 Special Music by The Choir

Canada's First Electric Tug

The first electrically-driven tug to be built in Canada was launched at Lauran, Que., recently, when the "Proscott", Diesel-electric tug for the Canadian Pacific Car and Passenger Transfer Company's service between Prescott, Ont., and Ogdensburg, N.Y., slipped gracefully into the waters of the St. Lawrence after the traditional bottle of champagne had been broken across her bows by Mrs. Duff, wife of M. McDuff, manager of the Canadian Pacific Great Lakes Steamship Service. As a pioneer feature in Canadian shipping, the Diesel-electric engines with which the new vessel is equipped, are of special interest to marine engineers. Each of 600 H.P., they are directly connected to twin generators capable of delivering 330 kilowatts, each at 250 volts when operated at 245 revolutions per minute.

In operation, a car barge with three tracks for 16 hundred-ton cars, will be lashed to the starboard counter of the tug which it will be possible to control either from its own wheel-house or from the bridge of the car barge.

News and Information for the Busy Farmer

All farm products were reported moving slowly on the market, with prices low the middle of September. Peaches were selling at 75 cents to \$1.00 per 11-quart basket; eggs, fresh, first; 33 cents per dozen; 70 cents for blue bushel; barley and oats as low as 27 cents per bushel; potatoes \$1.00 to \$1.40 per bag and chives 13 cents per pound.

There is a smaller area in Western Ontario under after harvest cultivation this year due to dry weather. Eastern and Northern Ontario report that farmers are paying more attention to summer fallowing and after harvest cultivation and are making an honest effort to keep in control noxious weeds that have become so troublesome in most Ontario farms.

Loss From Smut
 A survey of 200 farms in Oxford County made during the past summer under the direction of the local agricultural branch, showed that approximately 44,000 bushels of wheat was the annual loss to Oxford County out of a total production of 627,000 bushels. The loss was brought about by the smut disease which has been present in the county since 1927.

Sets Good Example
 The township of Haddow in Prince Edward County has set a good example to other municipalities in the way of providing a mosquito control and drawing attention to the menace of noxious weeds generally, and of the smut disease in particular. The township for effective co-operation of the 'deadly' pests, is circulated and received considerable interest. County commissioners in the township, including endorsement of the rev. depute reeve and two councillors.

Plowing Match Next Month
 The next great agricultural event of the near future will be the International Plowing Match and Farm Machinery Demonstration. This feature annual which brings together the best farm implement men in the country, is scheduled for October 14, 15 and 17 King's Highway No. 7, near the city of Stratford. J. Locke Wilson, managing director, has been hard at work for some time preparing the match and the four days of plowing this year promise to out-class any previous years in the history of entries and contests. The awards are very generous and every farmer in the country is eligible.

Weekly Crop Report
 Reports from representatives throughout Ontario indicate that due to long-continued drought, the average sown to fall wheat this year will drop almost 60 per cent from the average. In many sections it has been almost impossible to plow and where cultivation has been accomplished, there is not enough moisture to sprout the seed. The corn and root crops have also suffered severely during the dry weather and many farmers have been filling their silos early because the corn is dropping and depreciating in food value. Grain yields throughout the province have been generally good. Wheat has yielded from 25 to 40 bushels per acre with an average of 35 bushels per acre. Several counties report alfalfa seed yields of from 2 to 10 tons per acre with the best reported exceptionally high. Lincoln County reports a very large crop of peaches. Only one bushel of peaches reported tomatoes to be not more than half a crop.

Canadian Medical Assoc.

"ANYTHING WRONG WITH ME?"

If they were to be asked the question, "What is the matter with me?" "There is nothing wrong with me." Yet we know that although this answer would be the best and the most optimistic, it would, in many cases, be far from the truth. By this, we mean that many of us have accumulated health troubles with them without their knowing and that trouble often takes possession of us without our realizing it.

Admittedly, it is not easy to know when "There is nothing wrong with me." but we should be able to stay it with an assurance of its being true. It may be true, but we do not know whether it is or not unless we have had a health examination by the most reliable and latest machinery.

Why is it that when it is common knowledge that all machines require supervision and that it is necessary to keep them running smoothly and to prevent their usefulness, there is still disregard of the need for any such supervision in the human body?

It is surprising how many successful business men seem to imagine that, because they have accumulated wealth, their bodies are in some way different, and who act as if they were in some way exempt from the laws that govern the bodies of all men.

It would seem that as health is such a necessary asset, it would be necessary to point out to any person who is not sure of his health, that anything but desirable. We do state emphatically however, that the art of health is the most important and business responsibility we have.

Based on this understanding, we recommend that the periodic health examination is a simple and desirable routine which should be practiced by everyone. Periodic health examination is a good habit, it is good business. Ignorance is always expensive, it is not dangerous. Ignorance as to the condition of your body simply leads you to cheat yourself by depriving yourself of the care you may need. The enemies to health can mostly be overcome. Disease when treated early can usually be cured. The best way to accomplish this is by the periodic health examination.

Questions concerning health, addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.

CHURCH NEWS
