BALTON COUNTY PLOWING MATCH

The Balton County Annual Plowing Match was held Friday, November 7th on the farm of W. B. Moore, lot 8, con. 1, Township 17 North, Range 10 East, of the province were present. The land was in good shape only dry, but plowing was delayed owing to the heavy frost. The day being very cold kept several plowmen from coming. The Judges were: Messrs. Weir, Agincourt; Thompson, Thanesville, and Smiley, Norval.

Class 1—High cut in sod—John Capton, Oshweken; D. J. Tran, Claremont. Best crown and finish—John Capton, Oshweken.

Class 2—Jointer plows in sod—Walter Greenbush, Woodstock; J. R. Hargreaves, Beachville; Alex. Black, N. O. McLeod, Galt. Best crown—Walter Greenbush, Woodstock. Best finish, J. R. Hargreaves, Beachville.

Class 3—Jointer plows—W. G. McCurdy, Hornby; Lloyd Chisholm, Milton; Wellington Wilson, Georgetown; Howard Clibine, Milton. Best crown, Lloyd Chisholm, Milton. Best finish, W. G. McCurdy, Hornby.

Class 4—Jointer plows (boys)—Geo. Oarow, Oshweken; Austin Nairn, Milton; John Lister, Hornby; W. Tapscott, Milliken. Best crown, Geo. Oarow, Oshweken. Best finish, W. Tapscott, Milliken.

Class 5—Tractor plows in sod, 12 inch furrow—Bruce McKerr, Milton; C. B. Wrigglesworth, Georgetown; Victor Hall, Jr., Hornby. Best finish, C. B. Wrigglesworth, Georgetown.

Class 6—Tractor plows in sod, 12 inch furrow—Thos. Howden, Georgetown; C. A. May, Hornby; Harold Agnew, Milton. Best crown and finish, Thos. Howden, Georgetown.

Special—Best plowed ridge in walking plows awarded to John Capton, Oshweken.

Special—Best team and equipment awarded to Thos. Brownridge, Hornby.

Special—Best finish in tractor classes awarded to C. B. Wrigglesworth, Georgetown.

The following is a list of the winners in the Home Plowing Competition which was judged Nov. 3rd and 4th by Mr. James McLean of Richmond Hill. There were forty-four entries received at the Department of Agriculture, but owing to the dry weather a number of contestants hadn't their plowing finished when the judge arrived. The competition was a splendid success and we will hope for even better results another year.

Class 1—Walking plows in stubble—Stewart Miller, Georgetown; Robert Miller, Georgetown; John Lister, Hornby; Wm. Stensson, Freeman; Tom Ballin, Campbellville.

Class 2—Walking plows in sod—Chisholm Hume, Milton; Earle Black, Campbellville.

Class 3—Tractor plows in sod or stubble—Garnet Sheppard, Milton; Bruce McKerr, Milton; Stewart Kerris, Freeman; Victor Hall, Hornby; John Ruddle, Georgetown.

Championship trophy awarded to Stewart Miller, Georgetown.

Canadian Medical Assoc.

THE TODDLER

It is generally known that the school child should receive regular health supervision in order that he may get the most out of his school years, and start out into adult life with a sound body. Throughout the civilized world, we find doctors, nurses and dentists working in the schools to safeguard the health of the school children.

It is generally understood also that the well baby should be supervised by the doctor in order that the mother may be advised as to the care her baby requires, that she may keep her infant from disease, keep him well and see to his proper development. Each year an increasing number of mothers take their well babies to their doctor for health supervision. They do this because they have learned that by following the advice they receive their babies are kept well. In many places, well-baby conferences are held for the purpose of giving health supervision.

As a result of this preventive work which has been done for infants and school-children, there has been among them a great reduction in disease, and a marked improvement in their health. The results have been so satisfactory that such work is extending, and in some places, the health supervision which is given reaches practically every infant and school child.

Until a short time ago, the young child, between infancy and school age, was thought not to require any particular care. It is only recently that the toddler, or pre-school child, has been, as it were, discovered to require health supervision.

The child, from one to six, is passing through years where growth and development are rapid. He requires proper care if he is to develop properly. He needs guidance if he is to form the habits of life which are so important to his physical and mental health. These years are the years when the child requires the right kind of food if he is to have a properly developed, sound body when he enters school. His diet should include cereals, meats and vegetables; particularly does he require milk each day, at least once a day, and green vegetables regularly. He should not have tea, coffee, fried foods, pie, pickles, or rich cakes any more frequently. He should not be given food or candy between meals as this spoils the appetite.

Well over half of all deaths from communicable diseases occur at this age. The child should be vaccinated against measles and immunized against diphtheria. He should never be exposed to such diseases, and if they do occur, he should be carefully treated.

Adopted, diseased, toxemic, and defective of the eyes and ears develop during this period and they should be corrected without delay. There is no reason for putting off treatment, and there are many reasons why treatment should not be delayed, as delay causes the child to suffer and his development to be interfered with. Again, long-standing conditions are always more difficult to treat successfully.

Questions concerning health addressed to the Canadian Medical Association, 184 College Street, Toronto, will be answered personally by letter.
