HIS YOUNG LADY'S JOB is to "clock" I the telephone service. She sits there with her decimeter stop watch and measures to tenths of a second the time taken to complete a call. Other "clockers" record the errofs made, the speed with which "trouble" is repaired, all the items of telephone efficiency.

If speed and efficiency are not constantly on the climb these are the people who know it first and then there is a grand hunt to find out what's gone wrong.

It is a good game. It gets results. That is why your telephone serves you better this year than it did last year, and next year will serve youbetter than now. That is why it has contributed its share to Canadian progress.

TOR EXAMPLE, seven years ago the average interval from the time you lifted your telephone receiver until the operator answered was 5.1 seconds. Today the clocker finds the interval cut to 3.7 seconds. Tomorrow it will be still less.

Seven years ago there were 95 slow calls in every 1,000-a slow call being one in which the operator takes ten seconds or more to answer. Today there are only 33 in every

The number of errors of all kinds has been reduced from 40 in every 1,000 calls to 16, which is over ninety-eight per cent perfect.

TIVE YEARS AGO you ran 27 chances in every 1,000 calls of getting the wrong number. That is down now to 13 chances in 1,000, or nearly 99 times out of the 100 right.

There are only two chances in a thousand now that you will be cut off. There were five chances in a thousand, five years ago.

There used to be eight times in a thousand calls when you would break in on somebody else's conversation. Now there are only two such double connections per thousand.

THERE ARE "CLOCKERS" at work in I other directions too and here are some of the things they have recorded.

The time taken to repair "trouble" on a line now has been cut to one-third of the time taken five years ago.

The time taken to install a new telephone used to be three hours and forty-five minutes. It has been cut now to one hour and forty-five minutes. That means something in hours saved, with 139,000 telephones installed in Ontario and Quebec this year.

TRETTY GOOD results. But the clocker I isn't satisfied. Nobody in the telephone business is ever satisfied with today's mark. The system tomorrow must always be better to keep pace with the Canada

Kicking a Tire is no way to test it!

ONLY a pressure gauge can ever give you a true indication of inflation.

There is a correct pressure for your tires. It de-pends on the size of the tire and the wheel load. At that pressure your tires will give you maximum mileage. . If your tire inflation goes three pounds below that correct pressure you cut mileage from the life of your tires.

Better still, drop in at a Dominion Tire Depot once a week and have every tire inspected, and the pressure checked. Let an expert search for cuts and bruises. Often a slight repair will prevent a blow-out.

You are never far away from a

in the chair.

The meeting was opened with prayer led by Rev. Canon Naftel.

The minutes of the previous meeting were read by the Becretary, Mrs.

The President in his address spoke highly of the efficiency and activity of the officers, feeling sure that everything in the interest of dependent and neglected children was moving along. 5th, the President, J. M. Denyes, B.A., recently.

neglected children was moving along very satisfactorily. He also called atvery satisfactorily. He also called attention to the excellent Shelter, and the splendid way in which it was being managed. Regret was expressed that we are losing Mr. C. H. Stuart, who has been a painstaking treasurer of the Society for many years. Reference was made to the fact that Mrs. Peacock, a valuable and regular attendant at the meetings wishes leave of absence for a time, as she will be living in Toronto for a part of the year upon which we have entered.

Mrs. Gorham, Convenor of the House Committee, in her report sizted that this year there was a number of operations. She said that the swings, in the resource of the said that the swings, in the person of Mrs. Thomas Somertial powers on Mill Street. Mrs. Somerville bore the burden of years with amazing vitality until about the home and enjoyed greatly the measure of health year upon which we have entered.
