trucking and cartage. No job too
small. No job too big. Courtesy and
service guaranteed. Phone 331
Georgetown, Ont., 67 P. O. Box 127.

A clean, airy bedroom where the attic used to be

GYPROC makes the change

A BIGGER HOUSE inside the same four walls sounds impossible of accomplishment—but it only sounds that way.

Gyproc is a fire-resistant wallboard made from gypsum rock. It comes in sheets 4 to 10 feet long, 4 feet wide and 3/4 of an inch thick. It nails and cuts just as easily as lumber and with a minimum of waste. It is used for making inside walls, ceilings and partitions.

It has structural strength, insulation value, is draught and vermin-proof and costs very little.

Gyproc does not burn is exactly the material to use for it needs no decoration when panelled yet is an excellent base for Alabastine, Gypdex or wallpaper.

Get a Gyproc direction sheet from your dealer or write us for the FREE booklet, "Building and Remodelling with Gyproc".

"HIGH STANDARD" LIQUID PAINT
Money by buying Cheap or inferior Paint. You may pay less "per package" for it, but it will cost you more per square foot. The reason is simple: Lacking Quality, it will require more material to do a given area: You can save both money and time by using **Low Brothers Paint**. It will cover from 200 to 300 square feet per gallon than cheap paint.

It will take less material to do a given area. It will last longer, brush easier and look better. Figure your paint cost—not on the gallon price—but on the square-foot coverage. Try Low Brothers on your next job for best performance and best economy.

"High Standard" Paint
A superior paint for door frames, sashes, trim and all exterior woodwork. Has a real body that assures maximum covering capacity—permanent color and richness of finish. Choice of many modern colors. Per-Square-Foot the most economical.

Shingle Paint & Stain
SHINGLE PAINT—An inexpensive but preservative and protective paint for rough siding, shingles, fences, etc.
SHINGLE STAIN—An unexcelled stain for use on shingles, siding, etc., where permanence of color and durability is desirable. Ask for color card.

Porch & Deck Paint
Made to withstand the scuffing and scraping of feet. Stands up under the most rigid conditions and is not affected by rain, snow or frost. All its 6 colors hide well; work easily and spread far.

THE FIRE MENACE IN THE DOMINION

Summer has its perils as well as its pleasures, and one of the greatest perils is the forest fire. Until a few decades ago Canada was a timber country, and the lumber industry was the backbone of the Dominion. Now it is realized that the wooded areas must be saved for, and reforestation has become an established undertaking.

In view of this situation, prevention of forest fires is a subject of prime importance. During 1929, 6,000,000 acres of timbered land in the Dominion was burned over, with a total loss of \$6,200,000; and this despite an elaborate and efficient preventive organization. Each of the Provincial Governments administers its own forests maintains a fire-protection body which co-operates with owners and lessees for the protection of timbered areas, the cost being distributed and covered by special taxes on such lands.

The aeroplane is established as an important factor in the detection of forest fires, and in this respect Ontario is particularly well equipped. While aircraft have to a large extent supplanted the old system of horse and foot patrol for detection of fires, a large ground staff with equipment stored at strategic points always will be necessary for the fighting of larger fires and maintenance of systems of communication.

With the disappearance of winter conditions these flying firemen may be found all over the forests of Northern Ontario. This is a well trained and disciplined force, directed by skilled aviators, and plays a tremendous important part in the protection of the Province's timber wealth.

There is something picturesque and much that is of a hazardous nature about the work of these men who spend the summer in the clouds above logging camps, and in this respect, they, watching eagle-eyed for the incipient fire that may mean disastrous material loss and perhaps death in its most terrible form. Their presence in these danger zones, and the conviction that they are animated by a keen sense of duty, justifies public confidence that everything possible will be done to prevent the forest fires which support no less than the life of the Dominion.

THE TOY-STREWEN HOUSE

Give me the house where the toys are strewn,
Where the dolls are asleep in the chairs,
Where the building blocks and the toy balloons
And the soldiers guard the stairs;
Let me sleep in the house where the toys are strewn,
With his horse rules the floor,
And rest comes in my weary heart,
For I am at home once more.

Give me the house with the toys strewn,
With the battered old train of cars,
The box of paints and the books left out,
And the ship with her broken spars;
Let me sleep in a house, at the close of day,
That is littered with children's toys,
And dwell once more in the haunts of my childhood.

Give me the house where the toys are strewn,
With the echoes of bygone noons,
The house where the children romp,
And it happier than man has been,
Let me sleep in a house, at the close of day,
That is littered with children's toys,
And dwell once more in the haunts of my childhood.

Give me the house where the toys are strewn,
With the echoes of bygone noons,
The house where the children romp,
And it happier than man has been,
Let me sleep in a house, at the close of day,
That is littered with children's toys,
And dwell once more in the haunts of my childhood.

Give me the house where the toys are strewn,
With the echoes of bygone noons,
The house where the children romp,
And it happier than man has been,
Let me sleep in a house, at the close of day,
That is littered with children's toys,
And dwell once more in the haunts of my childhood.

Give me the house where the toys are strewn,
With the echoes of bygone noons,
The house where the children romp,
And it happier than man has been,
Let me sleep in a house, at the close of day,
That is littered with children's toys,
And dwell once more in the haunts of my childhood.

And dwell once more in the haunts of my childhood.

THE WAY OF THE WORLD

Flush, and world will greet you!
Brink, and you heard alone!
For you cut me loose when you haven't
the price,
And no good friend you can "bone."

Some tried out as far as he
wished into the limb, he ascended
the place where he had fastened the
rope and began to give in back. The
limb dropped slowly; the end that held
the youth came nearer and nearer to
the trunk of the tree. Since the end
of the rope was around the tree trunk
and the trunk for several feet was
free of the trunk of the tree, the youth
began to give in back. The limb
dropped slowly; the end that held
the youth came nearer and nearer to
the trunk of the tree. Since the end
of the rope was around the tree trunk
and the trunk for several feet was

free of the trunk of the tree, the youth
began to give in back. The limb
dropped slowly; the end that held
the youth came nearer and nearer to
the trunk of the tree. Since the end
of the rope was around the tree trunk
and the trunk for several feet was
free of the trunk of the tree, the youth
began to give in back. The limb
dropped slowly; the end that held
the youth came nearer and nearer to
the trunk of the tree. Since the end
of the rope was around the tree trunk
and the trunk for several feet was
free of the trunk of the tree, the youth
began to give in back. The limb
dropped slowly; the end that held
the youth came nearer and nearer to
the trunk of the tree. Since the end
of the rope was around the tree trunk
