Will It Help Business To Mark Time?

By 1934 Ontario and Quebec will need a million telephones and the Bell Telephone Company wants new money to provide them.

The company does not want any money from Parliament. It only wants permission to try to sell new shares to investors.

The investors will supply the money if they are allowed to. If they are not allowed to, the telephone system must mark time.

In 48 years the telephone company has never suggested not received a government grant; it only asks fraedom to take further part in Canada's progress. -
