# GILSON AUTOMATIC DRIP HUMIDIFIER

He will tell you that properly humidified air in your home will prevent many colds and possibly serious illness this winter. Ten to twenty gallons of water per day are required to supply the correct humidity for an eight-roomed house in zero weather. Hot, dry air is decidedly unhealthy,

Gilson Automatic Drip Humidifier Saves Health and Money

This marvellous device is easily installed in any warm air furnace. It operates automatically, keeping the air healthful. It saves coal; because high temperatures are not required for comfort with properly moistened air. It protects furniture, draperies, floors, etc.
