"OUR ADDRESS IS EVERYWHERE"

THE BUSY BOY
Beside my door, sometimes, you see,
A bunch of tangled strings,
A cart, a ball, a horseshoe too,
And many other things.
A hummer, bottles, rusty nail,
A few bottles, now and then small,
And do you know a little boy,
Plants treasures in them all.

When I have tidied up the place,
He's sure to come along;
I hear the rumble of his cart,
I hear his timeless song.
And many a time he walks the path,
All strewn with gravel stones,
And off the dust that lies about.
Eliche sighs and groans.

But not the years are slipping past
And soon I'll let in vain

To bear the load my childhood voice
Came to my ear again.

Again I look for cart and cart

Around my kitchen door,

The wee small boy, to manhood grown,

Is gone forevermore. —H.H.A.

WHY BE VACCINATED?

We are duty that smallpox tea dia-
disease to which the adjective "Health-
some" may be fairly applied. It is a
disease which not only destroys
the health of those who attack it but
which also permanently scars and de-
figures to a greater or less extent
those who survive the attacks. Before
vaccination was introduced, smallpox
was as common as measles is today.
There were very few persons at that time
who were not pock-marked, and about one death in ten was due to
smallpox.

Since the year 1798, when vaccination
was given to the world by Jenner,
a great change has been gradually ef-
fected. Smallpox has been almost com-
pletely eradicated; smallpox practically disappeared;
in other places where it has not been
thoroughly used, outbreaks occur from
time to time. Thus, compared with the
rest of the other communicable
diseases, very greatly in severity.
Sometimes the cases are mild and few
deaths take place; at other times the
cases are severe and a number of
deaths occur.

Recent successful vaccination is the
only known method by which small-
pox can be prevented. Not only is the
disease to be avoided with a desire to
protect anyone who is apt to be exposed.
There are those who say that they will
never have it, but such persons have no
right to be complacent. They may be
the first victims of the epidemic and
that they will not, therefore, have any
time in which to receive the protection
which others offer. Persons who are
also rather selfish, because they are
relying upon their neighbors being
vaccinated, thus indirectly pro-
tecting them from the chance of exposure.

We repeat that recent successful
vaccination is the only known method
for the prevention of smallpox. Small-
pox can be conquered through vaccina-

tion.
