Do you know why BUICK

rides so much more comfortably than other cars?.

Here are three important reasons

ACLAUGHLIN BU CK'S famous IVI cantilever springs—the most expensive type of springs employed on any car in the world, coupled with the famous McLaughlin-Butck torque tube drive are designed solely for comfort, not for transmission of power, and provide the maximum degree of riding restfulness.

McLaughlin-Buick's Lovejoy hydrau-lic shock absorbers . . front and rear on absorb the jars and jolts of the roughest roads, thus adding still further to the buoyancy of McLaughlin-Bulck travel.

And McLaughlin-Buick's deep, soft seat-cushions, together with the lounging spaciousness of McLaughlin-Buick interiors, provide unequalled riding luxury for every passenger.

McLaughlin-Buick offers the highest standard of motoring comfort ever attained; and this is one vital reason why more motorists drive McLaughlin-Buicks than any other fine car.

Yes-It's Safe-Though Mortgaged!

FEEL good about it-even though I had to give a big mortgage to secure our home. You see, I figured on paying off the mortgage in 10 years time. Then I began to think-if it takes me 10 years to pay off the mortgage how long would it take my wife to pay it if I died? Her name wouldn't stay on the firm's pay roll!

What did I do? Talked the matter over with Dad. He said a mortgage is fine to help you get a home but it can take away just as readily. Advised me to take out a Mortgage Protection Policy-as he did when he was younger-and cover the mortgage dollar for dollar.

I did it-I've drawn the teeth of that Mortgage. I know now that Elsie and Bob will be sure of their home whether I'm here or not.

And the cost is not so great! It's like paying just a little higher interest rate on the mortgage itself. And I know that my deposits are not like money spent, either; they will come back to me nicely increased. There is also a total disability clause in the Policy that is mighty reassuring.
