Increased tourist traffic to Canids from the United States is foreshadowed by reports from Canadian Pacific passenger agents in the U. which show a much larger number of enquiries from would-be travellers than in former years, C. B. Foster, passenger traffic manager of the railway, stated recently in an interview at Saint John.

Canada said au revoir but not good-bye to Their Majesties the Cing and Queen of Siam at the border station of Portal, Saskatchewan, whither they had travelled v Canadian Pacific on their journey to New York. They were passengers by the Empress of Japan on that ship's record-breaking passage from Yokohama to Vancouver.

"It's not so much the captain as the chief engineer who makes speed records possible at sea," Captain Samuel Robinson, of the Canadian Pacific liner Empress of Japan, told the Vancouver Board of Trade recently, at a luncheon in his bonor. after his ship had clipped another seven hours from her previous speed record across the Pacific. She had averaged 22.27 knots over the 4800-mile course from Yokohama to Victoria, a speed hitherto unheard of.

husiness nowadays and rarely sucneeds in its object to frightening the man or woman giving evidence. There was a time when there was a great difference, so far as education is concerned; between the lawyer and the witness, but that day has passed. The standard of education has been increased and a legal bulty simply builds up a wall of antagonism against himself and adversely affects the jury or the judge. The other day in Stratford the presiding judge sharply reprimanded a lawyer from Toronte who had suggested that the witness who, of course, had been sworn, had no regard for his oath. Very properly the court intervened. The average man in court feels his blood boil when a witness, telling a straight story, is the victim of a bullying lawyer, who seeks to discountenance the evidence being given. Are You 50 Years Old--or Young?

T RADITION once played an important part in business organizations. Because the founder of a business had instituted certain practices twenty, thirty or forty years ago, his successors seemed to feel that they were in duty bound to honor the hoary customs by constant use. Of course the rapid fire changes in public tastes and demands in the past quarter century, and more particularly in the last decade, settled the question definitely: the policies were changed to meet modern demands or the business followed ancient customs into oblivion.

No business executive today would attempt to meet his client (nor allow his representative to) clad in the garb of the '90s. Then why allow business stationery which is your printed representative interview hundreds of business associates every month in the same old "dress," simply because "its been that way for years."
