## It is Milk in Feed Form

It's no wonder that Cow Chow makes more milk and better milk, for it's made of just the materials that go into milk. Scientifically made of the highest quality ingredients on the market, Cow Chow supplements your grain feed and forms the best possible milk making ration.

An extra inch of milk in the pail doesn't look like much—but it's the extra inch that often spells profits on top of production costs. Purina Cow Chow is ready to produce that extra inch—and more—for you.

Feed Cow Chow and keep tab of the extra milk and the extra profits it makes for you.

## Don't buy any car until you have driven Chevrolet

IT'S all very well to listen to someone's opinion of car values, but after all, the person whose opinion counts most is YOURSELF. It's all very well to sit back and wonder how Chevrolet can produce a really high-class car... put a high-compression, valve-in-head engine in it... employ Fisher Body bodies to come and build a series of suspension bodies for it... equip it in the most detailed and up-to-the-minute fashion... and call it the price of a four.
