrolet steadily climbs without a halt, the steep slopes of the Rockies, and ploughs its way through the deep mud and gusts of half-made prairie trails. In whatever conditions it may be placed, the splendid ruggedness of Chevrolet remains loyal in the service of its owner.

Its long life has become proverbial—the very name Chevrolet is a synonym for strength that endures.

The "Bigger and Better" Chevrolet—beautiful in form—luxurious in appointments—supremely rugged in construction—powered by the famous Valve-in-Head engine—offers solid, enduring, trustworthy performance even under adverse conditions.

No matter what the roads—no matter what the weather—at all times the "Bigger and Better" Chevrolet stays on the job.

The C.M.A.C. General Motor's own direct financing plan offers the most convenient and economical way of having your Chevrolet on wheels.

## NEW acceleration

-like a shot from a gun...

... due to greatly increased power and vital engineering advancements adding new brilliancy to McLaughlin Buick's VALVE-IN-HEAD Engine!

A THRILL with every stroke—like a spirited thoroughbred Buick makes its way and unrivalled power of acceleration. Never was there an automobile so responsive, so mobile, so sensitively flexible. Never an automobile with such dash and spirit. Never an automobile so thrillingly alive to every desire and demand of the driver!

Increased horsepower and stroke in the world-famous valve-in-head engine—new and advanced carburetion—high pressure gas pump—all combine to produce accelerating abilities which will be the envy of other motorists.

Push-over, getaway and top speed—greater top speed than ever before—all are attained in the fewest possible seconds in the new, 1929 McLaughlin-Buick.

If you want the feeling of dash, power, swiftness—just look out over the mighty hood and if you want to experience traffic mastery—just press the accelerator. Drive it and you'll say, there never was a car like this great, new McLaughlin-Buick. It provides acceleration like a shot from a gun!

The C.M.A.C. Deferred Payment Plan offers many advantages to buyers of McLaughlin-Buick cars.

### In Shady Dells

How sweet it is, in shady dells,  
To stroll around through nature's  
And over wooded hills,  
And do just as one wills.  
No noisy, crowded thoroughfare,  
With people all around;  
But everywhere Nature's charms,  
In harmony, are found.

### Thoughts are Things

It is a mistake to look upon thoughts as being something very vague and indefinite. Thoughts are things. They have wonderful power. They do things in addition to being things. Thoughts started the universe into being. Think you, friend, could this wonderful organism we term the world have come into existence or, after its coming into existence, have continued in being unless there had first been thought and thought had continued? Somewhere behind all the mystery of life and creation, there is a Mind.

We are but part of the Universal Mind. Our thought, likewise, is one of the most potent forces, perhaps the most potent force in life. Take the question of evil: was it not William Shakespeare who said, "There is nothing evil but thinking makes it so"? We refer to it here only to illustrate the power of thought, not to dilate upon evil and its character and power. If Shakespeare was right, and evil will exist because men and women have imposed an evil character and condition upon some thing by their thinking, then thought must have a tremendous power. After all, the Bard of Avon must have been right because the very admission of evil postulates the existence of a power equal with God, which is unthinkable.

We should guard our thinking and train our thinking machine, the mind, to think high thoughts, useful thoughts, helpful thoughts. If we had a right conception of our minds and what they are; if we could only realize that the individual mind is definitely part of the Universal Mind, that it can be brought into harmony with the Divine, and that its wonderful powers may be devoted to co-operating with the creative process of the All-Father, then would life have for us all a different and nobler meaning. We should not waste the powers of our mind which are lent to us for the service of the world, the development of life, and the furtherance of humanity's highest ideals. Truly, thoughts are things, to be used wisely, constructively, servitively.

### Summer Camp Closes for Season

The new summer camp for junior and senior boys, which the West End Y.M.C.A. conducted this year at Norval for the first time, came to a close on Saturday after a most successful six weeks period. Quite a number of parents from the city went out for the closing ceremonies which took the form of a circus, minstrel show and camp fire gathering.

The splendid property of 67 acres was placed at the disposal of the Association by Morden Neilson two or three months ago and through the real and generosity of many people interested in boys' work, the farm has been transformed into a beautiful camp site. A new large recreation hall has been built and it is planned to convert twelve acres of the ground into a first-class athletic field, and to carry out other improvements for next year.

There was an attendance of 160 boys each week from the time the camp opened, and upwards of a hundred applied to go who could not be accommodated. The camp was in charge of Gordon Gault, Boys' Work Secretary of the West End branch.

### County Council

The Halton County council met in Milton on Wednesday of last week and there was quite a lengthy and interesting session.

Of special interest to Oakville was the agreement that county money might be spent on the sixth line from the Station road to the town cemetery and on Kerr street north of Rebecca street. Any money spent on these streets will earn government grant of fifty per cent.

It was agreed by council that next year the good roads committee should consist of three members of county council appointed at first meeting. Now there are five members.

The appeal by Trafalgar against the equalization of assessment was withdrawn for this year after Reeve Morden had explained that what he had in mind was an equalization by a committee of three independent men. Where such an assessment is made it stands for five years. This action will probably follow early next year and it is hoped some permanent agreement may be reached.

### Young Girl Drowns at Milton

About five o'clock Wednesday afternoon, August 8th, a drowning occurred in the Sixteen Mile Creek, which runs through the woods on Thomas Weir's farm, adjoining the Eastern boundary line of Milton. The victim was Miss Elizabeth Newell, 19-year-old daughter of Mr. and Mrs. Frank Newell of Koro. Miss Newell, with her friend, Miss Mary Pearson, both waitresses in the Milton hotel, were bathing and while Miss Newell was standing on a large stone she slipped into a hole, which afterwards was found to be over ten feet deep. Miss Pearson made two heroic efforts to save her friend and nearly lost her own life. She gave the alarm and Mrs. Catherwood and Sutherland were soon on the scene. Dr. Catherwood released the body, which had become entangled in weeds, and brought it to land, but the efforts of both doctors failed to restore life. Miss Pearson is suffering greatly from shock.

The funeral of the late Elizabeth Jane (Betty) Newell, took place in the funeral home of the Evening Star Robekah Lodge, and Milton Lodge, I.O.O.F., No. 92. The pallbearers were Dr. W. L. Catherwood, Dr. J. L. Sutherland, Dr. F. E. Babcock, H. A. Cavell, E. Foster and S. Adams. The floral tributes were many and beautiful testifying to the high esteem in which the deceased was held in this community. The flower-bearers were Messrs. A. McCreedy, R. Currie, N. Argill, and E. Archer. Interment took place in Evergreen cemetery, Milton.

### National Council of Women

A nation-wide appeal for a foundation fund of \$200,000 will be conducted by the National Council of Women of Canada, it is announced by Mrs. Frederick Eberington, of Kingston, Ontario, secretary of the fund committee. Headquarters have been established in Kingston and preparations are being made to begin the public effort in the latter part of September and early in October.

The National Council is a federation of local councils which are composed of women's organizations of every kind. It is represented in every principal city of the Dominion and has a membership which allows it to pay part of the expenses of delegates to national conventions of the organizations, and also to continue the work and publish the findings of national standing committees. It is also hoped that the fund will make feasible the establishment of a national headquarters.

National officers are—Her Excellency, Viscountess Willington, Ottawa, honorary president; Mrs. J. A. Wilson, Ottawa, president; Mrs. Horace Parsons, Toronto, acting corresponding secretary; Mrs. S. C. Treed, Waterloo, recording secretary, and Mrs. W. A. Quibell, Toronto, treasurer.

The National vice-presidents are—Mrs. Eberington, Miss C. E. K. Michael, New Glasgow, Mrs. Wiloughby Cummings D.C.L., Toronto, Dr. Stowe Gullen, Toronto, Lady Aikens, Winnipeg, Mrs. Charles H. Thorburn, Ottawa, Judge H. C. McGill, Vancouver. The provincial president of Ontario is Mrs. R. G. Smythe, 57 Chestnut Park Road, Toronto, while Mrs. F. A. Hazley is president of the Georgetown local council.

### Finished at Erin

The congregation of Limehouse and Churchhill United Churches held a very enjoyable picnic at Stanley Park, Erin, last Wednesday afternoon. The picnic sports and games made a pleasant and interesting afternoon and the picnic supper served by the ladies finished off perfectly the outing of these congregations.

### In the Ditch

On Saturday night last one of the Arrow buses coming from Toronto ran off the highway opposite Mr. R. N. Brown's farm, and into the ditch. It was Sunday afternoon before it was brought back to the roadway again. Only five passengers were on the bus at the time and no one was injured beyond a bad shaking up. A Ford truck also ran into the ditch near the seventh line corner on Monday, but was hauled out by passing motorists. It is also said that a local motorist, in a speed contest on the highway west of Acton, took the ditch at 65 miles an hour to avoid hitting his contestant when the brakes were suddenly applied, and he came out again right side up.

The Canadian National Exhibition, 2,200 voice chorus will give four concerts again this year.

—Dirt track motor racing championship will be settled at this year's Canadian National Exhibition, Toronto.

### Notes and Comments

THE practice by some people of carrying dogs on the running boards of automobiles should be discouraged, abolished, even when the animals are in a luggage carrier. There is constant danger that they will be thrown off. The least little bump, the sudden swerve so frequently necessary on the road, may send the poor dog tumbling onto the road and under the wheels of another machine. It is inhumane and the practice should be discouraged and stopped. It scarcely seems that a real lover of dogs would ever treat one that way. It is also a practice that could easily cause a severe accident.

ACCORDING to a recent compilation of figures dealing with the newspaper mortality rate in Canada, no less than 255 weekly and 81 daily publications have suspended during the past ten years. The increased cost of paper, ink, and other material; higher wages paid and the expenditure involved in the effort to keep abreast of the times by the introduction of modern machinery are said to be chiefly responsible for their disappearance. Amalgamations taking place in many towns and cities have likewise been a potent factor. The majority of Canadian towns and most cities now support one newspaper which maintains an independent stand politically, and is well patronized by the business men of its locality.

COOL weather has postponed the evil day, but soon we shall be exhorted to "swat." Swatting undoubtedly is positive, heroic and effective, but it is not scientific. It is limited in its application and, as a solution of the fly problem, it is about one-half of one per cent. Wainwright Evans, in a current magazine article, says there is but one way to get rid of flies—birth control. If we have the good sense to leave an exposed package or sewage for the flies to lay eggs in, the generation of these pest breeders will be cut off. Future historians of our civilization, recounting that we tolerated flies, because we had not learned so simple and decent a method of eliminating them.

IT MAKES quite a difference what kind of service you get from the people who hand over goods to you in a retail store. Do they just look at them over, naming the price and then turn away with a kind of indifference? Or are they so anxious to sell to you, that they do not stop to consider what your wishes and needs are but just try to get rid of whatever they think you will buy and do it in the least possible time. Those kinds of service you frequently see in stores when you go away from home, where the clerks never saw you before and never expect to see you again. When you buy in Georgetown you get personal attention, because the home store people know you, or at least wish to do so. They consider not merely selling you this time but trying to get you so well that you will come again.

THE Stratford Beacon-Herald, in an intimate chat with Canadian girls, says: "Girls should be brought up to believe that the longer they can go without 'making up' their faces, the better for their complexion. It is because so many of them start early that they have to carry on the practice for the rest of their lives. Girls and young women ought not to use chemical composition face cream or anything washed out, if they use the proper food and used plenty of good soap and water, they would not develop the kind of complexion that they think it better to hide under a covering of permed powder, which does more harm than good in the long run."

### SMH Talking "Gallagher's"

"To take or not to take that is the question." Almost everyone has to take some kind of medicine in this age of high pressure living and refined foods and it is most important the kind of medicine we take. You believe with me that Herb Medicine is the only safe kind for continual use. All our internal remedies are guaranteed to be purely vegetable in composition. Gallagher's Blood Purifier is a laxative that does not lose its effectiveness by continued use. I know a man who six years ago was a nervous wreck. For six years he has taken two ounces of Gallagher's Blood Purifier per day, and each year has steadily improved, is well and strong today, works every day and has a complexion like a child. We have many customers taking it for their complexion alone as it gives the skin a clear healthy color. Quit salts and pills, go to W. K. Watson for a bottle of Gallagher's Blood Purifier and use it if it will not do that which I claim.

Yours truly,  
Jack Spill.

—Exhibits from France, Cuba, Honduras, Mexico, India, South America and United States will be prominent at this year's Canadian National Exhibition, Toronto.

—Olympic games contenders from several nations have entered the Canadian National Exhibition track and field events.
