The Navy Looks Her Over

Expert criticism of the Canadian Pacific's new 26,000-ton liner, "Empress of Japan," is depicted in the above picture. It shows two British blue jacketed Pacific greyhound, lying at her berth in Vancouver, B.C. The new

### MOODS

Comes a time, now and then, when I like the fellow-mood. Good and bad and all together, rich and poor and high and low. When it seems as if they had nothing in them very bad. But were like a field of daisies. Good to see and good to know.

And on happy days like that, I can stop a while and chat. With the tramp upon the highway or the boy upon the street. Then it somehow seems to me good is all that can be said. And there's nothing much the matter with the people that I meet.

But come other mornings, when I am sick and tired of men. There are some that irritate me. There are some I can't abide. For their faults are all so plain. Some so grossly are for gain. That the thoughts I think about them get me all wrought up inside!

Now I think I've worked it out. People everywhere about. Seem to show upon their features that the things I like to see. When I have a cheerful mind. Good is all that I can find. When I'm thoughtful and complaining. Perhaps the fault is all in me.

—Edgar A. Guest.

After-harvest cultivation appears to be more general than usual in Middlesex County, reports the representative. The early completion of harvesting has allowed ample time for working on this work while the weed menace is also stimulating this effect in weed control.

### GOOSE RAISING PAYS

Goose raising does not receive the attention by the farming community that the business warrants, states A. C. Taylor, B.S.A., poultry expert of the Dominion Department of Agriculture. The farm is the natural habitat of the goose; in fact no other surroundings can make goose raising for market a paying proposition. The two great essentials in goose raising are—first, free range, and second, an abundance of green food. On the farm these essentials are always plentiful, and the raising of a flock of geese is one means by which the farmer can reap a good reward with a very small investment and comparatively little labour. Geese command a good price on the Christmas markets, and the demand is always much greater than the supply.

The raising of a flock of geese are the Toulouse, Embden, African and Chinese. The Toulouse being the heaviest bred the others maturing at lighter weights in the sequence shown. The breeding and rearing of geese is a comparatively simple proposition and is simpler than in the sequence shown. The raising of a flock of geese in a clean pen will fatten geese for market in about two weeks.

Whole care of the geese so simple that every farmer should avail himself of the opportunity. The expense is very small. Birds require very little care either winter or summer, they are almost immune from disease, and a gosling once hatched is almost sure to develop. No branch of the farm offers greater opportunities, or better returns for the money invested than does goose raising.

### Do You Get 100% HEAT VALUE From Your FUEL?

FUEL costs money. The amount and quality of heat your furnace gives you in return for the fuel consumed measure your profit or loss. The Gilson "Magic" will give you 100% value in heat from the fuel consumed, and show a profit of 30 to 40% in fuel saved—CUT 1/2 OFF YOUR FUEL BILL!

The Gilson "Magic" is absolutely different to old-style cast-iron furnaces. It is made of Toncan steel plate. All seams are electrically welded. It is positively smoke and dust proof. Patented breather holes in firepot consume all the valuable heat-producing gases that in other furnaces pass up the chimney wasting your money. Conical grates cause fire to burn from the firepot walls to the centre. Fuel is all consumed. None goes to the ashpit. Saves you money.

If you want to get 100% value from your fuel, write today for the illustrated booklet "The Supremacy of Steel." Ask about our easy time-payment plan.

Gilson Heat Wave  
Ideal for small homes, offices, schools, etc. Looks like a piece of ornamental metal. Draws cold air from floor—radiates warm air. Big fuel saving.

Gilson All Cast Furnaces! A big one-plate furnace at a record low price! We install quickly at small cost, money refunded if not satisfied. Quality from manufacturer. Pipe or pipette made on cast iron.
