Would You Build A House Without A Roof?

You won't start to build a house unless you know you can finish it. The Bell Telephone Company tries to be equally sensible.

The company does not need all its \$75,000,000 of new capital now but will spread its issue over years to come.

But it does need the assurance that, when equipment is started now for future telephones, money can be obtained to finish the job.

> By 1934 Ontario and Onebes will need a million telephones. These telephones cannot be ready unless central exchanges and other equipment are started now.
