TWO QUALITIES -- RED LABEL & DRANGE PEKDE

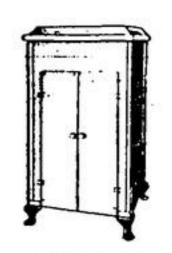

TOU can build a fire in any furnace, but you haven't any guarantee that the quantity and quality of heat is right in proportion to the cost. What is your present fuel bill? A Gilson "Magic" Furnace will save you onethird on the season's fuel costs.

The "Magic" is vastly superior in construction and material used than old-style furnaces. The "Magic" is made of Toncan steel plate, electrically welded into one complete unit. Smoke, gas and dust cannot escape. Steel heats faster, radiates faster. Booster flues send the heat direct to all rooms; conical grates and new parented fire pot burn the fuel so that you get 100% heat value. Water pan supplies ample moisture. Each part built for a purpose, and all organized into one perfect heating plant.

sed for co-operative experiments with Toronto (C.N.E.) outstanding varieties of winter wheat and other autumn-sown crops may obtain this material, free of charge, by writing the department of Field Husbandry, Ontario Agricultural College.

Royal Party for Girls In recognition of the splendid work nutrition problems, the department is offering free trips to the Royal Winter from each of the counties which have taken advantage of the instruction conby the Women's Institute branch. On be chaperoned in groups by staff instructors. A splendid program, intransportation for the party. The plan is supplemental to the 'Royal 500 Party' for farm boys which has been con-

Use Plenty of Litter It is good policy to use an abundance of clean, fresh litter in the laying pens and a poor economy to restrict the live stock which they produce to see quantity even when litter must be pur-chased. A laying hen is always a production of their young stock. Rehappy hen and a hen cannot be happy unless she is busy most of the time. Litter on the floor, especially if it is fresh and clean, is an excellent means of keeping the layers busy even though all the grain is being fed in hoppers and one is thrown on the floor. One of the best materials for litter is wheat will make Halton County the home of straw, which is not so stiff as rye straw, and does not break as easily as oat straw. Litter absorbs considerable moisture from the droppings and from the air of the hen house, and should be changed frequently in wet weather. Moldy straw is almost certain to cause trouble and should never

be used in poultry houses. Buy Home-grown Products Announcement has been made Premier Ferguson that the Government will launch an extensive educational campaign to encourage the buying and eating of Canadian products in Ontario. Radio, lecture staffs and newspapers will all figure in the program. "We are determined," said the Prime Minister, "to show to our people the real qualities of our products, to demonstrate the value of our own market and to prove to them the advantages of buying at home. In short, we want to establish a greater measure of cooperation between consumer and producer." In commenting upon the projected campaign, one in which the large Ontario distributors of food will be asked to join, Mr. J. B. Fairbairn. Deputy Minister of Agriculture, said that most Canadians would be astonished at the amount of food-stuffs imported at the very time of year when Canadians are producing similar pro-

ducts. An extra slice of bread a day

yould help to take care of surplus Canadian wheat, he stated, and un-

employment would be relieved considerably by vigorous prosecution of the campaign in mind. The Crop Situation Reports of crop conditions for the latter part of August indicate that the showers which fell in most sections of Southern Ontario were badly needed. as pastures had been burnt up and corn and root crops were suffering severely for lack of moisture. Harvesting throughout the province has been completed and excellent yields are reported. Alfalfa, alsike and clovers vielded very satisfactorily, as high as nine bushels per acre of red clover having been reported in Kenora district. Many drovers and cattlemen have reported heavy losses on their grass cattle, due to low prices and scarcity of pasture. Many are holding their cattle over for the Ohristmas trade. Some excellent crops of barley. oats and mixed grains have been harvested this season, In Norfolk County

one farmer secured a yield of 1487 bus-

hels of oats from a 15-acre field or nearly 100 bushels per acre. Valuable O.A.C. Exhibit Taking as its keynote the crop-producing power of Ontario soils. the O.A.C. Department of Chemistry exhibit at the C. N. E. has attracted great attention. It embodies a huge cornucopia picturing the fertile soils of Ontario pouring forth hundreds of thousands of bushels of wheat, oats and barley, and thousands of tons of potatoes, roots, corn, vegetables, hay and other products. A giant map of the province shows the location of the 1.100 fertility test plots which the department is operating throughout Ontario. This year, with nearly every erop grown in Ontario on these plots, a wide variety of fertilizers have been aplied on the farmers' own lands under their own conditions. Field representatives ensure accurate application of fertilizers and equally accurate harvesting of test areas. The redords show interesting and valuable figures. Meadows fertilized with a high nitrogen fertilizer gave an increase of 45 per cent in yield while alfalfa fertilized with high potash fertilizers gave ur increase of 212 tons per acre over the unfertilized area. In the fall wheat fertility tests, the average yield of all fertilized plots was 44 bushels per acre, weighing 60.4 pounds per bushel. The yield of unfertilized wheat was 34 bushels, weighing 59.8 pounds per

. The functions of the main plantfood elements were admirably shown by crops growing in plant solutions, and the pasture fertility work in operation in connection with the college farm claimed considerable interest. Soil testing for acidity and general dis-cussion of soil survey work provided

BOGUS'\$10 BILLS ARE Ottawa, Aug. 31-Counterfeit Bank of Nova Scotia ten-dollar bills are

being circulated in Canada, according to a warning issued by the post office department. The spurious money is "The counterfeit is a photograph copy of the front of the genuine note sue of January 2nd, 1929, serial letter AA." In appearance it is darker and is slightly blurged. The back is of the 1924 issue but of a deeper blue

nd is quite blurred. The numbers, which are crudely executed, are about he same height but wider and the eady presented take up slightly more sented is about one sixteenth of an ich smaller than the genuine, while mother is the correct size. The paper rather greaty" and has a shiny

During the year 1929 a group of pro-County conceived the idea of organizbeing done by girls throughout Ontario ing a Halton County Live Stock Imin the study of housing, clothing and provement Association. This organozation has undertaken a work which should receive the whole-hearted co-Fair next November to five farm girls operation of every farmer in the county, because it is an organization of farmers, for farmers dealing with probducted in household science judging lems that effect the agricultural wealth by the Women's Institute branch. On of our county. One of the first steps their arrival in Toronto the girls will that this Live Stock Improvement Association has taken has been to have a bull census made of the County as cluding visits to some of the industrial a preliminary step to a concentrated plants and business centres of parti- programme of inspection leading to cular interest to girls from the country the ultimate goal of having the counis now in course of preparation by the ty declared a better bull area. This department which is also providing census is practically complete and the information which has been secured shows that the farmers of Halton County should consider more seriousducted so successfully during the past ly the type of cattle which they are breeding. Space does not permit of the quoting of lengthy statistics, to prove this at the present time, but farmers of Halton County should be interested enough in the quality of member that a good bull is half the herd and a poor one all of it. More information along these lines will be made public from time to time but it is the hope of the prominent men interested in this work that every farmer will give the co-operation which |
