A DAY'S FEED FOR ONE CHICK!

IHINK OF IT! One tiny thimbleful . . . all the feed a chick can put in its little crop in one day. On this tiny bit it must live . . . grow . . . build bones . . . build muscles . . . start feathers. Think of the job feed has to do! They must depend on feed for so many things! They get them all in Purina Chick Startena (mash) or Purina All-Mash Startena Chow . . 12 different ingredients in every thimbleful Cod-liver oil . . . dried buttermilk . . . alfalfa flour . . . granulated meat . . . these and eight others are there!

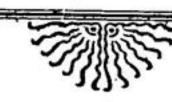

These 12 ingredients . . . think how carefully they must be mixed to make every thimbleful alike. Puring Startena and All-Mash Startena Chow are mixed over and over again...960 times just to be thorough! You will find the same care taken with Baby Chick Chow (scratch)... to be fed with Startena until your chicks are six weeks old... and with Purina Growena (mash) and Purina Intermediate Hen Chow (scratch)... to be and Purina Intermediate Hen Chow (scratch)... to be fed from then on until the pullets are laying at 16 weeks.

How little feed a chick eats... just one thimbleful a day... yet how important it is... how much depends on it... the chick's very life... its growth... what the pullets will do for you next fall and winter when eggs are sure to be worth good money. You can afford to feed only the best... Purina Poultry Chows.
