Wholesalers report orders for alltuming delivery in good volume. Collections are slow to fair. Steel plants, rubber tire and paint and varnish factories are busy, and manufacturers of agricultural implements are working to capacity. There is a further reduction in the output of automobile factories. During the months of July and August the congregations of the Baptist and the United Churches will worship together. Rev. A. N. Frith will conduct the services next Sunday, July 7th, preaching in the United Church at 11 a.m. and in the Baptist Church at 7 p.m.

THE FORD CAR STEEL SPOKE WHEELS

Greater Strength and Durability

THE Ford Steel Spoke (Drop Centre) ... wheel is an advanced step in engineering and the result of exhaustive experimental tests. It is smart in appearance, extra strong, having a lasting finish, easy to clean and provides a simple method for mounting and demounting the tire without tools and in a fraction of the time previously required.

The steel gods or spokes, 14" in diameter, are electrically welded to rim and hub shell. The finish is enamel baked on steel. Possessing great resiliency and being one solid piece, these wheels have a sturdiness not approached by any other type.

The Ford wheel eliminates loose, squeaking spokes and rims, pinched tubes, chipped or peeling finish, necessity of tire flap, misalignment of tires fue to carelessly mounted rims, and a host of other vheel and tire ills formerly encountered. It permits of easy steering and no drumming sound is created by the wind.

There is an enormous amount of careful work necessary to build strength and service into the Ford Steel Spoke wheel, and the results justify the engineering study and skill devoted to this feature of the Ford car.
