Why you should buy a Majestic RADIO

NEW Majestic Electric Radio actually costs you less to A own and operate than many sets being offered at special bargain prices. First, because while you may buy some radio sets for less, the depreciation, service, performance and trade-in value wipe out this mythical saving and more before a season has passed.

Most people now buy radios on time, so the purchase of a Majestic means but a few dollars more outlay at the time of purchase and a few more monthly payments. At the end of that time the value of the Majestic as a "trade-in" is definite and sure. There is always a demand for used Majestics, whereas the loss you will take on nameless "stencils" or "specials" or cheap radios built to a price makes your original purchase an expensive one. Majestic is the largest manufacturer of complete radio receiving sets in the world. It is fathered in Canada by the Rogers-Majestic

Corporation Limited - the largest radio manufacturers in the British Empire. Were it not for this tremendous output Majestic prices would be 10% to 25% higher, if the same quality were maintained. Due to this enormous production Majestic prices are as low as most radios of much cheaper construction. Thus, every Majestic is really a bargain—extraordinary value for your money. The 1931 Majestic Models with Super-Screen Grid and Super-Colotura Dynamic Speaker are now on display at our store. Come in, see them, and find out about our liberal terms . . . today.
